Comments for Public Posting: The retirees from the City of Los Angeles are facing many financial problems as the rest of the world with food, gas, housing and medical increases. Many retirees are still helping current employee with their job because they lack the knowledge others have and management has needed them to help with current situation to keep the City from financial losses and law suits. Retirees shouldn't be looked upon as if they no longer help the City thrive. City employees have recently agreed to significant pay increases and retirees are facing the same high prices they are. I hope you pass the additional increase for retirees.

Council File No: 23-0418

Comments for Public Posting: I urge the Council to approve a 2.6% increase in pension benefits for LACERS retirees. Active City employees have been given significant raises for several reasons, including inflation. Retirees are affected more by inflation than active employees are, because we cannot get promotions to increase our incomes. Thank you.
