Comments for Public Posting: In five short years, the Olympics will be held in Los Angeles, with the possibility of the Sepulveda Basin as an important event venue. Restoring natural habitat, increasing biodiversity and revitalizing the river are essential before we invite visitors from around the world to this space. As an Angeleno and a Valley resident, I am requesting Council's support for a natural restoration of the Sepulveda Basin to be completed before the 2028 Olympics. I urge you to move this through the committee process as efficiently as possible.

Comments for Public Posting: Endangered Habitats League, a Southern California conservation group, supports the Sepulveda Basin motion. Restoration of the Sepulveda Basin would create a magnificent 2,000-acre space for surrounding communities. The restoration would improve groundwater recharge, reduce regional flood risk, enhance wildlife habitat, and increase biodiversity. Los Angeles can lead the way in multi-purpose restoration and flood control.
