Comments for Public Posting: OPPOSE THIS MOTION. If you talked to the RV community, you would see a diverse population...BUT the overarching cause is the extreme lack of available low-income housing. DUH. A large percentage of the RV population are disabled, elderly, people of color, and working poor. So supporters of this motion would support their isolation away from those who can afford housing? Consider now how racist and discriminatory this is. And if you believe the existing disaster of not supplying enough or appropriate wrap-around services or housing to disabled unhoused people will somehow be done by using this displacement law, you are stupid or lying. This is all about gentrification and so certain more privileged people do not have to be exposed to this poverty. Supporters of this motion support discrimination. That's it. The best possible solution is to give linkage to housing & recovery resources to some, Safe Parking to some, repairs to some, and TOLLERANCE for others - until the City of Los Angeles gets real and creates the housing and services required. You can't build primarily luxury housing for 40 years (so your developer buddies get rich), destroy low-income housing, let the Board & Care system fail, let LACounty jail continue to be the largest mental illness facility in the country, promote and support criminalization without being called Racist or Facist. How about you eminent domain some of these huge arse STR violators in CD11 these property owners are getting rich on? Wow. You can't do that, but criminalize poor people. Bottom line.
