**Comments for Public Posting:** Raising the monthly solid resource fee by 130% (24.33 to 55.95) would be detrimental for our communities who are still trying to bounce back from Covid, wildfires, and union strikes. It's unfortunate that the fees did not go up a little bit over the last several years, but raising them so much is a punishment that will financially hurt your customers. I implore you, that if you must raise the costs, raise them by 2-3% over several years instead of such a huge push all at once. Thank you.
