**Comments for Public Posting:** This revelation about the potential impact of IRMAA on LACERS health care subsidies is deeply concerning. The scenario, where retirees face a substantial increase in health care costs while receiving only 2/3 of their working income, underscores the need for a thorough reevaluation of this program. The delayed awareness and retroactive billing described create an added layer of financial uncertainty for retirees. I hope that policymakers take swift action to address these issues and provide the necessary support for those who have dedicated their careers to public service.
