Comments for Public Posting: LA City and Sanitation should be ashamed at themselves They are making devastating decisions for the hard working people of Los Angeles We didn't even have a proper way to PROTEST or let you know how disturbing this is I write and speak for many who are at work, did not know about the public comment Please get together and come up with a better plan These amounts per month was extreme and OUTRAGEOUS It will devastate the paying public who are greatly affected by the new pricing for low income at LADWP The high cost of rent the mismanagement of housing in Los Angeles DO NOT LET THE UTILITIES GET OUT OF CONTROL You are killing us if you do Also, you should be working with the State to CHANGE the law regarding PROTEST You should NOT even make a decision about this until the true public comment and protest process is known through the city To be entered online with an email a public comment The USPS mail situation was ridiculous Do the right thing We Angelenos will RIOT if ridiculousness like this gets passed Be reasonable and fair Thank you
