Comments for Public Posting: This comment is in regards to permit parking in Leimert Park, CD-10. With the desire to increase the number of rental residential units has also come the influx of vehicles. While in a perfect world residents in the new apartment dwellings placed near Metro stations would leverage public transportation and not own a vehicle that is not reality. The reality that we are experiencing is that with each new building comes an influx of cars parked on side streets due to the lack of building parking. We've also had an influx of parking as a result of the Metro K line opening. I ask that you vote YES in favor of permit parking in Leimert Park. Grant us a predominately community of color the same benefits you have the communities in other areas of LA.
