Comments for Public Posting: I live in Koreatown, zip code 90005. I support the weekend pilot program to close 6th Street to car traffic, from Normandie Avenue to South Catalina Street. Ktown lacks park space and having a plaza in the middle of the neighborhood for residents is necessary.

Comments for Public Posting: How has it taken us this long to get these installed? This is truly a massive oversight and we should do everything in our power to streamline the installation of this pilot program which will already take years to conduct and then years more to pass and implement statewide. At this rate, it will be 2040 before this program is completely (statewide) implemented and we might even be done with the Sepulveda Line or the K line extension before we have cameras installed. Please prioritize this important low hanging fruit. Speeding is a massive issue in this city and a huge reason why our collisions are so fatal.
