Council File No: 23-0710

Comments for Public Posting: I strongly urge the council to pass the Japanese Garden service garden. This contract has been essential to maintaining the beauty and health of the Garden for many years, and we need it to be approved. As a member of the public and long serving volunteer with the Garden, it has been devastating to see the Garden struggle from the absence of a full gardening service force. It has served as a beautiful demonstration of the City's commitment to water conservation and recycling and is a truly unique asset for the community. For these reasons, I urge you to please approve the Japanese Garden service contract.
