**Comments for Public Posting:** Cost of health coverage continues to increase but not our City subsidi. Being on a fixed income and getting penalized when I turned 65 was not what I expected. To be forced to pay more because we have to pay for medicare Part B was a shock and on top of that to be faced with increase IRMA because I was thinking to sale my house to reduce my monthly expense. The message we get from this is that we need to go back to work to be able to pay for these new expenses. It is a shame I did not knew sooner. Now I would have to worked again to pay for Medicare Part B and subsequently I may have to pay also for IRMA because I may endup making more money. I thought when I retire, I did not have to work again. Please help. Can you at least increase the monthly health subsidi to pay for our entire medical coverage. This would only be a few hundred dollars to the City, but big difference to us the retiries. Thank you and have a good holidays.

**Comments for Public Posting:** As a retired City Employee, I respectfully urge the Honorable City Council Members to seriously consider increasing the IRMMA Subsidy to current and future retirees. As City Employees, we dedicate our careers to serve proudly our beloved City of LA and it's residents without seeking public recognition. But we do ask the City Council to reward our commitment and dedication by increasing the IRMMA subsidy to a fair and just amount worthy of its city employees' service to our beloved City. Thank you, God Bless you and God Bless our City of Los Angeles.
