Comments for Public Posting: It has been shared that Council continues to approve raises to benefit themselves and current employees. The LACERS Board still feels justified funding international travel. Delay tactics are set to be used to never give consideration to retirees on a fixed income. This is a sad commentary and unethical practice. We gave our all tho the city. 30+ years of service.

Comments for Public Posting: The discretionary COLA item is expected to be taken up at the Executive Employee Relations Committee (EERC) on February 8th. As a retired City employee of 38 years, I respectfully request sincere consideration of the recommendation by the LACERS Board. I understand that recently, current City employees are being provided a 25% raise. Many of us are now on a fixed income. Inflation has driven up the cost of living, and many of us can't afford basics, much less luxuries in our budgets. Please vote yes and send this to City Council with a yes recommendation. Thank you.
