Council File No: 23-0338

Comments for Public Posting: Dear Council Members: I am a resident and a transit rider in the neighborhood described in the Motion (Council File: 23-0338), and I urge the city council to improve transit infrastructure in council district 6. What the people need is more bus shelter that provides adequate shade, reliable bus services, bicycle infrastructure, and easy access to the Metrolink station. Many people are not aware of a train station in Sun Valley because the city council and the Department of Transportation don't make an effort to outreach and inform the public. It is important that the city provide reliable bus and train services and to ensure that the people have easy access to such transit services. I would like more investment such as shelters and other amenities that will make taking the train as convenient as possible for the public. I strongly believe that the city should not remove the station in Sun Valley. The city council should make improvements to the neighborhood. Thank you!
