Comments for Public Posting: The I.A. City Council recently approved Pay raises for active City employees for 2023-2028 for 25%! This will give those employees thousands of dollars extra in retirement income year after year. How can Council now say it has no money to give its hard-working retired staff a one-time 2.85% discretionary COLA? News flash: Retired employees also vote in the polls !! Council members, please do the right thing and grant the 2.85%! With inflation year after year this would help make things a bit easier for retirees!
