**Comments for Public Posting:** As someone who is living in LA without a car. I'm wholly in favor of this program. Car speed is the determining factor between an injury or fatal crash for people outside of cars. Limiting it would go a long way towards making it safer to not use a car in this city. I want these cameras everywhere they are feasible in LA. I'm very happy to see some particularly dangerous spots slated to possibly receive cameras. The two spots that stood out to me as places that would benefit from coverage are Wilshire between La Fayette Park Pl and Park View St and 6th St between Berendo and Vermont. I live near these spots and frequently find myself walking and biking through these areas and it is very common for me to see people driving way too fast through there. For the stretch of Wilshire that might get a camera there are a lot of children that are walking around there. Please install as many of these cameras as you can.
