Council File No: 23-0914

Comments for Public Posting: To be extremely frank and objective in order to cut through any partisan or bleeding-heart politics, city-endorsed RV encampments are biological, sociological, psychological, and economical hazards. These vehicles and their occupants victimize natural resources, neighborhoods, children, and animals with their abhorrent and selfish disregard for the well-being of their surroundings. As if forcing the tax-base to subsidize their choices were not insulting enough, the city's refusal to take action - including challenging the judiciary's rulings from the COVID-19 era - represents an unethical, deeply illogical, and morally destitute point in history. Since when do the rights of the few trumps those of the many? The rule of law is the bedrock of our democracy. Each day the city disregards its principle, sinks this once-great city and its youth into a deeper hole of which one day there will be no escape. We implore the council to act with reason, grace, and effective but stern mercy to once and for all prohibit the encampments across the city permanently.
