Comments for Public Posting: I live in Council District 5 and I'm writing to register my strong support for the speed cameras being set up in LA this year. The more of these cameras, the better! It's safer to have speeding tickets issued automatically by cameras than by police officers. Interactions with police officers can be unsafe for the police and for drivers. And multiple studies have shown that speed cameras issue citations more fairly than police officers do.

Comments for Public Posting: So happy to see these speed cameras finally moving forward throughout the City of LA! Speeding escalates the severity of collisions and needlessly increases traffic fatalities. For too long, people have been driving on city streets as if they were highways, and traffic enforcement for speeding/tickets has been too infrequent to significantly change driving behavior. Glad to see these pilot cameras being placed in areas on the High Injury Network where people have been disproportionately killed and injured by speeding (particularly pedestrians, equestrians, bicycles, and motorcycles). Looking forward to seeing the data at the end of this pilot program, and hopefully the corresponding decrease in speeding/fatalities will encourage the City to implement more of these cameras on dangerous corridors... I appreciate the City and LADOT's efforts to decrease speeding and bring down injury/fatality rates on the City's arterial streets...
