Comments for Public Posting: Hello, I serve on the P.I.C.O.NC but I write these cimments as an individual. Every time I am out and about as a pedestrian or as a bicyclist, I am amzed and apalled how fast people drive. How they make right hand turns on red with no apparent acknowledgement that a vulnerable, easily squishable pedestrian is trying to get across the street too. At least when I'm on my bike I'm a tiny bit better off --my bike is equipped with a horn that is as loud as that of a car. But I am here today to ask why I need to have special equipment when LA could install speed cameras allowed by a law that some of us worked so hard to get passed. Please install these cameras ASAP. Every day soft squishable human bodies come into contact with speeding hard steel missiles, piloted by sometimes angry, sometimes tired, sometimes impaired drivers. I crave to live in a Helsinki, where they reached zero traffic deaths this year. Sure my LA is ever bit as good as Helsinki. We have better weather, too. Please act. Thank you.

Comments for Public Posting: Greetings! As a cyclist in LA, I'm concerned about my own safety and those of other cyclists (especially since we should be encouraging that form of transportation in our bust city). I believe that automated speed enforcement is proven. The presence of cameras can reduce speeding of 10+ mph by 62%, greatly lowering the likelihood of serious injury or death. Please do what you can to help push this along and start offering additional steps towards bike safety. AB 645 requires LA to complete several steps before cameras can be activated—including adopting a Use Policy, completing an Impact Report, conducting community outreach, and issuing warning notices for 60 days before fines can begin. Let's please finalize these steps now before more people get hurt. Every day without enforcement costs lives, especially among our most vulnerable road users—our oldest and youngest community members, pedestrians, and cyclists. We must move forward with implementing this program as soon as possible. Thank you for your time and consideration, Jason Palmer

Comments for Public Posting: LADOT report relative to an update on the work plan to implement an Automated Speed Enforcement Program I support this item, but regret how long this is taking, and are concerned that the timeline is again extended Other cities like San Francisco & DC are already live with their speed camera program; we must implement speed cameras faster in Los Angeles to save lives.

Comments for Public Posting: I support this item, but due to lack of political courage, it seems that the council is slow-walking implementation on this. They need to get their ducks in a row and fast. People are dying every day because of their lack of courage on this issue.

Comments for Public Posting: It is amazing that there is a speed camera enforcement program, but there needs to be more progress on installing the cameras. Everyday the city does not take action, there are more innocent victims being hit by cars. This would be the least we can do, and there can be more pedestrian safety infrastructure and bike lanes. There are speed cameras in other cities which have reduced speeds and increase safety on the streets.

Comments for Public Posting: This should have been implemented already. LA needs to stop dragging its feet and start caring about it's citizens.
