**Comments for Public Posting:** Allowing a Recreational Vehicle Storage Lot on the corner of Victory and Balboa is a very concerning issue. This may be one of the worst locations for those experiencing homelessness. I am very concerned about their wellbeing, however, this is not the solution. You are proposing to allow people to live in their recreational vehicle directly next to a bus stop, a park, a high school, a small strip mall and a business office park. This will endanger families in the park and those running on the track directly around the parking lot, kids in high school and those shopping or eating in the mall and business owners, employees and their clients in the office park. My office has been in that office park for decades. I have seen unhoused people, wander the parking lot, multiple fires set over the years just outside the walls of our building, people using the grounds as a bathroom, people doing drugs on and around the offices, etc. This is a dangerous decision without proper care for public safety. Unfortunately, this type of thinking from our elected officials has become very common in our area. As a homeowner and business owner in this area, policies of this nature are the reason we are actively looking to relocate our home and business. I hope you consider the taxpayers that live, go to school, and work in our community and not allow the Recreational Vehicle Storage Lot on the corner of Victory and Balboa to be approved.
