Comments for Public Posting: I am a resident of CD11 who would be impacted by the cameras. I strongly oppose the speed cameras. We need less surveillance. Hire officers to work with their communities and not rely on surveillance equipment.

Comments for Public Posting: There are many places in CD8 where speeding is a problem. I can only speak in regards to Hoover between Florence and 76th Street. We have two crosswalks, but about 70% of of vehicles travel at a high speed of rate. Many drivers do not stop because they are going too fast and don't have enough time to slow down or are simply careless. I've witness and been in situations where I'm crossing the crosswalk with my children and other driver's do not stop. There's also been fatalities due to this. Another concern is that many vehicles in this area are unregistered or do not have license plates and due to the lack of enforcement are allowed to continue to operate. How will these individuals be held accountable in this situation? Another area of concern is Figueroa Street. With the amount of prostitution taking place, there are several individuals driving and speeding recklessly through the community. Many neighborhoods could benefit from having cameras installed in more residential areas.

Comments for Public Posting: We need this system all over LA if the City is unable to recruit traffic officers. Speeding is a huge safety issue for our residents. Please consider Havenhurst Ave south of Ventura Blvd. All the way up to Calneva. This is residential area but has an enormous amount of commuter cut through traffic. Cars travel 50-60 miles an hour up this residential street and safety measures should be put in place. Also consider Sepulveda Blvd. Between Ventura Blvd & Sunset, also a death trap.

Comments for Public Posting: I am a resident near 18th St and Fairfax Ave. I am writing to formally request that this segment be included in the Speed Safety System Pilot. This street acts as a high-speed feeder to the 10 Freeway and is directly adjacent to school zones (LACES/Crescent Heights). Residents face extreme danger when exiting driveways due to 'freeway-mindset' speeding. We need automated enforcement to protect this school-adjacent corridor.
