Comments for Public Posting: I support a moratorium on all new breeding permits in the city until shelter capacity falls below 75%. Animals are individuals, not a product for business.

Comments for Public Posting: Shelters in LA are in such a state of crisis that homeless animals are being turned away, and dogs are being held in filthy cages, left for months without being taken on a walk. We desperately need, as a very bare minimum, a mandatory moratorium on breeding permits, to help the animals in this city. Please pass and implement this moratorium as quickly as possible, the animals and shelters need all the help they can get.
