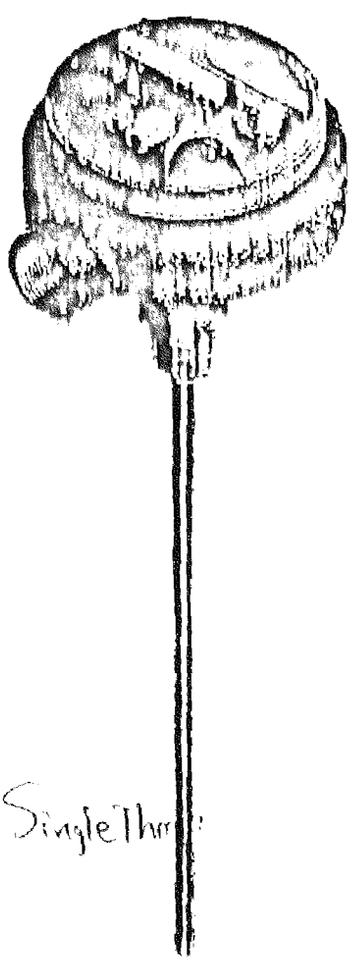
MAGNETROL introduces the



KOTRON™

TIP SENSITIVE LEVEL CONTROL

THE KOTRON TIP SENSITIVE LEVEL CONTROL:

- Is an economical answer for an integral point sensor in liquids, slurries, and dry/bulk material applications.
- Can be field modified from the 14" standard length to a minimum of 4".
- Functions in operating pressures up to 5000 PSI.
- Features circuitry which reduces effect of material build-up on the sensing probe. For questionable applications, consult factory.

PRINCIPLE OF OPERATION

The Kotron Tip Sensitive Level Control detects the presence of materials on the sensing probe and actuates a control relay.

STANDARD FEATURES

- Explosion proof (NEMA 7/9) epoxy painted enclosure.
- Choice of three input voltages:
  - 115 VAC
  - 230 VAC
  - 24 VDC
- 14" 316 Stainless Steel probe, adjustable to 4".
- Operating pressure/temperature:
  5000 PSI @ −40°F to 160°F (−40°C to 71°C).
- Dielectric constant as low as 2.0.
- 5 amp SPST relay. (Reversible w/ jumper wire) Single Pulse Single Thr
- Field selectable failsafe jumper wire.

The *real* level control is a MAGNETROL.

OUR SERVICE POLICY

Owners of Magnetrol units may request to return a control or any part of a control for complete rebuilding or replacement. It will be rebuilt or replaced promptly. If, once returned, the underlying cause of the trouble is found to be defective material or workmanship (within the warranty period), the item will be either rebuilt, or replaced completely, without charge on an F.O.B. factory basis. If the trouble is the result of conditions beyond our control or is not covered by our warranty there will be a charge for labor and a charge for parts required to rebuild or replace the item.

In some cases it may be expedient to ship new parts or in extreme cases, a complete new control to replace the original before it is returned. If this is desired, inform us as to what parts are needed, the model number and the serial number of the control and repair part number. Credit for materials returned in such cases will be determined on the basis of the applicability of our warranty.

No claims for labor or consequential damage will be allowed.

RETURN MATERIAL PROCEDURE

So that we may efficiently process any materials that are returned, it is essential that a "Return Material Authorization" tag be obtained from the factory for attachment to the goods. This is available through Magnetrol's local representative or by writing directly to the factory supplying the following information:

1. Installation Name
2. Description of Material
3. Production Number
4. Serial Number
5. Reason for Return
6. Desired Action

All shipments returned to the factory must be by Prepaid transportation.

All replacements will be shipped F.O.B. factory.

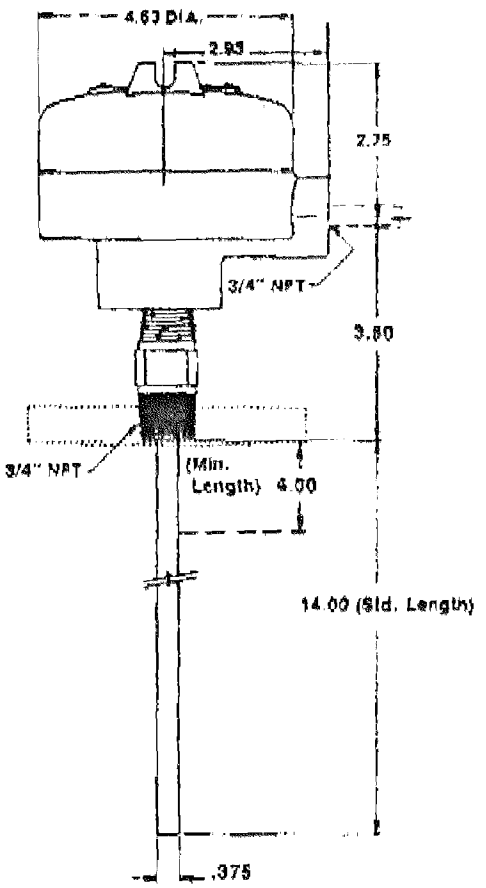
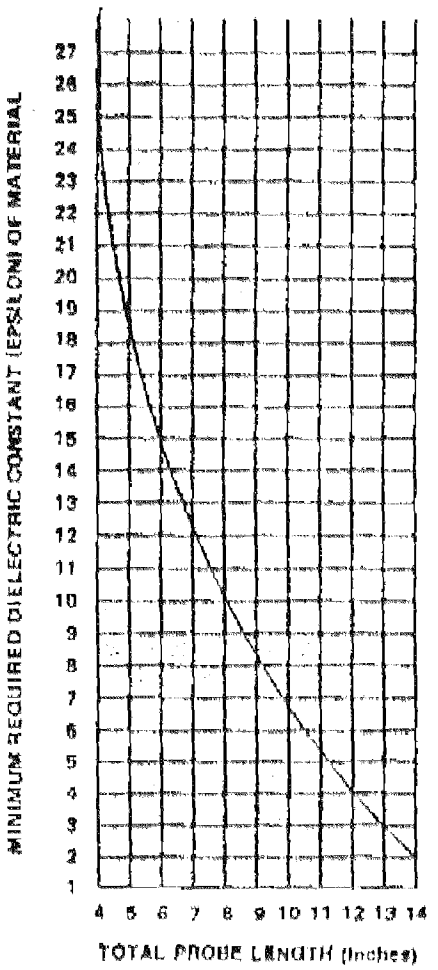
SELECTION DATA

Model Number	Voltage	Current
80-7032-302	115 VAC	Less Than .055 Amp.
80-7032-312	230 VAC	Less Than .035 Amp.
80-7032-322	24 VDC	Less Than .030 Amp.



Specifications subject to change without notice.

VARIABLE PROBE LENGTH



At the 14" standard length, the probe will operate in any material with a dielectric constant above 2.0. If necessary, the probe length may be shortened to as little as 4". Care must be taken to insure that the probe is not shortened beyond the minimum required for a particular dielectric constant. Refer to the chart below for these minimums.

PRODUCT WARRANTY

All Magnetrol level and flow controls are warranted free of defects in materials or workmanship for five full years from the date of original factory shipment. Printed circuit boards utilized in electronic controls are warranted for a period of two years from the date of shipment.

Magnetrol International will repair or replace the defective material after factory inspection of the control at no cost to the purchaser (or owner) other than transportation of the control.

Magnetrol shall not be liable for labor claims, direct or consequential damage or expense arising from the installation or use of the equipment.

INSTRUCTION MANUAL and PARTS LIST FOR KOTRON™ TIP SENSITIVE LEVEL CONTROL

DESCRIPTION

Kotron Tip Sensitive level controls can be utilized in liquid or bulk material applications. There are no moving parts in contact with the medium. These units are integral systems with the sensing probe mounted with the electronics.

OPERATING PRINCIPLE

As the medium covers the sensing probe, a pulse waveform generated by the electronics is altered, changing the relay contact position. As the medium drains from the sensing probe, the relay reverses.

MODEL IDENTIFICATION

80-7032-3□2

80 = Point Sensor
70 = NEMA 7/9 Housing, Cast Aluminum, Epoxy Painted
3 = Kotron Circuitry
Voltage
0 = 120 VAC
1 = 240 VAC
2 = 24 VDC

INSTALLATION

UNPACKING

Unpack the instrument carefully. Make sure all components have been removed from the foam protection. Inspect all components for damage. Report any concealed damage to the carrier within 24 hours. Check the contents of the packing slip and report any discrepancies to Magnetrol.® Check the nameplate model number to be sure it agrees with the packing slip and purchase order. Check and record the serial number for future reference when ordering parts.

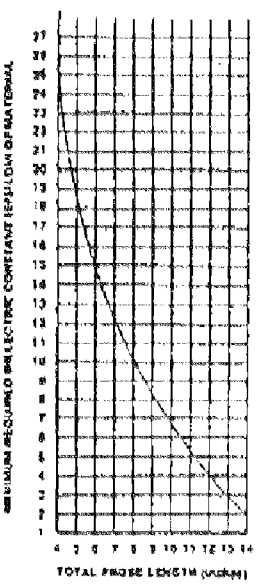
PRELIMINARY OPERATIONAL CHECK

After unpacking and before installation, perform the following operational check on the unit in a non-hazardous area.

1. Fill a suitable grounded container with water.
2. In a non-hazardous area, power the unit with proper voltage.
3. Dip the probe in the water. The relay should actuate.
4. Withdraw the probe from the water. The relay should deactivate.

If the unit performs as described above, it is operating properly. In case of malfunction, consult Calibration procedure or Troubleshooting sections on page 3 of this manual.

INSTALLATION LOCATION



Kotron point sensors should be located to allow for easy access for service, calibration and monitoring. Units should not be exposed to ambient temperatures above 160°F or below −40°F. Special precaution should be taken to prevent exposure to corrosive atmosphere, excessive vibration, shock or physical damage.

Sensing probes should be located close to the tank wall for greatest sensitivity. Probes should be isolated from severe motion in the tank; because, surface turbulence may cause signal deviation. Contact Magnetrol for stilling well design or other means to prevent deviation.

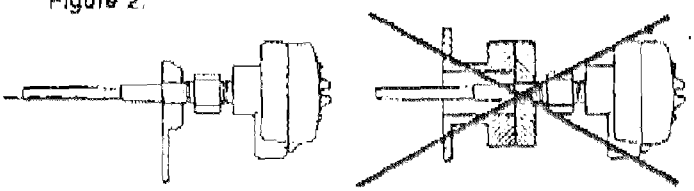
CAUTION: This unit contains CMOS electronics which may be damaged by static electricity. Do not touch any semiconductor devices unless you are properly grounded.

PROBE LENGTH

If the geometry of your application requires a probe shorter than 14", consult Figure 1.

PROBE LENGTH VS. DIELECTRIC CONSTANT

Figure 1



A minimum probe length of 4" is permissible in a conductive liquid (dielectric of 24 or greater). The full length should be maintained in a non-conductive liquid or bulk material.

INSTALLATION CONT.

MOUNTING

Tip Sensitive Point Sensors are shipped assembled to the probe. They may be installed in a:

a. **Horizontal Mounting:** Unit will signal at probe level. See Figure 2.

Correct Horizontal Mounting — Incorrect Horizontal Mounting

Figure 2

CAUTION: Do NOT horizontally mount the unit in a nozzle. See Figure 2. The medium may build up in the nozzle and cause false actuation.

b. **Vertical Mounting:** As medium rises on the probe, unit will signal at a point determined by the calibration of the unit and the dielectric constant of the medium. In most conductive media, the actuation point will be at the tip of the probe over a wide range of zero calibrations. See Figure 3.

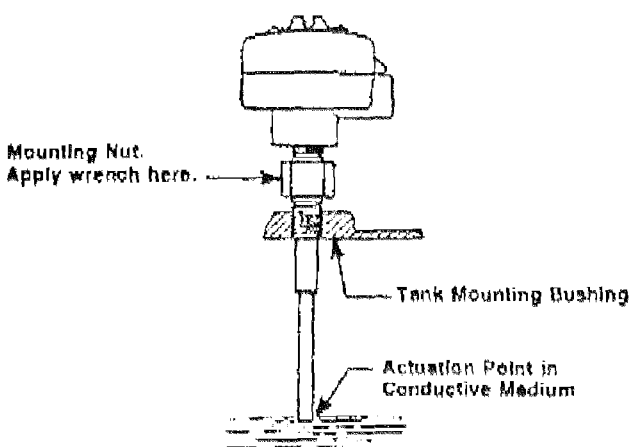


Figure 3

INSTALLATION INSTRUCTIONS

1. Thread amplifier assembly into mounting bushing on tank using suitable pipe compound or thread tape. Assembly may also be bolted to a flange with a suitable gasket.
2. Tighten securely, being certain that the wrench is applied **ONLY** to the mounting nut. See Figure 3.

WIRING

All power and control connections are made at the terminal strip within the amplifier enclosure. 18 AWG wire is recommended for power and control circuits.

NOTE: Observe all local electrical codes and proper wiring procedures.

1. Make sure the power source is turned off.
2. Unscrew and remove housing cover.
3. Pull power supply and control wires through conduit connection.
4. Connect power leads to applicable AC or DC terminals as marked. See Figure 4.

WIRING cont.

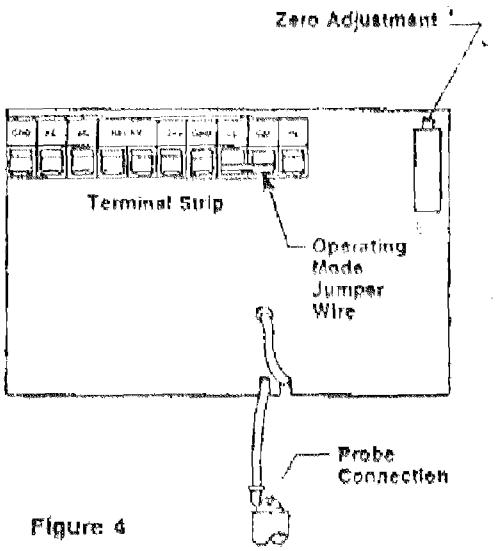

Figure 4

5a. Connect control circuit leads to relay terminals. See Figure 4. Make sure the load to be controlled is within the relay's rated capacity.

b. Dress wiring to guard against interference or contact with cover or circuit board components.

6. Prevent moisture seepage into the housing by installing an approved seal-drain fitting in the conduit run leading to the unit.

7. Select operating mode. (Refer to Operating Mode Selection below for detailed information.) Make sure that the operating mode jumper wire is in the correct position for your selection. See Figure 4.

   NOTE: This unit is factory supplied with the jumper wire connecting LL and CM.

8. *CAUTION: In hazardous areas, do not power the unit until the conduit is sealed and enclosure cover is screwed down securely.*

9. Installation is complete. Replace housing cover.

OPERATING MODE SELECTION

Low Level (LL) - means tank material below the set point.
High Level (HL) - means tank material above the set point.
Loss of power - The relay contact will open in all mode selections. Relay contact will remain open until power is restored. It will then assume a condition in accordance with the selection table below.

CAUTION: Connecting terminals LL and HL will damage the unit.

Line Power	Material Level	Operating Mode Jumper Wire	
		CM to LL	CM to HL
On	Below Set Pt.	Contacts Closed	Contacts Open
	Above Set Pt.	Contacts Open	Contacts Closed
Fail	Below Set Pt.	Contacts Open	Contacts Open
	Above Set Pt.	Contacts Open	Contacts Open

Example: Application requires relay contacts open on level rise for Hi Level alarm. Connect relay mode jumper wire to terminals CM and LL.

PAGE.005 JUN 28 '88 15:45 FROM MAGNETROL IL

CALIBRATION

CAUTION: **For Hazardous Locations** - *Extra precautions must be taken during instrument calibration. Before ousing cover is removed, power* **MUST** *be turned off.*

1. Turn on power to the instrument.
2. Remove housing cover.
3. Set point location:
   a. **Conductive media:** The set point is located at the tip of the probe. Calibration is not required for most conductive liquids. If the unit does not switch on alarm test, then proceed to Step 4.
   b. **Non-conductive media:** The set point is located on the probe at a point determined by media conductivity. See Figure 1. Calibration is required. Proceed to Step 4.

NOTE: An Ohm meter, or other indicating device, connected across the relay terminals will indicate switch change with level change simplifying the calibration procedure.

4. Calibration Procedure:
   a. **High level alarm** (See Operating Mode Selection Chart for proper jumper wire connection).
      - With no material on probe, turn zero adjustment control fully counterclockwise (CCW) 20 turns. See Figure 4.
      - Slowly turn clockwise (CW) until relay contact changes.
      - The unit is now calibrated. The relay contact will change state when the material rises on the probe.
   b. **Low level alarm** (See Operating Mode Selection Chart for proper jumper wire connection).
      - With material covering the probe, turn zero adjustment control fully clockwise (CW) 20 turns. See Figure 4.
      - Slowly turn counterclockwise (CCW) until relay contact changes.

        NOTE: The calibration adjustment is more critical in low dielectric media than in high dielectric media. Care must be taken to turn the zero adjustment control just enough to deactivate the alarm. If it is adjusted even ¼ turn beyond the set point, the zero adjustment band will be out of the operational range.
      - The unit is now calibrated. The relay contact will change state when the material falls below the probe.
5. Replace housing cover.
6. Bring material to alarm condition and check for relay contact change.

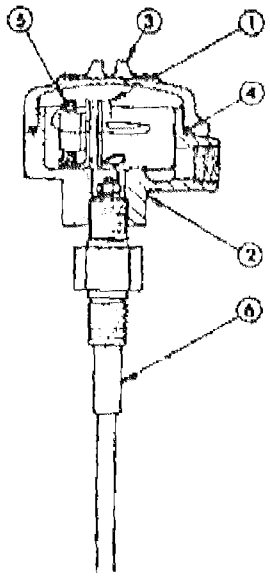
TROUBLESHOOTING

CAUTION: In hazardous areas do not remove housing until power is disconnected and atmosphere is determined to be safe.

NO SIGNAL WITH LEVEL CHANGE

1. Check power and control circuit wiring.
2. Check calibration.
3. Check jumper wire position.
4. Check length of probe against chart in Figure 1 on Page 1.
5. Check ground system. Unit must be grounded to calibrate properly. If mounted in non-metal tank, run grounding strap from mounting nut to earth ground.

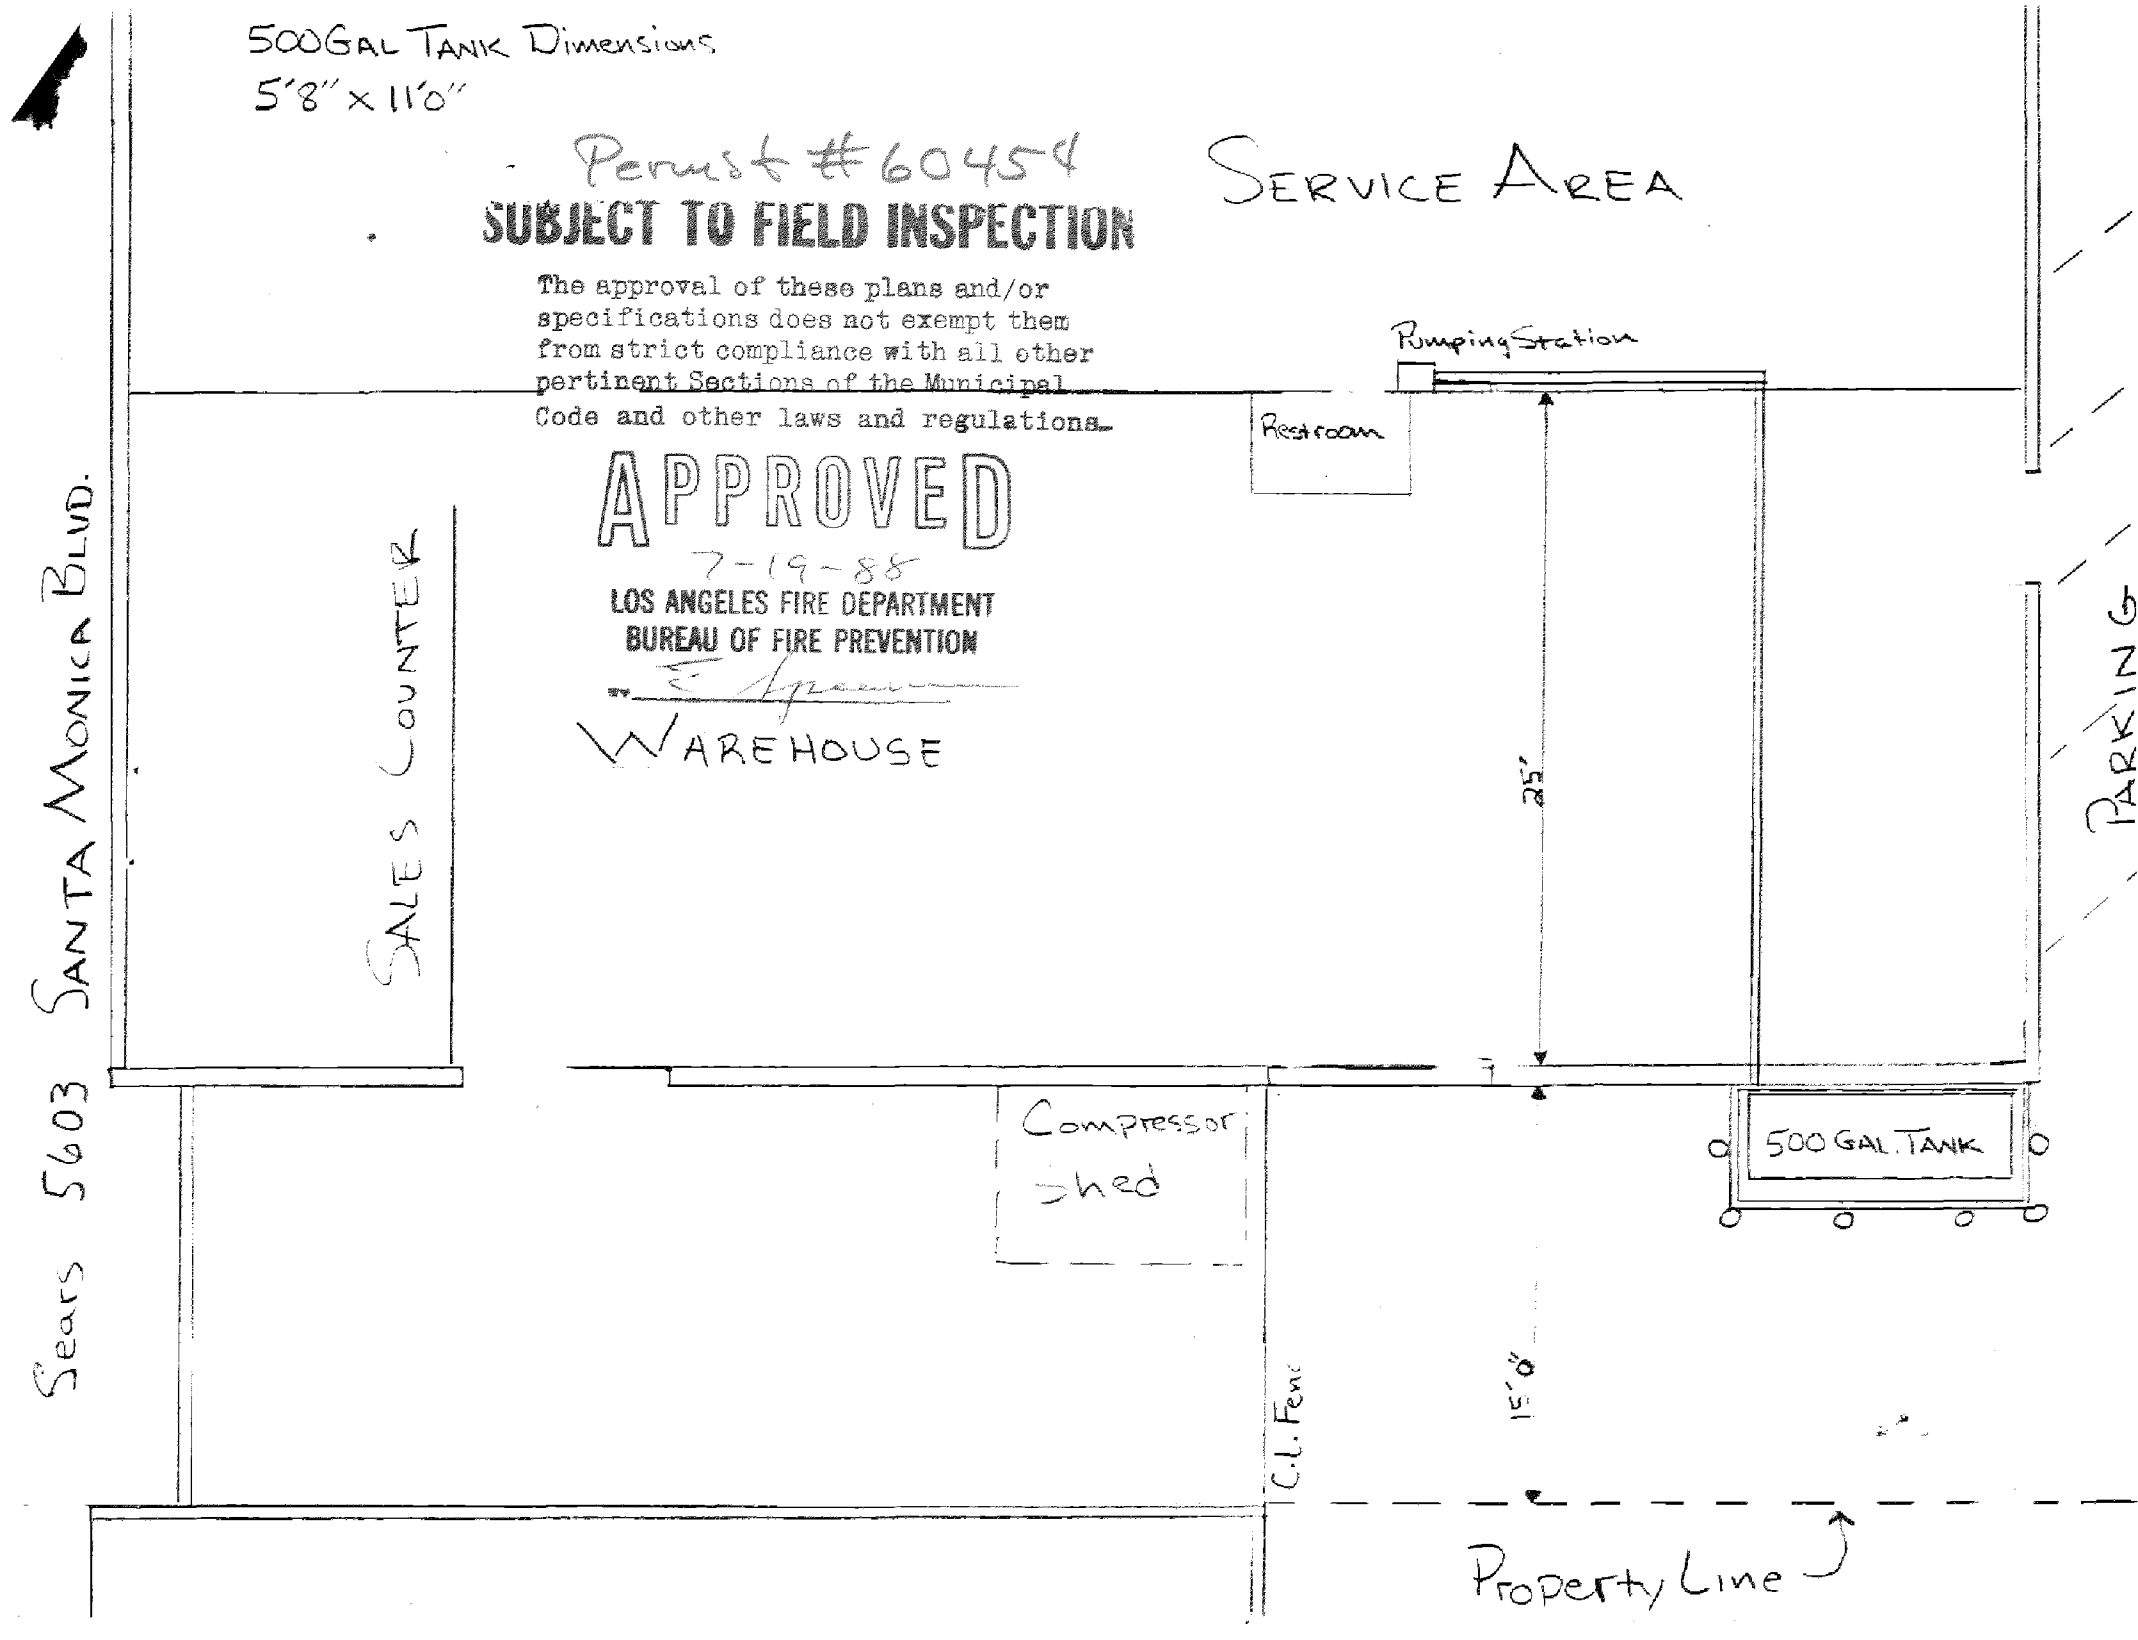
NOTE: If remedies above are unsuccessful, consult factory.



SWITCH CHATTER

1. Check for low voltage.
2. Check ground system.
3. Check for turbulence. Relocate probe or isolate from turbulence.

RELAY WILL NOT RESET



1. Check probe for build-up or fouling. Clean and recalibrate.

Search

Whether you are in a high risk zone or not, you may need flood insurance (https://www.fema.gov/national-flood-insurance-program) because most homeowners insurance doesn't cover flood damage. If you live in an area with low or moderate flood risk, you are 5 times more likely to experience flood than a fire in your home over the next 30 years. For many, a National Flood Insurance Program's flood insurance policy could cost less than $400 per year. Call your insurance agent today and protect what you've built.

Learn more about steps you can take (https://www.fema.gov/what-mitigation) to reduce flood risk damage.

BY: FIRST AMERICAN TITLE COMPANY
3281 E. GUASTI ROAD, SUITE 440
ONTARIO, CA 91761
(909) 510-6225

COMMITMENT NO.: NCS-678657-LA2
TITLE OFFICER: WENDY HAGEN BOWEN
DATED: JULY 30, 2015

THE FOLLOWING ITEMS WERE FOUND IN SAID COMMITMENT AND ARE REFERENCED ON THIS MAP. COVENANTS, CONDITIONS, RESTRICTIONS, TERMS AGREEMENTS AND MATTERS LISTED HEREON CONTAIN NUMEROUS ITEMS THAT AFFECT THE SUBJECT PROPERTY, CONTENTS MUST BE REVIEWED TO DISCERN SPECIFICS.

(3) COVENANTS, CONDITIONS, RESTRICTIONS AND EASEMENTS RECORDED IN BOOK 4044, PAGE 227 OF DEEDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(4) AN EASEMENT FOR POWER LINES AND INCIDENTAL PURPOSES RECORDED IN BOOK 2489, PAGE 231 OF OFFICIAL RECORDS. THIS ITEM APPEARS TO AFFECT THE SUBJECT PROPERTY, BUT THE EXACT LOCATION CAN NOT BE DETERMINED DUE TO SUPPORTIVE TRACT MAP NOT BEING AVAILABLE AT TIME OF SURVEY.

(5) AN EASEMENT FOR ALLEY RECORDED IN BOOK 4800, PAGE 341 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.

(6) AN EASEMENT FOR ALLEY AND INCIDENTAL PURPOSES RECORDED IN BOOK 9578, PAGE 358 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.

(7) AN OIL AND GAS LEASE RECORDED OCTOBER 19, 1956 AS INSTRUMENT NO. 3090 IN BOOK 52627, PAGE 273 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(8) AN EASEMENT FOR POWER LINES AND INCIDENTAL PURPOSES RECORDED JUNE 29, 1961 AS INSTRUMENT NO. 3460 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.

(9) AN OIL AND GAS LEASE RECORDED APRIL 2, 1969 AS INSTRUMENT NO. 2706 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE OVER PARCEL 13 PER T.R. AND IS NOT PLOTTED HEREON.

(10) AN OIL AND GAS LEASE RECORDED JUNE 3, 1969 AS INSTRUMENT NO. 3077 IN BOOK M3225, PAGE 786 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE OVER PARCEL 10 PER T.R. AND IS NOT PLOTTED HEREON.

(11) AN OFFER OF DEDICATION FOR PUBLIC STREET, ROAD AND HIGHWAY RECORDED MARCH 21, 1972 AS INSTRUMENT NO. 2936 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.

(12) MATTERS CONTAINED IN DOCUMENT ENTITLED "RELEASE OF INTEREST", RECORDED MARCH 23, 1972 AS INSTRUMENT NO. 2961 OF OFFICIAL RECORDS. THIS ITEM AFFECTS PARCELS 2 AND 3 PER T.R.

(13) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED APRIL 14, 1972 AS INSTRUMENT NO. 4346 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE OVER PARCEL 6 PER T.R. AND IS NOT PLOTTED HEREON.

(14) AN EASEMENT FOR POWER LINES AND CONDUITS AND INCIDENTAL PURPOSES RECORDED JUNE 2, 1972 AS INSTRUMENT NO. 2882 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT THE EXACT LOCATION CAN NOT BE DETERMINED DUE TO DOCUMENT BEING ILLEGIBLE AND IS NOT PLOTTED HEREON.

(15) A WAIVER OF CLAIMS FOR DAMAGES BY REASON OF THE LOCATION, CONSTRUCTION, LANDSCAPING OR MAINTENANCE OF A CONTIGUOUS FREEWAY, HIGHWAY, ROADWAY OR TRANSIT FACILITY RECORDED DECEMBER 13, 1972 AS INSTRUMENT NO. 2362 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE OVER PARCEL 2 PER T.R. AND IS NOT PLOTTED HEREON.

(16) THE FACT THAT THE SUBJECT PROPERTY LIES WITHIN THE BOUNDARIES OF THE HOLLYWOOD REDEVELOPMENT PROJECT AREA RECORDED MAY 9, 1986 AS INSTRUMENT NO. 86-581562 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(17) TERMS,PROVISIONS AND EASEMENTS CONTAINED IN DOCUMENT ENTITLED "CONSTRUCTION AND EASEMENT AGREEMENT", RECORDED OCTOBER 16, 2006 AS INSTRUMENT NO. 06-2291139 OF OFFICIAL RECORDS. THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.

(18) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED DECEMBER 6, 2006 AS INSTRUMENT NO. 06-2706305 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

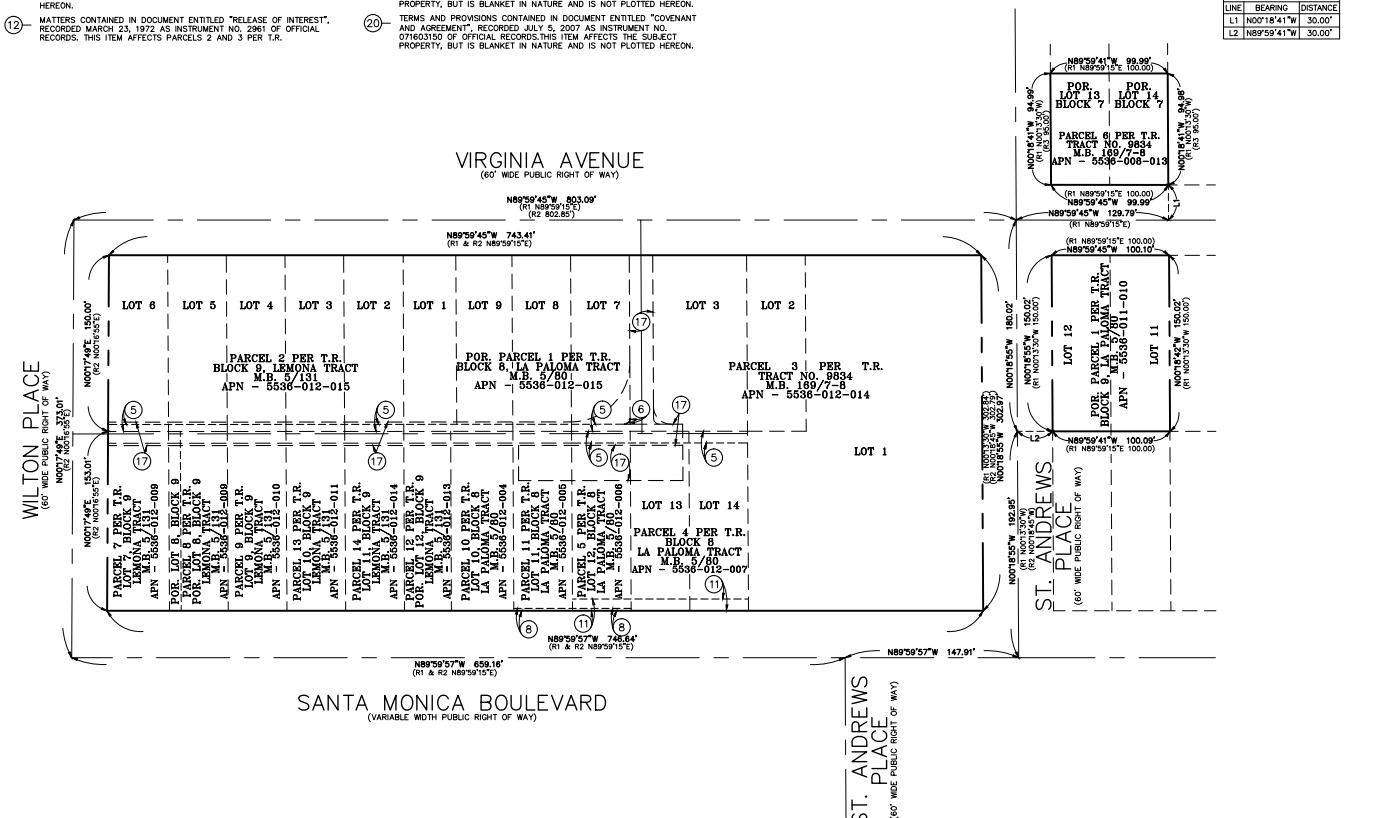
(19) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603149 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(20) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603150 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(21) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603151 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(22) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603152 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(23) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603153 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.



(24) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "COVENANT AND AGREEMENT", RECORDED JULY 5, 2007 AS INSTRUMENT NO. 071603154 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(25) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "MEMORANDUM OF SETTLEMENT AND CONDITIONAL LEASE SURRENDER AND MODIFICATION AGREEMENT", RECORDED JULY 12, 2007 AS INSTRUMENT NO. 20071660230 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

(26) TERMS AND PROVISIONS CONTAINED IN DOCUMENT ENTITLED "MEMORANDUM OF ENVIRONMENTAL CONDITIONS AGREEMENT", RECORDED JULY 12, 2007 AS INSTRUMENT NO. 07166231 OF OFFICIAL RECORDS.THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.

ITEMS #'S SHOWN HEREON ARE STATED AS EXCEPTIONS ON ABOVE REFERENCED COMMITMENT. NO RESPONSIBILITY FOR THE COMPLETENESS, ACCURACY, OR CONTENT OF SAID REPORT IS ASSUMED BY THIS MAP.

Commitment

Thank You for your confidence and support. We at First American Title Insurance Company maintain the fundamental principle:

Customer First!

First American Title Insurance Company

INFORMATION

The Title Insurance Commitment is a legal contract between you and the company. It is issued to show the basis on which we will issue a Title Insurance Policy to you. The Policy will insure you against certain risks to the land title, subject to the limitations shown in the policy.

The Company will give you a sample of the Policy form, if you ask.

The Commitment is based on the land title as of the Commitment Date. Any changes in the land title or the transaction may affect the Commitment and the Policy.

The Commitment is subject to its Requirements, Exceptions and Conditions.

This information is not part of the title insurance commitment.

TABLE OF CONTENTS

YOU SHOULD READ THE COMMITMENT VERY CAREFULLY.
If you have any questions about the Commitment,
please contact the issuing office.

COMMITMENT FOR TITLE INSURANCE

Issued by

First American Title Insurance Company

Agreement to Issue Policy

We agree to issue a policy to you according to the terms of this Commitment.

When we show the policy amount and your name as the proposed insured in Schedule A, this Commitment becomes effective as of the Commitment Date shown in Schedule A.

If the Requirements shown in this Commitment have not been met within six months after the Commitment Date, our obligation under this Commitment will end. Also, our obligation under this Commitment will end when the Policy is issued and then our obligation to you will be under the Policy.

Our obligation under this Commitment is limited by the following:

The Provisions in Schedule A.

The Requirements in Schedule B-1.

The Exceptions in Schedule B-2.

The Conditions.

This Commitment is not valid without Schedule A and Sections 1 and 2 of Schedule B.

SCHEDULE A

1. Commitment Date: January 08, 2020 at 7:30 A.M.

2. Policy or Policies to be issued: Amount

   (A) ALTA Loan Policy $To Be Determined
   ALTA Extended Loan Policy

   Proposed Insured:

   To Be Determined

3. (A) The estate or interest in the land described in this Commitment is:

   FEE

   (B) Title to said estate or interest at the date hereof is vested in:

   5544 Virginia Ave Owner, LLC, a Delaware Limited Liability Company

4. The land referred to in this Commitment is situated in the City of Los Angeles, County of Los Angeles, State of California, and is described as follows:

   LOTS 11 AND 12 IN BLOCK 9 OF LA PALOMA TRACT, IN THE CITY OF LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 5, PAGE 80 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

   APN: 5536-011-010

SCHEDULE B

SECTION ONE

REQUIREMENTS

The following requirements must be met:

(A) Pay the agreed amounts for the interest in the land and/or the mortgage to be insured.

(B) Pay us the premiums, fees and charges for the policy.

(C) Documents satisfactory to us creating the interest in the land and/or the mortgage to be insured must be signed, delivered and recorded.

(D) You must tell us in writing the name of anyone not referred to in this Commitment who will get an interest in the land or who will make a loan on the land. We may then make additional requirements or exceptions.

(E) Releases(s) or Reconveyance(s) of Item(s): None

(F) Other: None

(G) You must give us the following information:
1. Any off record leases, surveys, etc.
2. Statement(s) of Identity, all parties.
3. Other: None

The following additional requirements, as indicated by "X", must be met:

[X] (H) Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[] (I) An ALTA/ACSM survey of recent date, which complies with the current minimum standard detail requirements for ALTA/ACSM land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[X] (J) The following LLC documentation is required:
(i) a copy of the Articles of Organization
(ii) a copy of the Operating Agreement, if applicable
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Company Consent to the current transaction

[] (K) The following partnership documentation is required **:**
(i) a copy of the partnership agreement, including all applicable amendments thereto
(ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iii) express Partnership Consent to the current transaction

[] (L) The following corporation documentation is required:
(i) a copy of the Articles of Incorporation
(ii) a copy of the Bylaws, including all applicable Amendments thereto
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Corporate Resolution consenting to the current transaction

[**X**] (M) Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met:

Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

[] (N) A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

[X] (O) Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

[] (P) Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:

[] (Q) The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

[] (R) Financial statements from the appropriate parties must be submitted to the Company for review.

[] (S) A copy of the construction contract must be submitted to the Company for review.

[] (T) An inspection of the land must be performed by the Company for verification of the phase of construction.

[] (U) The Company's "Mechanic's Lien Risk Addendum" form must be completed by a Company employee, based upon information furnished by the appropriate parties involved.

SCHEDULE B

SECTION TWO

EXCEPTIONS

Any policy we issue will have the following exceptions unless they are taken care of to our satisfaction. The printed exceptions and exclusions from the coverage of the policy or policies are set forth in Exhibit A attached. Copies of the policy forms should be read. They are available from the office which issued this Commitment.

1. General and special taxes and assessments for the fiscal year 2020-2021, a lien not yet due or payable.

1A General and special taxes and assessments for the fiscal year 2019-2020.

First Installment:	$10,067.86, PAID
Penalty:	$0.00
Second Installment:	$10,067.86, OPEN
Penalty:	$0.00
Tax Rate Area:	00200
A. P. No.:	5536-011-010

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. An easement for power lines and incidental purposes in the document recorded as Book 2489, Page 231 of Official Records.

4. An easement for power lines and incidental purposes in the document recorded June 29, 1961 as Instrument No. 3460 of Official Records.

5. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded December 06, 2006 as Instrument No. 06-2706305 of Official Records.

6. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603149 of Official Records.

7. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603150 of Official Records.

8. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603151 of Official Records.

9. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603152 of Official Records.

10. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603153 of Official Records.

11. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded July 05, 2007 as Instrument No. 20071603154 of Official Records.

12. Water rights, claims or title to water, whether or not shown by the public records.

13. Rights of parties in possession.

14. The terms and provisions contained in the document entitled "Master Covenant and Agreement" recorded November 04, 2016 as Instrument No. 20161376292 of Official Records.

15. The terms and provisions contained in the document entitled "Master Covenant and Agreement" recorded November 04, 2016 as Instrument No. 20161376403 of Official Records.

16. The terms and provisions contained in the document entitled "Master Covenant and Agreement" recorded November 09, 2016 as Instrument No. 20161400998 of Official Records.

17. The terms and provisions contained in the document entitled "Master Covenant and Agreement" recorded November 22, 2016 as Instrument No. 20161468535 of Official Records.

18. The terms and provisions contained in the document entitled "Master Covenant and Agreement" recorded November 22, 2016 as Instrument No. 20161468537 of Official Records.

19. An agreement or covenant to hold land as one parcel recorded September 08, 2017 as Instrument No. 2017-1019915 of Official Records.

20. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

*****To obtain wire instructions for deposit of funds to your escrow file please contact your Escrow Officer.******

CONDITIONS

1. **DEFINITIONS**
(a)"Mortgage" means mortgage, deed of trust or other security instrument.
(b)"Public Records" means title records that give constructive notice of matters affecting the title according to the state law where the land is located.

2. **LATER DEFECTS**
The Exceptions in Schedule B - Section Two may be amended to show any defects, liens or encumbrances that appear for the first time in the public records or are created or attached between the Commitment Date and the date on which all of the Requirements (a) and (c) of Schedule B - Section One are met. We shall have no liability to you because of this amendment.

3. **EXISTING DEFECTS**
If any defects, liens or encumbrances existing at Commitment Date are not shown in Schedule B, we may amend Schedule B to show them. If we do amend Schedule B to show these defects, liens or encumbrances, we shall be liable to you according to Paragraph 4 below unless you knew of this information and did not tell us about it in writing.

4. **LIMITATION OF OUR LIABILITY**
Our only obligation is to issue to you the Policy referred to in this Commitment, when you have met its Requirements. If we have any liability to you for any loss you incur because of an error in this Commitment, our liability will be limited to your actual loss caused by your relying on this Commitment when you acted in good faith to:

comply with the Requirements shown in Schedule B - Section One
or
eliminate with our written consent any Exceptions shown in Schedule B - Section Two.

We shall not be liable for more than the Policy Amount shown in Schedule A of this Commitment and our liability is subject to the terms of the Policy form to be issued to you.

5. **CLAIMS MUST BE BASED ON THIS COMMITMENT**
Any claim, whether or not based on negligence, which you may have against us concerning the title to the land must be based on this commitment and is subject to its terms.

First American Title

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet.

In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.

There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.

FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970
WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant, (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).
4. Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970
WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992
WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy;
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
(ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
(iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
(a) to timely record the instrument of transfer; or
(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
(a) created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or

(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
(ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
(a) to timely record the instrument of transfer; or
(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   (a) and use
   (b) improvements on the land
   (c) and division
   (d) environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date
   (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking
3. Title Risks:
   (a) that are created, allowed, or agreed to by you
   (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
   (c) that result in no loss to you
   (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998

Covered Risks 14 (Subdivision Law Violation). 15 (Building Permit). 16 (Zoning) and 18 (Encroachment of boundary walls or fences) are subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
   This exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This exclusion does not limit the coverage described in Covered Risk 11 or 18.

12. THIRD GENERATION EAGLE LOAN POLICY AMERICAN LAND TITLE ASSOCIATION EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (1/01/08)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions, or location of any improvement erected on the Land; (iii) the subdivision of land; or(iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b)Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or

expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters

   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

   (c) resulting in no loss or damage to the Insured Claimant;

   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or

   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.

5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.

6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is

   (a) a fraudulent conveyance or fraudulent transfer, or

   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

14. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 13 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

15. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006 EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters

(a) created, suffered, assumed, or agreed to by the Insured Claimant;

(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;

(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risks 9 and 10); or

(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors rights laws, that the transaction vesting the Title as shown in Schedule A, is

(a) a fraudulent conveyance or fraudulent transfer; or

(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.

5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

16. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 15 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of January 09, 2020 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

5601-5667 SANTA MONICA BLVD. (LA) OWNER, LLC, A DELAWARE LIMITED LIABILITY COMPANY, AS TO PARCELS 1 THROUGH 13;

5544 VIRGINIA AVE OWNER, LLC, A DELAWARE LIMITED LIABILITY COMPANY, AS TO PARCEL 14; AND

5545 VIRGINIA AVE OWNER, LLC, A DELAWARE LIMITED LIABILITY COMPANY, AS TO PARCEL 15

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2020-2021, a lien not yet due or payable.

1A. General and special taxes and assessments for the fiscal year 2019-2020.

First Installment:	$270,393.87, PAID
Penalty:	$0.00

A. P. No.:	5536-008-013

(Affects Parcel 15)

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

The Following Matters Affect Parcels 1 and 2:

3. An easement for power lines and incidental purposes in the document recorded as Book 2489, Page 231 of Official Records.

4. An easement affecting the portion of said land and for the purposes stated herein, and incidental purposes, condemned by final decree.
Purpose: Alley
Case No.: 160427, Superior Court
Recorded: In Book 4800, Page 341, Official Records

5. The fact that the land lies within the boundaries of the Hollywood Redevelopment Project Area, as disclosed by the document recorded May 09, 1986 as Instrument No. 86-581562 of Official Records.

6. The terms and provisions contained in the document entitled "Covenant and Agreement" recorded December 06, 2006 as Instrument No. 06-2706305 of Official Records.

7. The terms and provisions contained in the document entitled "Memorandum of Environmental Conditions Agreement" recorded July 12, 2007 as Instrument No. 20071660231 of Official Records.

8. Rights of parties in possession.

The Following Matters Affect Parcels 3 through 13:

9. An easement for power lines and incidental purposes in the document recorded as Book 2489, Page 231 of Official Records.

10. An easement affecting the portion of said land and for the purposes stated herein, and incidental purposes, condemned by final decree.

Purpose: Alley
Case No.: 160427, Superior Court
Recorded: In Book 4800, Page 341, Official Records
Affects: Parcels 3 and 4 and Parcels 6, 7, 8, 9, 10, 11, 12 and 13

11. An easement for alley and incidental purposes in the document recorded as Book 9578, Page 358 of Official Records.

(Affects Lot 7 of Parcel 3)

12. A subsurface oil and gas lease, executed by Frank D. Rosenberg and Beatrice Rosenberg, husband and wife as joint tenants as lessor and Union Oil Company of California, a California corporation as lessee, recorded October 19, 1956 as Instrument No. 3090 in Book 52627, Page 273 to 278 inclusive and Page 408 of Official Records, affecting the land lying below a depth of 500 feet from the surface thereof, without the right of surface entry.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

(Affects Parcel 11)

13. This item has been intentionally deleted.

14. A subsurface oil and gas lease, executed by William F. Stifter and Gerladine S. Stifter, husband and wife as lessor and Texaco, Inc., a Delaware corporation as lessee, recorded April 02, 1969 as Instrument No. 2706 of Official Records, affecting the land lying below a depth of 500 feet from the surface thereof, without the right of surface entry.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

(Affects Parcel 12)

15. A subsurface oil and gas lease, executed by Connecticut Mutual Life Insurance Company, a corporation as lessor and Texaco Inc., a Delaware corporation as lessee, recorded June 03, 1969 as Instrument No. 3077 in Book M3225, Page 786 of Official Records, affecting the land lying below a depth of 500 feet from the surface thereof, without the right of surface entry.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

(Affects Parcel 11)

16. An offer of dedication for public street, road and highway and incidental purposes, recorded March 21, 1972 as Instrument No. 2936 of Official Records.
To: City of Los Angeles

(Affects Parcels 6 and 7)

Said offer was accepted for public use by a resolution
Executed by: City of Los Angeles
Recorded: July 27, 1972, as Instrument No. 2927, Official Records

17. The matters contained in a document entitled "Release of Interest" recorded March 23, 1972, as Instrument No. 2961, of Official Records.

(Affects Parcels 4 and 5)

18. An easement for power lines and conduits and incidental purposes in the document recorded June 02, 1972 as Instrument No. 2882 of Official Records.

(Affects Lot 1 of Parcel 5)

(Affects Parcel 15)

82. Water rights, claims or title to water, whether or not shown by the public records.

83. Any claim that the Title is subject to a trust or lien created under The Perishable Agricultural Commodities Act, 1930 (7 U.S.C. §§499a, et seq.) or the Packers and Stockyards Act (7 U.S.C. §§181 et seq.) or under similar state laws.

84. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 5643 Santa Monica Boulevard, Los Angeles, CA.

   (Affects Parcels 1 through 13)

2. The property covered by this report is vacant land.

   (Affects Parcels 14 and 15)

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

4. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

5. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:

   A. WITH RESPECT TO A CORPORATION:
      1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
      2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
      3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
      4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
   B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
      1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
      2. A full copy of the partnership agreement and any amendments;
      3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;

4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:

1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) to be recorded in the public records;
2. A full copy of the partnership agreement and any amendment;
3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

D. WITH RESPECT TO A GENERAL PARTNERSHIP:

1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;
2. A full copy of the partnership agreement and any amendments;
3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.

E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:

1. A copy of its operating agreement and any amendments thereto;
2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
   (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
   (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

F. WITH RESPECT TO A TRUST:

1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
2. Copies of those excerpts from the original trust documents and amendments thereto which

designate the trustee and confer upon the trustee the power to act in the pending transaction.

3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.

G. WITH RESPECT TO INDIVIDUALS:

1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

The First American Corporation
First American Title Company
Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   (a) building; (d) improvements on the Land;
   (b) zoning; (e) land division; and
   (c) land use; (f) environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   (c) that result in no loss to You; or
   (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   (b) in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

Your Deductible Amount	**Our Maximum Dollar Limit of Liability**
Covered Risk 16: 1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18: 1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19: 1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21: 1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   (a) and use
   (b) improvements on the land
   (c) and division
   (d) environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date
   (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking

3. Title Risks:
   (a) that are created, allowed, or agreed to by you
   (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
   (c) that result in no loss to you
   (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement erected on the Land;
      iii. the subdivision of land; or
      iv. environmental protection;

      or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b.Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

1.0 EXECUTIVE SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for CIM Group ("the Client") at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California (the Site). The Site consists of approximately 5.43 acres of land currently developed with vacant commercial buildings, including a former department store, several former retail shops, a former automobile repair facility, and asphalt paved parking lots. The Site is divided into three separate lots, Lot 1, Lot 2, and Lot 3 as shown in Figure 3 with inspection details of the former Sears auto center shown in Figure 4.

Our review indicates that the Site was initially developed in the early 1900s for residential development. By 1928, Lot 1 was developed with residential and commercial development, including a gasoline service station located on the southwest corner of the Lot. Commercial development expanded from the 1930s through the 1960s across the southern half of Lot 1 to include a Sears department store, restaurants, a bakery, an automobile repair facility, a beauty school, and other retail shops. The northern half of Lot 1 was developed as a parking lot. The gasoline service station was no longer present at the Site by the 1940s. Lot 1 remained relatively unchanged until about 2009 when fire appears to have damaged the western portion of the Site. By 2010, the commercial buildings on Lot 1 appear to have been abandoned.

Lot 1 is currently occupied by the remnant retail buildings and associated paved parking lot. The retail buildings, including a Sears retail store, four former retail spaces, and a former Sears Auto Center automotive service garage containing eight in-grade hydraulic lifts, are currently vacant and unoccupied.

Lots 2 and 3 remained developed with residences until the late 1940s when Lot 3 was developed as a paved parking. Lot 2 became a paved parking lot in the 1950s. Lots 2 and 3 are presently occupied by asphalt paved lots with no structures.

Addresses historically associated with Lot 1 (odd-numbered addresses on the 5600 block of Santa Monica Boulevard) are listed on the Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG), Historic Underground Storage Tank (HIST UST), Facility Inventory Database Underground storage tank (FID UST), Statewide Environmental Evaluation and Planning System Underground Storage Tank (SWEEPS UST) databases, the US Environmental Protection Agency (US EPA) Facility Index System (FINDS) database, and the Environmental Data Resources (EDR) Historical Auto Station database. The SQG, underground storage tank (UST), and FINDS listings relate to a UST for waste oil and other chemical storage associated

with automobile repair performed by Sears. The database listings indicate that a waste oil UST was present at 5601 Santa Monica Boulevard in 2004. It should be noted that 5601 Santa Monica Boulevard is the main Sears department store building, and it is not known if the UST was located at this address.

Site listings on the EDR Historical Auto Stations database include listings from 1924 for an automobile service station at 5615 Santa Monica Boulevard and an automobile repair facility located at 5617 Santa Monica Boulevard, a 2002 listing for auto-body parts at 5643 Santa Monica Boulevard, and a 2009 listing for the Sears Auto Center at 5667 Santa Monica Boulevard. No further information was provided for these listings.

Various reports were previously prepared for the Site. An asbestos survey conducted in 1998 at the Sears commercial building located at 5601 Santa Monica Boulevard indicated the presence of asbestos containing materials (ACMs) in both the interior and exterior materials of the structure. A Phase I ESA completed in 2001 for the commercial property at 5637 Santa Monica Boulevard did not identify USTs or other chemical storage at the Site, other than one 55-gallon drum of apparent glue material. A geotechnical investigation was performed in 2005 for the Site with subsequent revisions. These reports identified artificial fill material present in the upper 8 feet of soil that underlies the Site. The final report reviewed was for a soil and groundwater assessment conducted in 2006. This investigation was performed to evaluate potential impacts to the subsurface related to the presence of the USTs previously presumed to be present north of the Sears building at 5601 Santa Monica Boulevard. Total petroleum hydrocarbons as gasoline (TPH-g) or other hydrocarbons were not detected in any of the soil samples collected during the investigation. However, two groundwater samples contained TPH-g of 924 micrograms per liter (µg/L) in a boring advanced upgradient of the presumed location of the former USTs and 99 µg/L in one boring advanced downgradient of this location. The report concluded that no apparent impacts as a result of the former USTs was observed on the Site and the groundwater impacts are likely the result of an upgradient, off-Site source.

In summary, we have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in Los Angeles, California. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) in connection with the property except for the following:

- A former automobile repair facility is present on the southwest corner of Lot 1 at 5667 Santa Monica Boulevard. The remnants of eight former in-grade hydraulic lifts are

present in the building at that location. In addition, a vent pipe likely associated with a UST is present on the building wall.

Additionally, Northgate identified the following historical REC (HREC):

- The southern portion of Lot 1 was previously identified as automobile repairing and service stations in 1924 and is listed on the EDR US Historical Automobile Stations database. No further information regarding these facilities was available. Given the nature of historic automobile repairing and service stations, Northgate could not rule out the potential for impacts to soil, groundwater, and/or soil vapor as a result of these historic operations.

- Previous investigations indicate the former presence of two 5,000 gallon USTs at the former Sears Department store located on the southeast corner of Lot 1. Soil and groundwater testing previously performed in the vicinity of the reported UST location did not identify significant impact and did not recommend additional investigation.

Our review also identified the following potential environmental concerns:

- A former laundromat facility was identified on Lot 1 at 5663 Santa Monica Boulevard. Although no indications of chemical use, storage, or release was documented, Northgate could not rule out the potential for impacts to the subsurface as a result of these historic operations;

- The subject property has existed in a mixed-use neighborhood since circa the 1920s. Properties in the vicinity of the subject property and topographically upgradient and crossgradient were identified as auto garages and historical auto stations, including the facilities located immediately adjacent to the Site. Although no records of contamination impacting the subject Site were identified as part of the regulatory review, the potential for soil contamination and groundwater contamination cannot be ruled out based on the long-term and historic applications of the Site vicinity; and

- Based on the age of the structure, it is possible that ACMs and lead based paints (LBPs) are potentially present in building materials within the structure. ACMs were identified in the Sears commercial building (5601 Santa Monica Boulevard) in 1998 and it is likely that ACMs and LBPs are present in the other structures on Site.

Northgate recommends the following:

- Conduct a soil, soil vapor, and groundwater investigation in the vicinity of the former Sears automobile repair facilities, and elsewhere across the Site to evaluate potential subsurface impacts related to historic on-Site and off-Site chemical use and operations;

- Develop a soil management plan to address any potentially impacted soil that could be encountered during Site redevelopment; and
- Conduct a survey for ACMs and LBPs and other regulated building materials in all structures on the Site and prepare a demolition plan for managing any identified hazardous materials.

2.0 INTRODUCTION

This report presents the results of a Phase I ESA performed by Northgate for the Client at the Site located at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California. The Site consists of three separate lots comprising approximately 5.43 acres of land. Lot 1 is a commercial development containing the remains of an abandoned department store and other shops along with a large, paved parking lot. Lots 2 and 3 consist of paved parking lots located east of Lot 1. A Site Vicinity Map is shown on Figure 1 and a Site Location Map is shown on Figure 2.

2.1 Purpose

The purpose of this ESA has been to acquire and review information regarding the history of activities on the Site and adjacent areas to evaluate the potential for on-Site soil, groundwater, and/or soil vapor contamination. Northgate has endeavored to perform the ESA in general conformance with the scope and limitations of ASTM E-1527-13, *Standard Practices for Environmental Site Assessments* and 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*.

2.2 Scope of Services

This investigation was performed Nicky Galloway, Project Engineer and Derrick Willis, Principal Geologist. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Site, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Site, if available;
- A reconnaissance of the Site and near vicinity;
- Discussions with regulatory officials and review of regulatory agency publications and files, as applicable;
- A review of historic aerial photographs, city directories, and maps of the Site; and
- Preparation of this report.

2.3 Limitations and Exceptions

2.3.1 Limitations

The purpose of an ESA is to reasonably evaluate the potential for, or actual impact of, past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Site conditions existing at the time of performance of services. We are unable to report on, or accurately predict, generally unforeseeable events that may impact the Site following performance of services, whether occurring naturally or caused by external forces. Therefore, we cannot assume responsibility for such events or their impact. We also cannot assume responsibility for changes in environmental standards, practices, or regulations.

2.3.2 Exceptions

The time intervals between some historical information sources may exceed five (5) years, due to the availability of such records. However, in our opinion, this does not significantly impact our ability to evaluate historic land use conditions at the Site.

At the time this report was prepared, response to request for file reviews were not received from the South Coast Air Quality Management District (SCAQMD) and the Los Angeles Fire Department (LAFD). This represents a data gap that could potentially impact our ability to evaluate environmental conditions at the Site. Northgate will provide an updated addendum or report once the requested have been received and reviewed if the results of the file review change the conclusions and recommendations presented.

2.4 User Reliance

This report has been prepared for the exclusive use of the Client, and its parent corporations, subsidiaries, affiliates, partner, partnerships, and lenders in evaluating environmental conditions at the Site. Others may not use or rely on the information contained in this report without the express written consent of Northgate.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Site consists of approximately 5.43 acres of improved land located at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California. The Site consists of 13 parcels identified as Assessor's Parcel Numbers (APNs) 5536-008-013, 5536-011-010, 5536-012-004, -005, -006, -007, -009, -010, -011, -012, -013, -014, and -015 in Los Angeles County. A Site Vicinity Map is shown on Figure 1. For the purpose of this report, the Site has been divided into three Lots as indicated on the Site Location Map shown on Figure 2.

3.2 Site and Vicinity General Characteristics

The Site consists of approximately 5.43 acres of land. The main portion of the Site (Lot 1) is developed with the remains of an abandoned department store and other retail buildings. An associated paved parking lot covers the northern half of the Lot. A four-story structure formerly occupied by a Sears retail department store is located in the southeastern portion of the Lot. A Sears Auto Center automotive service garage is located on the southwest corner of the Lot. Four abutting single-story former retail buildings are located along Santa Monica Boulevard between the Sears Building and the Auto Center. In addition, a concrete foundation of a fifth building is located adjacent to the Auto Center. The balance of Lot 1consists of a deteriorated paved parking lot for the retail outlets. An electrical transformer is located north of the Sears building in a fenced compound. Lots 2 and 3 consist of asphalt paved parking lots with no structures.

The Site is bordered to the north by Virginia Avenue followed by residential development then the Interstate 101 freeway. The Site is bordered to the south by Santa Monica Boulevard followed by commercial, and then, residential development. Residential development borders the Site to the east. The Site is bordered to the west by North Wilton Place followed by commercial and residential development. The Site vicinity is primarily residential development with some interspersed commercial development along the main thoroughfares.

3.3 Geology and Groundwater

3.3.1 Geology

Regionally, the site is located within the foothills of the Santa Monica Mountains, within the Transverse Ranges of Southern California (Norris, R.M. and Webb, R.W., 1990). The Santa Monica Mountains consist mainly of granitic and metamorphic rocks. Elevation at the Site is

approximately 320 feet above mean sea level within. The site lies near the La Brea High and Hollywood Piedmont physiographic regions (CDWR, 1961). Quaternary alluvium composed of gravel, sand, silt and clay, forms the shallow sediments beneath the Site. Underneath these alluvial sediments lies the upper Pleistocene Lakewood formation. Exposed Upper Mesozoic granitic and mid Miocene marine clastic rocks of the Middle Topanga formation make up the elevated topography north of the Site. Outcrops of the Upper Miocene Monterey Shale make up the Elysian Hills to the east (Dibblee, 1991).

Information contained in a Geotechnical investigation of the property at 5661 Santa Monica Boulevard performed in 2007 (Geocon, 2007) indicates that subsurface soils at the Site consist of artificial fill material to a depth of up to eight feet below ground surface (bgs). The artificial fill is underlain by interbedded layers of poorly to well-graded, fine to coarse-grained sand and silty sand, clay and silt to the total depth explored of 90 feet bgs.

3.3.2 Groundwater

Hydrologically, the subject Site is located in the Los Angeles Groundwater Basin within the Hollywood Sub-basin. The regional groundwater flow direction within the Hollywood Sub-basin is westward toward the Ingelwood Fault (CDWR, 2004). The aforementioned Lakewood Formation includes the Exposition and Gage Aquifers. The Exposition Aquifer is shaped as a wedge that dips to the south and intersects the surface nearly one half mile south of the site. The Gage Aquifer, which underlies the Exposition Aquifer, pinches out approximately 1.25 miles south of the site (CDWR, 1961).

Groundwater was encountered in previous geotechnical borings advanced at the Site at depths between 21 and 28.5 ft bgs. The first encountered groundwater may represent perched zones rather than a true regional groundwater system. Groundwater in the vicinity of the Site is reported to be directed towards the southwest (EDR, 2015b).

3.4 Current Use of the Property

The Site is currently developed with the remains of an abandoned department store and several vacant buildings comprising an abandoned commercial strip. The remainder of the Site consists of paved parking lots.

3.5 Description of Structures, Roads, Sewage, and Potable Water Sources

Lot 1, which occupies the city block bounded by Santa Monica Boulevard, Wilton Place, Virginia Avenue, and St. Andrews Place North, is developed with a four-story structure that was formerly

a Sears retail outlet and five additional retail commercial buildings. The northern half of Lot 1 is an asphalt paved parking to serve the buildings. Lots 2 and 3 are located across St. Andrews Place North to the east, and are developed as paved parking lots. Water and sewage connections to the Site are provided by the city of Los Angeles.

3.6 Current Uses of Adjoining Properties

The Site is bordered to the north by Virginia Avenue followed by residential development, and then the Interstate 101 freeway. The Site is bordered to the south by Santa Monica Boulevard followed by commercial development then residential development. Residential development and St. Andrews Place North border the Site to the east. The Site is bordered to the west by North Wilton Place followed by commercial and residential development. The Site vicinity is primarily residential development with some interspersed commercial development.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Liens or Activity Use Limitations

Northgate reviewed an environmental lien and activity use limitation (AUL) search provided by EDR. The document is attached as Appendix A. No environmental liens or activity and land use limitations were noted in the report (EDR, 2015a).

4.2 Valuation Reduction for Environmental Issues

Northgate was not provided with any information indicating that the property values of the Site had been reduced due to environmental issues.

4.3 Owner, Property Manager, and Occupant Information

The Site is owned by St. Andrew Santa Monica, LLC. There are no current tenants.

4.4 Specialized Knowledge

The Client has not indicated that it possesses any specialized knowledge regarding the Site.

4.5 Reason for Performing the Phase I ESA

The Client intends to purchase the Site for redevelopment.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

To determine if the Site has documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Site prescribed by ASTM 1527-13 and *All Appropriate Inquiry*, Northgate reviewed a summary of regulatory agency databases prepared by EDR.

The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified facilities is provided as Appendix B (EDR, 2015b). The results of the database search and internet follow-up agency file review are summarized below.

5.1.1 Site

The Site is listed on the EDR US Historical Automobile Stations database under several entities. The first listing is for an automobile repairing facility located at 5617 Santa Monica Boulevard identified as "Gaylord A S" in 1924. The second listing is for an automobile service station located at 5615 Santa Monica Boulevard. This facility is identified as "Omara Marony" in 1924. An additional listing is for "Sears Auto Center" located at 5667 Santa Monica Boulevard in 2009. The fourth listing identified "Gosen Auto Body Part" in 2002 at 5643 Santa Monica Boulevard. The final listing was for a gasoline and oil service station identified as "Colvin J W" at 5673 Santa Monica Boulevard in 1928.

The Site is additionally listed at as "Green Hornet Santa Monica" and "Sears Roebuck and Co" at 5601 Santa Monica Boulevard on the RCRA-SQG, FINDS, HIST UST, FID UST, and SWEEPS UST databases. The UST listings indicate the presence of a waste oil UST. The Site is additionally listed as a small quantity generator of hazardous waste including ignitable waste and spent nonhalogenated solvents.

5.1.2 Site Sources

The regulatory agency database search prepared by EDR indicates the presence of 169 agency listings for facilities within an approximate one-mile radius of the Site. Facilities with releases impacting groundwater located within 0.25-mile upgradient and/or cross gradient of the Site, or otherwise judged to be of potential impact to soil or groundwater quality at the Site, are summarized in the table on the following pages. Relevant documents pertaining to the reviews are located in Appendix C.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
5556 Santa Monica Boulevard	EDR Historic Auto Station	Approximately 40 feet southeast and crossgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1929 as "Bates J E" as a automobile repairing and service station. No other information was provided.
5600 Santa Monica Boulevard	HIST UST, CA FID UST, SWEEPS UST	Approximately 40 feet south-southeast and crossgradient of the Site	This facility was listed on the HIST UST, CA FID UST and SWEEPS UST databases. The listings indicate that one, 5000-gallon inactive UST with unknown chemical product was present at this Site, which was listed as a paint store. No other information was provided.
5608 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 40 feet south and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1937 as "Alevy Solomon" as a clothes presser and cleaner. No other information was provided.
5622 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 40 feet south-southwest and crossgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1929 as "Barrin Morris" as a clothes presser and cleaner. No other information was provided.
5638 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 40 feet southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1933 as "El Cortez Cleaners" and in 1937 as "Eisenberg Saml" as a clothes presser and cleaner. No other information was provided.
5654 Santa Monica Boulevard	EDR Historic Auto Station	Approximately 40 feet southwest and downgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1937 as "Downey J M" as a automobile repairing facility. No other information was provided.
5656 Santa Monica Boulevard	EDR Historical Cleaners, EDR Historic Auto Station, CA FID UST, SWEEPS UST	Approximately 40 feet southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1933 as "Gem Cleaners" as a clothes presser and cleaner. No other information was provided. This facility was identified on the EDR Historic Auto Station database. The address was identified in 1942 as "Bluff H E Jr" as a gasoline and oil service station. No other information was provided. This facility was additionally listed as a Chevron Station on the CA FID UST, SWEEPS UST, and HIST UST databases. These databases indicated the presence of four USTs installed in 1962 and reported to contain product including a 2,000-, 4,000-gallon, 5,000-, and a 10,000-gallon USTs. One 550-gallon UST was reported to be installed in 1962 and utilized for waste. No further information was available regarding this facility.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
5705 Santa Monica Boulevard	EDR Historical Cleaners, DRYCLEANRS	Approximately 60 feet west-southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1937 as "Soloman Saml" as a clothes presser and cleaner. The facility was additionally listed as "Expo Cleaners" on the DRYCLEANERS database in 2006 but was not listed as active. No other information was provided.
5707 Santa Monica Boulevard	EDR Historical Cleaners, DRYCLEANRS	Approximately 60 feet west-southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1999, 2001, 2003, 2004, 2005, 2006, 2007, 2010, and 2011 as "Expo Cleaners" and as "EKTA Coin Laundry" in 2004. The facility was also listed as "Expo Cleaners" on the DRYCLEANERS database in 1995, but was listed as inactive as of 2007. No other information was provided.
5544 Santa Monica Boulevard	EDR Historic Auto Station	Approximately 65 feet southeast and crossgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 2004 as "Jim Bess Auto". No other information was provided.
1076 North Saint Andrews Place	EDR Historical Cleaners	Approximately 140 feet south-southeast and crossgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 2001, 2002, 2003, 2004, 2005, 2009, and 2010 as "Maytag Express Cleaners" and additionally as "Express Laundry" in 2002. No other information was provided.
5717 Santa Monica Boulevard	RCRA-SQG, FINDS, CA FID UST, and SWEEPS UST	Approximately 200 feet west-southwest and downgradient of the Site	This facility was identified on the CA FID UST and SWEEPS UST. No other information was provided.
5723 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 270 feet west-southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1929 as "Wood LA" and in 1937 as "Bokerjian Vahan" as a clothes presser and cleaner. No other information was provided.
1072 North Wilton Place	EDR Historic Auto Station	Approximately 275 feet southwest and downgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1999, 2001, 2002, 2003, 2004, 2008, 2009, and 2010 as "M&M Auto Center". No other information was provided.
5722 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 280 feet west-southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1937 and 1942 as "Lee Dan" and in 1942 as a Chinese and oriental laundry. No other information was provided.
5508 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 290 feet east-southeast and crossgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1924 as "Grimwood BK" as a clothes cleaner, presser, and dyer and in 1929 as "Gromwood Co" as a clothes presser, leaner, and repairer. No other information was provided.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
5724 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 310 feet southwest and downgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1924 as "Sosner Saml" as a clothes cleaner, presser, and dyer. The facility was listed in 1929 as "Sosner S I" as a clothes presser, cleaner, and repairer. It was listed *in 1033 and 1937 as "Sosner Fannie" and "Sosner Saml" as a clothes presser and cleaner.* No other information was provided.
5511 Virginia Avenue	EDR Historical Cleaners	Approximately 335 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1933 and 1937 as "Lies Meyer" as a clothes presser and cleaner. No other information was provided.
Santa Monica/Vine Primary Site No. 3, La Mirada Ave/Lexington Ave/Wilton Place	SCH, Envirostor	Approximately 340 feet north-northwest and upgradient of the Site	This facility is listed on the SCH database as a California Department of Toxic Substances Control (DTSC) site cleanup program. The status is listed as inactive – withdrawn as of August 20, 2002 with no restricted land use. A Master Oversight Agreement exists between the Los Angeles Unified School District and the DTSC dated 2000. Records indicate that a Phase I was completed for this facility, but no records of these reports of further information was available for this facility.
5734 Santa Monica Boulevard	EDR Historic Auto Station	Approximately 375 feet west-southwest and downgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1942 as "Rische EDW" as a gasoline and oil service station. No other information was provided.
1119 North Western Avenue	EDR Historical Cleaners	Approximately 390 feet east and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1999, 2001, 2002, 2003, 2006, 2007, and 2008 as "Parks Coin Laundry", "B&A Coin Laundry", and "DMG Coin Laundry". No other information was provided.
1157 North Western Avenue	EDR Historic Auto Station	Approximately 390 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 2002 as "Taqueria El Arco". No other information was provided.
1171 North Western Avenue	EDR Historical Cleaners	Approximately 390 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1929 as "Kaufman Max" as a clothes presser, cleaner, and repairer. The facility was listed in 1933 as "Kirshen Sol" as a clothes presser and cleaner. It was additionally listed in 1942 as "Wong Tune" as an oriental laundry. No other information was provided.
1187 North Western Avenue	EDR Historical Cleaners	Approximately 415 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1937 as "Wong H" as an oriental laundry. No other information was provided.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
1191 North Western Avenue	EDR Historical Cleaners	Approximately 420 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1937 as "Kirshen Sol" as a clothes presser and cleaner. No other information was provided.
1172 North Western Avenue	EDR Historic Auto Station, RCRA-SQG, and FINDS	Approximately 430 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 2002, 2003, 2004, 2007, 2008, 2010, 2011, and 2012 as "AAA Discount Muffler". The facility was also listed as "Winston Tire Company" as a small quantity generator. No other information was provided.
1174 North Western Avenue	EDR Historic Auto Station	Approximately 440 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1999 as "Jalisco Tires and Auto Service No 3". No other information was provided.
1176 North Western Avenue	EDR Historic Auto Station	Approximately 450 feet east-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1942 as "Friedman W H" as a gasoline and oil service station. The facility was listed in 1999 and 2001 as "Speed Auto Service" and in 2008 and "Monro Muffler Brake Inc". No other information was provided.
5801 Santa Monica Boulevard	EDR Historic Auto Station	Approximately 455 feet west-southwest and crossgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1929, 1933, 1937, and 1942 as a gasoline and oil service station under the names "Phillips Lloyd", "Gibson C V", "Barnum D H", and "Hobica H A". No other information was provided.
5737 Lexington Avenue	EDR Historic Auto Station	Approximately 460 feet west-northwest and crossgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 2008 as "Inter Computer and Accessories". No other information was provided.
1201 North Western Avenue	EDR Historical Cleaners	Approximately 465 feet northeast and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1929 as "Reyer Marie E Mrs" as a clothes presser, cleaner, and repairer. The facility was listed in 1933 and 1937 as "Cohen Louis" as a clothes presser and cleaner. No other information was provided.
1211 North Western Avenue	EDR Historic Auto Station	Approximately 0.10 miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1942 as "Kraft Adolph" as an automobile repairing facility. No other information was provided.
1213 North Western Avenue	EDR Historic Auto Station	Approximately 0.11 miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1929 as "Henish W P" as an automobile repairing and service station. No other information was provided.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
1075 North Western Avenue	LUST, CA FID UST, and SWEEPS UST	Approximately 0.11 miles east-southeast and cross-gradient of the Site	The facility is listed on the LUST database for a release of gasoline impacting groundwater from a pipe leak. This status is listed as completed with a case closure date of April 28, 1998. The CA FID UST and SWEEPS UST databases indicate that five USTs were present on the facility for motor vehicle fuel. No other information was available regarding this release.
5464 Santa Monica Boulevard	EDR Historical Cleaners	Approximately 0.13 miles east-southeast and up to crossgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1929 as "Birnbaum Herman" as a clothes presser, cleaner, and repairer. No other information was provided.
1260 North Saint Andrews Place	LUST	Approximately 0.13miles north-northeast and upgradient of the Site	This facility is listed on the LUST database for a release of gasoline to groundwater in 1990. The status is listed as completed with a case closure date of September 3, 1996. No other information was available regarding this release.
1200 North Western Avenue	EDR Historic Auto Station	Approximately 0.14miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1929 as "Ferrick Knott" as gasoline and oil service station. The facility was identified in 1929 as "Senator Jas" as an automobile repairing and service station. It was listed in 1933 as "Fitt A T" as an automobile repairing facility. Additionally, the facility was listed in 1933, 1937, and 1942 as a gasoline and oil service station as "Ferrick Knott", "Ferrick Jas", and "Ofstein Saml". No other information was provided.
1222 North Western Avenue	EDR Historic Auto Station	Approximately 0.14miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1924 as "Winn R C" and "Brookins Jesse" and "Welba Albt" as an automobile service station and automobile repairing. The facility was listed in 1933 as "Breitstein Robt" and "Bugatti Service" as a gasoline and oil service station and as automobile repairing. It was listed in 1937 as "Oneil Jas" as a gasoline and oil service station. No other information was provided.
1224 North Western Avenue	EDR Historic Auto Station	Approximately 0.14 miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1933 as "Kraft Adolph" as an automobile repairing facility and in 1942 as "Brown Danl" as a gasoline and oil service station. No other information was provided.
1250 North Western Avenue	EDR Historic Auto Station	Approximately 0.14 miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1937 as "White LA" as an automobile repairing facility. No other information was provided.
1022 North Van Ness Avenue	HIST CORTESE and LUST	Approximately 0.17 miles west-southwest and downgradient of the Site	This facility was identified for a release of solvents or other non-petroleum hydrocarbons to the soil. The status is listed as completed with a case closure date of July 25, 1996.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
5461 La Mirada Avenue	EDR Historic Auto Station	Approximately 0.18 miles northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1933 as "White LA" as an automobile repairing facility. No other information was provided.
1267 North Wilton Place	EDR Historical Cleaners	Approximately 0.18 miles north-northwest and upgradient of the Site	This facility was identified on the EDR Historical Cleaners database. The address was identified in 1933 as "Miller Rana Mrs"and in 1937 as "Simmons Abr" as a clothes presser and cleaner. No other information was provided.
5511 Fountain Avenue	EDR Historic Auto Station	Approximately 0.18 miles north and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1933, 1937, and 1942as "White LA" as an automobile repairing facility. No other information was provided.
1276 North Western Avenue	EDR Historic Auto Station, UST, CA FID UST, SWEEPS UST, RCRA-SQG, HIST CORTESE, LUST, and FINDS	Approximately 0.18 miles north-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 2001, 2002, 2003, and 2004 as "Morales Chevron" and in 2005 as "Karim Auto Service". This facility was also listed on the UST, CA FID UST, and SWEEPS UST databases for the presence of four active motor vehicle fuel USTs. He facility is listed on the LUST database for a release of tetrachloroethylene (PCE) to groundwater that has a status of completed with a case closure date of January 30, 2009. A secondary LUST listing indicates the facility is also listed for a release of gasoline to groundwater that has a status of completed with a case closure date of September 18, 1996.
1277 North Western Avenue	UST, CA FID UST, SWEEPS UST, RCRA-LQG, LUST, HIST UST, and EDR Historic Auto Station	Approximately 0.19 miles north-northeast and upgradient of the Site	This facility is identified on the EDR Historic Auto Station Database. The address was identified in 1999, 2001, 2002, 2004, and 2005 as "Harrys Mobil." The facility was also listed on the UST, CA FID UST, SWEEPS UST, and HIST UST databases for the presence of motor vehicle fuel USTs. The facility is listed on the LUST database for a release of gasoline impacting groundwater. The status is listed as completed with a case closure date of July 2, 2012. Monitoring reports available for this facility did not indicate that the plume extended beneath the subject Site.
1300 North Western Avenue	EDR Historic Auto Station, RCRA-LQG, HIST UST, UST, and LUST	Approximately 0.20 miles north and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in as a gasoline and oil service station in 1933 and 2005 as "Stacy E F" and "Beebe J W". It was listed as "724 Auto Service" in 2009, 2010, 2011, and 2012. It is listed as a large quantity generator and for the presence of a UST containing waste oil and three USTs containing motor vehicle fuel.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
			This facility is additionally listed on the LUST database for a release of gasoline to groundwater. The status of the facility is listed as completed with a case closure date of November 19, 2009. Monitoring reports for this facility did not indicate that the plume extended beneath the subject Site.
1302 North Western Avenue	EDR Historic Auto Station	Approximately 0.21 miles north-northeast and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified in 1929 as "Huddleston Austrian" as a gasoline and oil service station. No other information was provided.
1278 North Van Ness Avenue	EDR Historic Auto Station	Approximately 0.22 miles northwest and upgradient of the Site	This facility was identified on the EDR Historic Auto Station database. The address was identified as a gasoline and oil service station in 1929 as "Claybaugh L T", in 1933 as "Kiefler H J", and in 1942 as "Meyers M L." No other information was provided.

5.2 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Site. During the course of the review the following agencies were contacted for environmental records:

- DTSC EnviroStor web site;
- State Water Resources Control Board (SWRCB) GeoTracker web site;
- LAFD;
- Los Angeles County Department of Public Works;
- Los Angeles County Assessor, and
- SCAQMD.

The results of our review are described in the following sections.

5.2.1 DTSC EnviroStor Web Site

The Site was not listed on the DTSC EnviroStor website and no files were available to review for the property.

5.2.2 SWRCB GeoTracker Web Site

The Site was not mapped on the GeoTracker database and no files were available to review for the property.

5.2.3 LAFD

Northgate requested files maintained with the LAFD. At the time this report was prepared, no response had been received. Upon receipt, if the review of the files changes the conclusions and recommendations provided, Northgate will issue an addendum to this report.

5.2.4 Los Angeles County Department of Public Works

The Los Angeles County Department of Public Works did not have any records on file for the Site. Northgate reviewed the Los Angeles County Department of Public Works online file review system for industrial waste, USTs, and stormwater. No records were maintained for the Site addresses.

5.2.5 Los Angeles County Assessor

The Los Angeles County Assessor files for the Site indicate that the property is utilized for commercial/industrial purposes. Information available indicates the following structures are constructed on the subject Site:

- A 4,340 square foot building built in 1931;
- A 2,500 square foot structure built in 1936;
- A 7,100 square foot building built in 1936;
- A 7,126 square foot structure built in 1948;
- A 15,000 square foot building built in 1949;
- A 5,450 square foot structure built in 1950;
- A 4,000 square foot building built in 1954;
- A 5,450 square foot structure built in 1955;
- A 4,440 square foot building built in 1957;
- A 9,500 square foot structure built in 1961;
- A 13,200 square foot building built in 1971;
- A 64,224 square foot structure built in 1972; and
- A 26,000 square foot building built in 1972.

5.2.6 SCAQMD

Northgate requested files from the SCAQMD. At the time this report was prepared, no response had been received. It is Northgate's opinion that files maintained by the SCAQMD are not likely to impact the conclusions and recommendations presented in this report. However, upon receipt, if the review of the files changes the conclusions and recommendations provided, Northgate will issue an addendum to this report.

5.3 Other Environmental Issues

Northgate performed a reconnaissance-level evaluation of other environmental issues, as outlined in Section 13.1.5 of ASTM E1527-13.

5.3.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for Los Angeles County, Maps #06037C 1605F and #06037C 1610F with an effective date of September 26, 2008. According to the FIRM, the Sites are

located in Flood Zone X – areas determined to be outside the 0.2-percent annual chance floodplain (FEMA, 2008). The Site does not lie within the 100- or 500-year flood zones.

5.3.2 Radon

The California Department of Health Services' (DHS's) online list of indoor radon levels indicates that radon concentrations from three indoor air samples collected in zip code area 90038 were less than 4.0 pico-curies per liter (pCi/L) (DHS, 2010). According to the EDR Radius Report (Appendix B), the federal US EPA radon zone for Los Angeles County is Zone 2 (indoor average level greater than or equal to 2 pCi/L and less than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 63 samples collected in Los Angeles County in California, in the living area-first floor, 2% exceeded 4 pCi/L. The DHS and the US EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas does not appear to constitute a significant environmental concern at the Site.

5.3.3 Oil and Gas Wells

According to the EDR GeoCheck® - Physical Setting Source Addendum, located in the Radius Report (Appendix B), there are two oil well located within one mile of the Site. The nearest well is located approximately 0.4-miles southwest of the Site in a downgradient direction. This well is listed as plugged and owned by Union Oil Company of California as an oil and gas production well. The second well is located approximately 0.8-miles northwest of the Site in a cross-gradient direction. This well is listed as plugged and owned by Chevron USA Inc. as an oil and gas production well. Information available on the Division of Oil, Gas & Geothermal Resources (DOGGR) web site indicates that no active or abandoned oil/gas wells are present on the Site. No wells appear to represent an environmental concern to the Site based on their relative locations, distances, and/or status.

5.4 Land Use History

Information on historical land use at the Sites and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. A summary of our investigation findings is presented below.

5.4.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Sites from 1928, 1938, 1948, 1952, 1954, 1964, 1970, 1972, 1977, 1981, 1983, 1989, 1994, 2002, 2005, 2009, 2010 and 2012 obtained from EDR (EDR, 2015c). Copies of the aerial photographs are provided in Appendix D. A summary of our aerial photograph review is presented below.

Year: 1928	**Scale:** 1" = 500'	**Source:** USGS
A large, rectangular commercial building is present at the location of Bldg. 6 on Figure 2, on the southeast corner of Lot 1, with parking and vacant land located to the north and west. The western 2/3 of Lot 1 contains residences. What appears to be a gasoline service station may be present on the southwest corner of the Lot. Lots 2 and 3 appear to be developed with residences. The Site is bordered by arterial streets and existing commercial and residential development.		
Year: 1938	**Scale:** 1" = 500'	**Source:** USGS
An additional commercial building is present immediately to the west of the original rectangular commercial building on the southeast corner of Lot 1 (currently shown as parking on Figure 2). The entire northern half of the Lot appears to be under construction for a parking lot. The western half of the southern half of the Lot contains residences, with a long, linear commercial building present at the location of existing Bldg. 1 on Figure 2. A gasoline service station may still be present on the southwest corner of the Site. Lots 2 and 3 remain unchanged from 1928. The surrounding area generally remains unchanged from 1928.		
Year: 1948	**Scale:** 1" = 500'	**Source:** USGS
Commercial buildings have replaced the residences at the location of Bldgs. 3 and 4 on Figure 2. The northern half of Lot 1 is paved parking with numerous vehicles. A few residences still remain on the western half of the southern half of Lot 1. The possible gasoline service station is no longer present on the southwest corner of the Lot. Lot 2 remains unchanged from 1938. Lot 3 is now a parking lot. The surrounding area generally remains unchanged.		
Year: 1952	**Scale:** 1" = 500'	**Source:** USGS
Lot 1 is fully developed with commercial buildings and parking along the southern half of the Lot and paved parking along the northern half. Lots 2 and 3 remain unchanged from 1948. The surrounding area continues to be fully developed with a mix of commercial and residential land use.		
Year: 1954	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1952 photograph.		

Year: 1964	**Scale:** 1" = 500'	**Source:** USGS
An addition has been to the western half of existing Bldg. 1 shown on Figure 2, and commercial buildings are now present at the location of Bldg.2 on Figure 2. The entire southern half of Lot 1 is now occupied by commercial buildings except for a parking strip at the southwest corner of the Lot and a small parking lot immediately east of existing Bldg. 4 on Figure 2. The entire northern half of Lot 1 is a paved parking lot. Lot 2 is now a paved parking lot. Lot 3 remains unchanged from 1954.		
Year: 1970	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1964 photograph.		
Year: 1977	**Scale:** 1" = 500'	**Source:** USGS
The commercial building immediately adjacent to Bldg. 6 on west has been replaced by a parking lot. Lot 1 remains otherwise unchanged. Lots 2 and 3 and the surrounding vicinity appear similar to the 1970 photograph.		
Year: 1981	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1977 photograph.		
Year: 1983	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1981 photograph.		
Year: 1989	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1983 photograph.		
Year: 1994	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1989 photograph.		
Year: 2002	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 1994 photograph, except that the apartment buildings on the eastern portion of Lot 3 have been replaced by a parking lot.		
Year: 2005	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 2002 photograph.		
Year: 2009	**Scale:** 1" = 500'	**Source:** USGS
Buildings on the western third of Lot 1 appear to have been damaged by fire. The remainder of the Site and vicinity appear similar to the 2005 photograph.		

Year: 2010	**Scale:** 1" = 500'	**Source:** USGS
The commercial buildings on Lot 1 appear to have been abandoned, and the parking lot on the northern half of the Lot is vacant. and vicinity appear similar to the 2009 photograph. Lots 2 and 3 and the surrounding vicinity appear unchanged from 2009.		
Year: 2012	**Scale:** 1" = 500'	**Source:** USGS
The Site and vicinity appear similar to the 2010 photograph.		

5.4.2 Sanborn Maps

Northgate reviewed Sanborn fire insurance maps for the Site obtained from EDR for the years 1919, 1950, 1955, 1956, 1957, 1959, 1960, 1961, 1962, 1966, 1968, 1969, and 1970. Copies of the Sanborn Maps are provided in Appendix E (EDR, 2015d). Information from the Sanborn maps is summarized below.

1919:	The Site is generally developed with residences or shown as vacant lots.
North:	Vacant land and residences.
South:	Vacant land and residences.
East:	Vacant land and residences.
West:	Vacant land and residences.

1950:	The southeast corner of Lot 1 is occupied by a Sears Roebuck & Co. Department Store. "Built 1928" and "Paint and Oil B." are shown on the map. Automobile repair, including oil and battery storage is shown on the northwest corner of the building. Other commercial buildings (restaurant, bakery, some paint storage) and residences are on Lot 1 along Santa Monica Blvd. The northern half of Lot 1 is identified as parking. Lot 2 is occupied by dwellings. Lot 3 is shown as vacant lots and apartments.
North:	Residences.
South:	Commercial and residential development. Automobile repair with paint spraying is depicted across Santa Monica Blvd. across from the southwest corner of the Lot 1.
East:	Residences
West:	Commercial and residential development.

1955:	Additional commercial buildings are present on the southern half of Lot 1 along Santa Monica Blvd. The western-most building adjacent to Wilton Place is identified as "Auto Service". Lots 2 and 3 remain unchanged from the 1950 map.
North:	Residences.
South:	Commercial shops and a hotel. The automobile repair with paint spraying located across Santa Monica Blvd. across from the southwest corner of the Lot 1 changes to "Auto Parts" in the 1956 map.
East:	Commercial and residential development.
West:	Commercial and residential development.

1956:	Lots 1, 2, and 3 appear similar to the 1955 map.
North:	Similar to the 1955 map.
South:	Similar to the 1955 map.
East:	Similar to the 1955 map.
West:	Similar to the 1955 map.

1957:	Lots 1, 2, and 3 appear similar to the 1956 map.
North:	Similar to the 1956 map.
South:	Similar to the 1956 map.
East:	Similar to the 1956 map.
West:	Similar to the 1956 map.

1959:	The Site appears similar to the 1957 map. The area northwest of the main Sears department store formerly labeled as "batteries and oil" is now labeled "Garden Supplies". "Auto Service" still depicted on the western-most building at the southwest corner of Lot 1. Lots 2 and 3 remain unchanged.
North:	Residences.
South:	Commercial shops, including restaurants, a hotel, Paints, and Auto Parts.
East:	Commercial and residential development.
West:	Commercial and residential development.

1960:	Lots 1, 2, and 3 appear similar to the 1959 map.
North:	Similar to the 1959 map.
South:	Similar to the 1959 map.
East:	Similar to the 1959 map.
West:	Similar to the 1959 map.

1961:	Lot 1 appears similar to the 1960 map. Lot 2 is now a vacant lot. Lot 3 remains unchanged from the 1960 map.
North:	Residences.
South:	Commercial shops, including restaurants, a hotel, Paints, and Auto Parts.
East:	Commercial and residential development.
West:	Commercial and residential development.

1962:	Lots 1, 2, and 3 appear similar to the 1961 map.
North:	Similar to the 1961 map.
South:	Similar to the 1961 map.
East:	Similar to the 1961 map.
West:	Similar to the 1961 map.

1966:	Lots 1, 2, and 3 appear similar to the 1962 map.
North:	Residences.
South:	Commercial shops, including restaurants, apartments, hotel, Paints. The Auto Parts shop shown immediately south of the southwest corner of Lot 1, across Santa Monica Blvd., is now identified as a gasoline service station.
East:	Commercial and residential development.
West:	Commercial and residential development.

1968:	Lots 1, 2, and 3 appear similar to the 1962 map.
North:	Similar to the 1966 map.
South:	Similar to the 1966 map.
East:	Similar to the 1966 map.
West:	Similar to the 1966 map.

1969: **1970:**	Lots 1, 2, and 3 appear similar to the 1962 map.
North:	Similar to the 1968 map.
South:	Similar to the 1968 map.
East:	Similar to the 1968 map.
West:	Similar to the 1968 map.

1970:	Lots 1, 2, and 3 appear similar to the 1962 map.
North:	Similar to the 1969 map.
South:	Similar to the 1969 map.
East:	Similar to the 1969 map.
West:	Similar to the 1969 map.

5.4.3 Topographic Maps

Northgate reviewed historic topographic maps for the Sites obtained from EDR for the years 1896, 1900, 1901, 1902, 1920, 1926, 1953, 1966, 1981, and 1994. Copies of the topographic maps are provided in Appendix F (EDR, 2015e). Information from the topographic maps is summarized below.

Quadrangle: Santa Monica	**Scale:** 1:62,500	**Series:** 15 Minute
1896:	The Site and vicinity are shown as vacant, or general urban land with no specific features depicted.	
Quadrangle: Los Angeles	**Scale:** 1:62,500	**Series:** 15 Minute
1900:	The Site and vicinity are similar to the 1896 map.	
Quadrangle: Southern CA Sheet 1	**Scale:** 1:250,000	**Series:** 60 Minute
1901:	No discernible features are depicted for the Site due to map scale.	
Quadrangle: Santa Monica	**Scale:** 1:62,500	**Series:** 15 Minute
1902:	The Site and vicinity are depicted as general urban land.	
1920:	The Site and vicinity are depicted as urban land.	
Quadrangle: Hollywood	**Scale:** 1:24,000	**Series:** 6 Minute
1926:	The Site is shown as general urban land with a number of small structures. The surrounding area is shown as general urban land.	
Quadrangle: Hollywood	**Scale:** 1:24,000	**Series:** 7.5 Minute
1953:	The Site and vicinity are depicted as undifferentiated urban land.	
1966:	The Site and vicinity are depicted as undifferentiated urban land.	
1972:	The Site and vicinity are depicted as undifferentiated urban land.	
1981:	The Site and vicinity are depicted as undifferentiated urban land.	
1994:	The Site and vicinity are depicted as undifferentiated urban land.	

5.4.4 City Directories

Northgate reviewed a summary of local city directory listings for the Sites and vicinity available at various intervals from 1920 to 2013, obtained from EDR. A copy of the EDR summary report is provided in Appendix G (EDR, 2015f).

Address	Date	Listing
Subject Site Listings		
5673 Santa Monica Boulevard	1929	Automobile service/gasoline station - "Colvin John W Ann gas ste"
5667 Santa Monica Boulevard	2008	Sears Auto Center
	1951	Lucky Sales Co
5665 Santa Monice Boulevard	2006-2008	Travel Service/Insurance
	1967-2000	Massage
	1971	Sofa Sales
	1958-1965	Pet Shop / Aquarium
5663 Santa Monica Boulevard	2008	95 Cents Store
	1990	Genesis Computers
	1976-1981	Otto's Cycles
	1958-1967	Laundromat

	1924-1958	Residences

5.5 Interviews

Northgate submitted an interview questionnaire to Ms. Ellen Rose, 1st Vice President of Legal for the Client. Ms. Rose indicated that she has been associated with the Site for a short period of time as the Client intends to purchase the Site. She did not indicate any specialized knowledge of the Site.

Northgate submitted an interview questionnaire to Mr. Fred Cordova of Kennedy Wilson Brokerage Group, representative for the seller. Mr. Cordova indicated that the seller declined to fill out the questionnaire.

A copy of the completed questionnaire is provided in Appendix H.

5.6 Previous Reports

Northgate reviewed several reports previously prepared for the Site as summarized below:

Asbestos Survey 103-8115, Sears Building, 5601 Santa Monica Boulevard, Los Angeles, CA 90038. July 1998.

Northgate reviewed an asbestos survey prepared by Altec Testing & Engineering, Inc (Altech) dated July, 1998 for the Sears commercial property located at 5601 Santa Monica Boulevard. A total of 117 bulk samples of suspect ACMs were collected from the structure. Samples collected from the duct installation and exterior stucco of the roof materials were determined to be asbestos containing. Additionally, a transite vent pipe and gray patching/penetration tar were observed in the roof area and were not sampled but were assumed to be asbestos containing. The transite pipe, although observed to be in good condition, must be removed prior to demolition or renovation activities. Within the interior of the structure, ACMs were identified in the pipe insulation, heat exchanger insulation, vinyl floor tiles, interior drywall, air handling duct insulation, and fire door insulation. Altec concluded that all ACMs present in the structure must be properly removed or controlled by a registered and licensed asbestos contractor prior to any renovation or demolition work (Altec, 1998).

Phase I Environmental Site Assessment for Commercial Property, 5637 Santa Monica Boulevard, Los Angeles, CA 90038. May 31, 2001.

Northgate reviewed a Phase I ESA prepared by DCI Environmental Services (DCI) dated May 31, 2001 for the commercial property located at 5637 Santa Monica Boulevard. The property was identified as a single-story structure occupied by a commercial tenant, Shoes-For-U, with associated paved parking around the building. The report indicated that no above ground tanks or USTs were present at the facility nor were any clarifiers or regulated hazardous substances observed at the property. A single 55-gallon drum possibly containing glue was stored in the rear portion of the property. No spills, stains, or releases were observed or reported at the property. DCI recommended removing the 55-gallon drum or glue with no further environmental investigation (DCI, 2001).

Phase I Environmental Site Assessment, Commercial Property – Shoes 4 U Store, 5637 Santa Monica Boulevard, Los Angeles, California 90038. March 2003.

Northgate reviewed a Phase I ESA prepared by Altec dated March 2003 for the commercial property located at 5637 Santa Monica Boulevard. The report noted a site history, reconnaissance observations, and results and conclusions similar to those presented in the 2001 DCI Phase I ESA prepared for the same commercial property. The property was identified as a single-story commercial building built in 1931 that was occupied by a wholesale shoe store in 2003. The facility was not identified on any of the environmental databases searched but Altec noted that lead was reported at detectable levels in paint samples collected during a previous investigation. Several gasoline stations were identified in the vicinity and Altec concluded that sites in the vicinity of the property had a low potential for significant environmental contamination at the commercial property (Altec, 2003).

Paseo Plaza Mixed-Use Development, 5601 Santa Monica Boulevard, Los Angeles, California, Geotechnical Investigation. April 22, 2005.

Northgate reviewed a Geotechnical Investigation prepared by Geocon Inland Empire, Inc. (Geocon) dated April 22, 2005 for the commercial property located at 5601 Santa Monica Boulevard. The property was identified as a paved parking area in the northern portion and commercial buildings with parking lots in the southern portion as well as an existing Sears retail building in the southeastern corner. The Site was reported to be relatively flat with surface drainage by sheet flow to the adjacent streets.

During investigation activities, it was determined that the property was underlain by up to eight feet of artificial fill. This fill was believed to be the result of past grading and/or demolition activities at the property. This material was observed to consist primarily of dark brown clayey sand with minor traces of construction debris. Field exploration activities determined that the fill was underlain by alluvial soils consisting predominantly of interbedded silty to clayey sand, clay, and silt. Groundwater was encountered at depths of 21 to 28.5 feet bgs. Geocon indicated that it is their opinion that this first-encountered groundwater does not represent the static groundwater table but instead perched zones of saturated soils underlain by relatively impermeable layers of silt or clay (Geocon, 2005).

Soil and Groundwater Assessment Report, Sears Hollywood Poroperty, 5601 Santa Monica Boulevard, Los Angeles, California. December 7, 2006.

Northgate reviewed a Soil and Groundwater Assessment Report prepared by Rincon Consultants, Inc. (Rincon) dated December 7, 2006 for the commercial property located at 5601 Santa Monica Boulevard. The purpose of this investigation as to determine if any impacts exists to the subsurface as a result of the reported presence of two former 5,000-gallon USTs. According to the report, building permits on file with the City of Los Angeles indiacated that two, 5,000 gallon USTs were installed at a location approximately 65 feet south of the northern property line and 110 feet west of the eastern property line on the Site. However, there were no specific reports indicating either the installation or removal of the USTs.

During the investigation, soil samples collected from six borings advanced to depths of approximately 30 to 32 feet bgs were analyzed for TPH-g, total petroleum hydrocarbons as diesel (TPH-d), total petroleum hydrocarbons as motor oil (TPH-mo), semi-volatile organic compounds (SVOCs), benzene, toluene, ethylbenzene, and xylenes (BTEX), and oxygenates, and for lead.

Four groundwater samples collected from the borings were analyzed for the same constituents as the soil samples. TPH-g was detected in two groundwater samples at concentrations of 924 µg/L and 99 µg/L. However, the sample collected upgradient (north) of the USTs had a higher reported concentration than the sample collected downgradient. Rincon concluded that there was no evidence to suggest the resulting TPH-g impacts to groundwater were a result of the former USTs at the Site, but rather, a source upgradient of the property as TPH-g was not detected in soil samples and the concentrations in groundwater upgradient of the former tanks were higher than downgradient at the tanks. Rincon further concluded that groundwater treatment may be required if dewatering is included in future development (Rincon, 2006).

Geotechnical Investigation, Paseo Plaza Mixed-Use Development, 5661 Santa Monica Boulevard, Los Angeles, California. Revised April 17, 2007.

Northgate reviewed a Geotechnical Investigation prepared by Geocon dated as revised on April 17, 2007 for the commercial property located at 5661 Santa Monica Boulevard. The results of the investigation were similar to those presented in their earlier report dated April 22, 2005. The most notable concern, from an environmental standpoint, was the artificial fill encountered during field investigation activities (Geocon, 2007).

6.0 SITE RECONNAISSANCE

Current Site conditions were observed during a reconnaissance of the Site and near vicinity performed by Mr. Derrick Willis of Northgate on August 20th and August 27, 2015. Northgate was provided unescorted access to the Site by Mr. Ryan Eddy of Kennedy Wilson Brokerage Group. Site photographs from the reconnaissance are attached at the end of this report. A Site Inspection Map is shown on Figure 3 with inspection details of the former Sears auto center shown in Figure 4

6.1 Methodology and Limiting Conditions

The Site reconnaissance was performed by traversing the Site on foot. There were no limiting conditions.

6.2 General Site and Vicinity Conditions

6.2.1 Site

The Site consists of three lots totaling about 5.43 acres of land. Descriptions of each Lot are provided in the following sections.

6.2.1.1 Lot 1

Lot 1 is bound by Virginia Avenue to the north, Wilton Place to the west, Saint Andrews Street to the east, and Santa Monica Boulevard to the south and is improved with several commercial buildings and associated paved parking areas as further described below.

5601 Santa Monica Boulevard - Sears Building and Surrounding Area

The Sears Building is a four-story concrete tilt-up and brick building located on the southeast corner of Lot 1 at the intersection of Saint Andrews Place North and Santa Monica Boulevard. The concrete portion of the building consists of one basement level, a ground level, main level and a second story level that was utilized as the retail shopping areas. The third level contained shelving and storage rooms, presumably for stocking inventory, and a mechanical room. The mechanical room contained heating and ventilation equipment as well as mechanical motors for the freight elevator. In addition, two single-story brick buildings adjoin the rear of the main structure with a covered open area or alcove between them. The eastern brick building was utilized for loading of inventory. The open alcove area and western brick building appeared to be used for retail. Asphalt parking lots surround the Sears Building to the north and east as well as a large parking lot to the northwest. The asphalt is in poor condition with de mininis staining.

The Sears Building was unoccupied and mostly empty, with the interior partially stripped of wall and floor finishings; however, there were boxes and cabinets in the former shipping/receiving area, and demolition debris was present throughout the inside of the building. Shelving was still present on the third floor. In addition, several partially disassembled automobiles and used automotive parts were littered throughout the covered alcove area.

A pad-mounted Los Angeles Department of Water and Power (LADWP) electrical transformer is located inside a fenced compound in the parking lot to the north of the Sears Building. No staining or leaking was observed. Miscellaneous trash and debris was noted near the loading dock with is located at the rear (north) of the building.

5667 Santa Monica Boulevard – Former Sears Auto Center

The former Sears Auto Center building is located on the southwest corner of Lot 1 at the intersection of Santa Monica Boulevard and Wilton Place. The building contains a customer service/parts room, a 3-bay auto service garage inside the building and an open area eight-bay service area, and a room that contains a sink and drain that was presumably a small component service/repair area.

The building was boarded up and was heavily fire damaged with the roof caved in and debris scattered throughout the inside of the building. Steel support braces were in place to give stability to the walls. The open-area service bays contained the subgrade remnants of eight below-grade hydraulic automobile hoists. The concrete was heavily stained in the service areas and a vent line likely associated with an underground storage tanks was observed on the northeast corner of the building.

5637 Santa Monica Boulevard – Former Warehouse Shoe Sale Building

The former Warehouse Shoe Sale building is a single story, one room, masonry brick structure of approximately 3,500 square feet with a concrete foundation and tile floor with a roll-up vehicle door and two pedestrian doors in the rear. The front of the building is boarded up. The building is surrounded by an asphalt parking lot to the north (rear) and east of the building. The west side of the building abuts the adjacent structure which can be accessed via two roll-up doors large enough for a vehicle to pass through. The building is not currently used as a retail outlet; however the interior contains several vehicles in various states of being dismantled. In addition, used and partially disassembled engines, transmissions, used automotive parts, trash and associated debris litter the stained floors.

5645 Santa Monica Avenue – Former Howie's Liquor and Junior Store Building

The former Howie's Liquor and Junior Store building is a masonry brick structure of approximately 7,000 square feet with a concrete foundation/floor. The vacant building abuts the former Shoe Sale Warehouse building to the east and the former Linoleum City building to the west. There is asphalt paved parking to the rear of the building and the front is boarded up.

The interior of the building consist of three rooms with stairs and a partial mezzanine in the rear and is in extremely poor condition. Several walls are broken through and most of the suspended ceilings tiles are knocked out with much of the debris scattered across the floor. Partially disassembled automobiles and automobile parts are strewn across the building floor in all the rooms with oil pooling on the floor from a disassembled engine in at least one location. The inspection was conducted using a flashlight as all windows were boarded up. A drain was identified at the rear of the building.

5657 Santa Monica Avenue – Former Linoleum City Building

The former Linoleum City building is a concrete masonry brick building with concrete and tile floor of approximately 18,750 square feet that abuts the former Howie's Liquor and Junior Store to the east. The building is divided into three sections of approximately equal size by north-south oriented masonry walls. Several individual rooms (likely offices) are present in the center section. The outer sections of the building were presumably show rooms for retail product. The building is vacant and heavily fire damaged. There is no roof on the building; only steel roof trusses as well as steel support beams which were retrofitted after the fire damage to support the walls.

Considerable debris from the fire is lettered throughout the eastern portion of the building. The offices in the middle of the building heavily fire damage with burned and scorched wood framing with scattered drywall pieces that are still intact after the fire and fire extinguishing activities. The concrete and tile floor is in very poor condition with weeds growing through cracks in the floor.

5663 Santa Monica Avenue – Former 95 Cents Store

This building has been demolished and only the concrete floor with scattered tiles remain.

6.2.1.2 Lot 2

Lot 2 is addressed as 5442 Virginia Avenue and is an asphalt-covered parking lot, approximately 0.4 acres in size enclosed by a masonry block wall approximately 3 feet high on the three. An

eight-foot high chain-link fence extends around the complete perimeter with a sliding gate for vehicular access from Virginia Avenue. No structures exist on Lot 2; however, several concrete parking stops or curbs are located near the property perimeter. In addition, an electrical meter is present in the northeast corner of the property. The asphalt is in very poor condition with weeds growing through in many places.

6.2.1.3 Lot 3

Lot 3 is addressed as 5445 Virginia Avenue and is an asphalt-covered parking lot, approximately 0.6 acres in size enclosed by a masonry block wall approximately 3 feet high on all four sides with the exception of two 20-foot lengths on the south side to allow vehicular access from an alley and a small opening (approximately six feet wide on the north to allow for pedestrian ingress/egress. The masonry wall is set back approximately 8 feet from the northern property perimeter. In addition, an eight-foot high chain-link fence extends around the complete perimeter of the lot with two swing gates for all vehicular access via the alley. No structures exist on Lot 3. Approximately 50 concrete parking stops or curbs are located near the property perimeter and in the middle of the lot. Two plastic (crash-barrier type) sand bins were present on the property. The asphalt is in very poor condition with weeds growing through in many places.

6.2.2 Site Vicinity

The Site is bordered to the north by Virginia Avenue followed by residential development then the Interstate 101 freeway. The Site is bordered to the south by Santa Monica Boulevard followed by commercial development then residential development. Residential development borders the Site to the east followed by residential development. The Site is bordered to the west by North Wilton Place followed by commercial and residential development. The Site vicinity is primarily residential development with some interspersed commercial development.

7.0 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

This report presents the results of a Phase I ESA performed by Northgate for the Client at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California. The Site consists of 5.43 acres of land. The Site is developed as a former commercial development, including an automobile repair facility, and asphalt paved parking lots. The Site is divided into three separate lots, Lot 1, Lot 2, and Lot 3 as shown in Figure 3 with inspection details of the former Sears auto center shown in Figure 4.

Our review indicates that the Site was initially developed in the early 1900s for residential development. By 1928, Lot 1 was developed with residential and commercial development, including a gasoline service station located on the southwest corner of the Lot. Commercial development expanded from the 1930s through the 1960s across the southern half of Lot 1 to include a Sears department store, restaurants, a bakery, an automobile repair facility, a beauty school, and other retail shops. The northern half of Lot 1 was developed as a parking lot. The gasoline service station was no longer present at the Site by the 1940s. Lot 1 remained relatively unchanged until about 2009 when fire appears to have damaged the western portion of the Site. By 2010, the commercial buildings on Lot 1 appear to have been abandoned.

Lot 1 is currently occupied by the remnant retail buildings and associated paved parking lot. The retail buildings, including a Sears retail store, four former retail spaces, and a former Sears Auto Center automotive service garage containing eight in-grade hydraulic lifts, are currently vacant and unoccupied.

Lots 2 and 3 remained developed with residences until the late 1940s when Lot 3 was developed as a paved parking. Lot 2 became a paved parking lot in the 1950s. Lots 2 and 3 are presently occupied by asphalt paved lots with no structures.

Addresses historically associated with Lot 1 (odd-numbered addresses on the 5600 block of Santa Monica Boulevard) are listed on the RCRA-SQG, HIST UST, FID UST, SWEEPS UST databases, the US EPA FINDS database, and the EDR Historical Auto Station database. The SQG, UST, and FINDS listings relate to a UST for waste oil and other chemical storage associated with automobile repair performed by Sears. The database listings indicate that a waste oil UST was present at 5601 Santa Monica Boulevard in 2004. It should be noted that 5601 Santa Monica Boulevard is the main Sears department store building, and it is not known if the UST was located at this address.

Site listings on the EDR Historical Auto Stations database include listings from 1924 for an automobile service station at 5615 Santa Monica Boulevard and an automobile repair facility

located at 5617 Santa Monica Boulevard, a 2002 listing for auto-body parts at 5643 Santa Monica Boulevard, and a 2009 listing for the Sears Auto Center at 5667 Santa Monica Boulevard. No further information was provided for these listings.

Various reports were previously prepared for the Site. An asbestos survey conducted in 1998 at the Sears commercial building located at 5601 Santa Monica Boulevard indicated the presence of ACMs in both the interior and exterior materials of the structure. A Phase I ESA completed in 2001 for the commercial property at 5637 Santa Monica Boulevard did not identify USTs or other chemical storage at the Site, other than one 55-gallon drum of apparent glue material. A geotechnical investigation was performed in 2005 for the Site with subsequent revisions. These reports identified artificial fill material present in the upper 8 feet of soil that underlies the Site. The final report reviewed was for a soil and groundwater assessment conducted in 2006. This investigation was performed to evaluate potential impacts to the subsurface related to the presence of the USTs previously presumed to be present north of the Sears building at 5601 Santa Monica Boulevard. TPH-g or other hydrocarbons were not detected in any of the soil samples collected during the investigation. However, two groundwater samples contained TPH-g of 924 µg/L in a boring advanced upgradient of the presumed location of the former USTs and 99 µg/L in one boring advanced downgradient of this location. The report concluded that no apparent impacts as a result of the former USTs was observed on the Site and the groundwater impacts are likely the result of an upgradient, off-Site source.

In summary, we have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527 of 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in Los Angeles, California. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of RECs in connection with the property except for the following:

- A former automobile repair facility is present on the southwest corner of Lot 1 at 5667 Santa Monica Boulevard. The remnants of eight former in-grade hydraulic lifts are present in the building at that location. In addition, a vent pipe likely associated with a UST is present on the building wall.

Additionally, Northgate identified the following HREC:

- The southern portion of Lot 1 was previously identified as automobile repairing and service stations in 1924 and is listed on the EDR US Historical Automobile Stations database. No further information regarding these facilities was available. Given the nature of historic automobile repairing and service stations, Northgate could not rule out the potential for impacts to soil, groundwater, and/or soil vapor as a result of these historic operations.

- Previous investigations indicate the former presence of two 5,000 gallon USTs at the former Sears Department store located on the southeast corner of Lot 1. Soil and groundwater testing previously performed in the vicinity of the reported UST location did not identify significant impact and did not recommend additional investigation.

Our review also identified the following potential environmental concerns:

- A former laundromat facility was identified on Lot 1 at 5663 Santa Monica Boulevard. Although no indications of chemical use, storage, or release was documented, Northgate could not rule out the potential for impacts to the subsurface as a result of these historic operations;
- The subject property has existed in a mixed-use neighborhood since circa the 1920s. Properties in the vicinity of the subject property and topographically upgradient and crossgradient were identified as auto garages and historical auto stations, including the facilities located immediately adjacent to the Site. Although no records of contamination impacting the subject Site were identified as part of the regulatory review, the potential for soil contamination and groundwater contamination cannot be ruled out based on the long-term and historic applications of the Site vicinity; and
- Based on the age of the structure, it is possible that ACMs and lead based paints (LBPs) are potentially present in building materials within the structure. ACMs were identified in the Sears commercial building (5601 Santa Monica Boulevard) in 1998 and it is likely that ACMs and LBPs are present in the other structures on Site.

Northgate recommends the following:

- Conduct a soil, soil vapor, and groundwater investigation in the vicinity of the former Sears automobile repair facilities, and elsewhere across the Site to evaluate potential subsurface impacts related to historic on-Site and off-Site chemical use and operations;
- Develop a soil management plan to address any potentially impacted soil that could be encountered during Site redevelopment; and
- Conduct a survey for ACMs and LBPs and other regulated building materials in all structures on the Site and prepare a demolition plan for managing any identified hazardous materials.

A registered geologist's certification of conditions comprises a declaration of his or her professional judgment. It does not constitute a warranty or guarantee, expressed or implied, nor does it relieve any other party of its responsibility to abide by contract documents, applicable codes, standards, regulations, and ordinances.

1.0 INTRODUCTION

This report presents the results of a Phase II Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for 5545 Virginia Ave Owner, LLC, 5544 Virginia Ave Owner, LLC, and 5601-5667 Santa Monica Blvd. (LA) Owner, LLC ("the Client") for the property located at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California (the Site). The Site consists of approximately 5.43 acres of land currently developed vacant commercial buildings, including a former department store, several former retail shops, a former automobile repair facility, and asphalt paved parking lots. A Site Location Map is shown on Figure 1 and a Site Plan is shown on Figure 2. The Site is divided into three separate lots, Lot 1, Lot 2, and Lot 3, as shown in Figure 3.

1.1 Authorization

The Client requested that Northgate conduct a Phase II ESA to evaluate the potential presence of impacts related to issues of environmental concern identified in a Phase I ESA prepared for the Site by Northgate on September 25, 2015 (Northgate, 2015a). Issues of environmental concern identified in that report included long-term historic automotive repair operations at the Site and in the immediate vicinity of the Site as well as historic dry cleaning operations located at the Site. The objective and scope of work for this assessment were outlined in Northgate's proposal dated August 27, 2015 (Northgate, 2015b).

1.2 Objectives

The primary objective of the Phase II ESA was to assess the potential presence of soil, soil vapor, and groundwater quality impacts related to the long-term historic automotive repair operations at the Site and in the immediate vicinity of the Site, as well as historic dry cleaning operations located at the Site.

1.3 Scope of Work

The Phase II ESA was conducted in general accordance with our *Proposal for Phase II Environmental Site Assessment, 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue, Los Angeles, California* dated August 27, 2015 and approved by the Client on September 3, 2015. The scope of work included the following:

- Site walk to mark the proposed boring locations, and notification to Underground Service Alert (USA) for underground utility clearance;
- Preparation of a Site-specific Health and Safety Plan (HASP);

- Advancement of four borings ranging from 36 to 38.5 feet below ground surface (bgs), with collection of soil samples at depths ranging from 5 to 25 feet bgs, based on field indicators from each boring; and collection of grab groundwater samples from each boring;
- Advancement of four borings to 15 feet bgs, with collection of soil samples at approximate depths of 5, 10, and 15 feet bgs, based on field indicators and soil recovery, from each boring;
- Analysis of fourteen selected soil sample for VOCs analysis and sixteen selected soil samples for total petroleum hydrocarbons carbon-chain (TPH-cc);
- Collection and analysis of four groundwater sample for volatile organic compounds (VOCs) and TPH-cc and analysis of one groundwater sample for Title 22 metals;
- Installation of eight temporary soil vapor sample probes at 5 feet bgs and analysis of soil vapor samples for VOCs; and
- Preparation of this report.

2.0 BACKGROUND

2.1 Site Description

The Site consists of approximately 5.43 acres of improved land located at 5609-5667 Santa Monica Boulevard, 5542 Virginia Avenue, and 5545 Virginia Avenue in the City of Los Angeles, California. The Site consists of thirteen parcels identified as Assessor's Parcel Numbers (APNs) 5536-008-013, 5536-011-010, 5536-012-004, -005, -006, -007, -009, -010, -011, -012, -013, -014, and -015 in Los Angeles County developed for commercial land use. A Site Vicinity Map is shown on Figure 1 and a Site plan map is shown on Figure 2.

2.2 Site History

Northgate previously conducted a Phase I ESA at the Site (Northgate, 2015a). The following areas of potential environmental concern associated with potential impact to the subsurface were identified:

- Based on Northgate's review of historical documents, the Site property identified as 5663 Santa Monica Boulevard was historically occupied by Snow White Laundromat from about the time was building was constructed in 1954 to at least 1967. Laundromat's during this time often contained coin operated dry cleaning machines that have been the subject of documented releases of tetrachloroethylene, a dry cleaning solvent, to soil and groundwater.
- Based on Northgate's review of historical documents and the Environmental Data Resources, Inc. (EDR) database report the Site property identified as 5667 Santa Monica Boulevard was historically used as an auto service facility from between 1955 until and at least 2009. This property is located at the intersection of Santa Monica Boulevard with Wilton Place and was identified as most recently as the Sear's Auto Center in 2008 and 2009 and is listed as auto service in 1955 and 1961. It appears this is only location on Site to be formerly used as for auto repair. While a historic registered waste oil underground storage tank (UST) is listed at the address of the main Sears store at 5601 Santa Monica Boulevard, it is likely the referenced waste oil UST is located at the 5667 Santa Monica Boulevard location. This is consistent with Northgate's reconnaissance survey where a UST vent pipe was observed on the 5667 Santa Monica Boulevard building. In addition, eight hydraulic lifts and drain sample box were observed at the closed Sear Auto Service facility.

  While there is no documented evidence of a release, the former Sears store building, which is currently closed, is listed as the Green Hornet Santa Monica as a Resource Conservation and Recovery Act (RCRA) waste generator in the EDR Database report. Prior to construction of the Sears store in 1928, a portion of the property along

Santa Monica Boulevard (#5617) is listed as auto repair and as an auto service station in 1924. Northgate's reconnaissance survey also identified the use of on Site buildings addressed as 5637 and 5645 Santa Monica Boulevard for various aspects of auto repair as disassembled engines and auto parts were present in the building.

2.3 Regional and Local Geology and Hydrology

Regionally, the site is located within the foothills of the Santa Monica Mountains, within the Transverse Ranges of Southern California (Norris, R.M. and Webb, R.W., 1990). The Santa Monica Mountains consist mainly of granitic and metamorphic rocks. Elevation at the Site is approximately 320 feet above mean sea level within. The site lies near the La Brea High and Hollywood Piedmont physiographic regions (CDWR, 1961). Quaternary alluvium composed of gravel, sand, silt and clay, forms the shallow sediments beneath the Site. Underneath these alluvial sediments lies the upper Pleistocene Lakewood formation. Exposed Upper Mesozoic granitic and mid Miocene marine clastic rocks of the Middle Topanga formation make up the elevated topography north of the Site. Outcrops of the Upper Miocene Monterey Shale make up the Elysian Hills to the east (Dibblee, 1991).

Information contained in a Geotechnical investigation of the property at 5661 Santa Monica Boulevard performed in 2007 (Geocon, 2007) indicates that subsurface soils at the Site consist of artificial fill material to a depth of up to eight feet below ground surface (bgs). The artificial fill is underlain by interbedded layers of poorly to well-graded, fine to coarse-grained sand and silty sand, clay and silt to the total depth explored of 90 feet bgs.

Hydrologically, the subject Site is located in the Los Angeles Groundwater Basin within the Hollywood Sub-basin. The regional groundwater flow direction within the Hollywood Sub-basin is westward toward the Inglewood Fault (CDWR, 2004). The aforementioned Lakewood Formation includes the Exposition and Gage Aquifers. The Exposition Aquifer is shaped as a wedge that dips to the south and intersects the surface nearly one half mile south of the site. The Gage Aquifer, which underlies the Exposition Aquifer, pinches out approximately 1.25 miles south of the site (CDWR, 1961).

Groundwater was encountered in previous geotechnical borings advanced at the Site at depths between 21 and 28.5 feet bgs. The first encountered groundwater may represent perched zones rather than a true regional groundwater system. Groundwater in the vicinity of the Site is reported to be directed towards the southwest (EDR, 2015b). Groundwater was encountered during this investigation at 31 to 33 feet bgs.

3.0 INVESTIGATION METHODS

Northgate conducted soil, groundwater, and soil vapor sampling at the Site on September 30 and October 1, 2015. A boring location map is shown on Figure 3.

3.1 Pre-Field Activities

Before sampling activities began, Northgate coordinated Site access with Mr. Fred Cordova of Kennedy Wilson Brokerage Group, Beverly Hills, California. Other pre-field activities included the specific tasks outlined below.

3.1.1 Health and Safety Plan

Northgate prepared a Site-specific HASP for the Phase II ESA. The HASP was prepared in accordance with applicable federal and state regulations. The HASP addressed the potential for exposure to hazardous constituents, and delineated the general safety procedures that are required for the safe operation of mechanical equipment to be used while conducting the field operations at the Site.

3.1.2 Clearance of Underground Utilities

USA was notified, as required by law, 48-hours prior to the sampling event before any intrusive activities began in order to locate utilities and other subsurface obstructions in the vicinity of the borings.

3.2 Soil Sampling and Analysis

Eight borings (B-1 through B-4, and GW-1 through GW-4) were advanced across the Site as shown on Figure 4, and as described below:

- Boring B-1 was advanced to 10 feet bgs adjacent to a service drain in the northern room (assumed small component repair room) of the former Sears Auto Center;
- Borings B-2 through B-4 were advanced to 15 feet bgs adjacent to underground automotive hoists and stained areas in the former Sears Auto Center;
- Boring GW-1 was advanced to 36 feet bgs northeast of the former Sears Auto Center Building near the assumed location of the former underground storage tanks (USTs);
- Boring GW-2 was advanced to 36 feet bgs adjacent to the most southerly automotive lifts at the former Sears Auto Center Building near the assumed location of the former waste-oil underground storage tank (UST)

- Boring GW-3 was advanced to 37 feet bgs adjacent to the drain line connection at the rear of the former 99 Cents store building foundation (former Snow White Laundromat); and

- Boring GW-4 was advanced to 38.5 feet in the former Howie's Liquor and Junior Store building where automotive service operations were identified during Northgate's Phase I ESA.

All borings were advanced by Interphase Environmental, Inc. of Commerce, California (Interphase), using a Geoprobe rig. Soil samples were screened using a photoionization detector and visual observation for selection of chemical analysis. Soil samples were collected for selected chemical analysis at 5-foot intervals. The samples were collected in acetate sleeves and also using Lock^{n}Load^{TM} sampler and preserved in ethanol and sodium bisulfate in volatile organic analysis (VOA) vials in compliance with Environmental Protection Agency (EPA) Method 5035. After the soil sampling was completed, the borings were backfilled with hydrated bentonite to the surface and a concrete or asphalt plug was placed at the surface to match existing conditions. Soil sampling methodology is further described in Appendix A.

Soil samples were labeled, stored on ice in a cooler, and transported to SunStar Laboratories, Inc. (SunStar), a California certified laboratory in Lake Forest, California, under proper chain-of-control custody for analysis. Soil samples were analyzed for VOCs using EPA Method 8260 and for TPH-cc using EPA Method 8015M.

3.3 Groundwater Sampling

Grab-groundwater samples were collected from borings GW-1 through GW-4 by lowering a disposable microbailer through the Geoprobe drive rods to a temporary well screen installed at the bottom of the boring. Boring GW-1 and GW-2 were advanced to 36 feet bgs, boring GW-3 was advanced to a depth of 37 feet bgs, and boring GW-4 was advanced to 38.5 feet bgs. The samples were analyzed in an on-Site mobile laboratory for VOCs using EPA Method 8260B and for TPH-cc using EPA Method 8015M by a fixed location laboratory. Groundwater sampling methodology is further described in Appendix A.

3.4 Soil Vapor Survey

Temporary soil vapor probes (SVPs) were advanced in in eight locations across the Site, SV-1through SV-8, as shown on Figure 3. The SVPs were installed 2-1/4 inch inside-diameter hollow drill rods. The probe consisted of a 3/8" x 1" Stone PolyPro vapor probe implant with 1/4-inch Speed Fit installed at 5 feet bgs. Nylaflow tubing (¼ inch diameter) was connected from the implant to the ground surface, and terminated above the existing concrete slab. The

borehole annulus around the implant and tubing was filled through the drill rods with sand 6 inches above and below the implant, 12 inches of dry bentonite placed 1 foot above the sand and hydrated bentonite chips from above the sand to the ground surface.

The SVP locations are described below.

- SV-1was installed adjacent to the drain in the northern room of former Sears Auto Center building;
- SV-2 was installed in the interior automotive bays of the former Sears Auto Center building;
- SV-3 was installed in the southern portion of the former Sears Auto Center building;
- SV-4 was installed south of the exterior service bays of the former Sears Auto Center;
- SV-5 was installed adjacent to a drain line connection at the rear of the former 99 Cents store building foundation (former laundromat);
- SV-6 was installed adjacent to a drain at the rear of the former Shoe Warehouse (where prior automotive service operations were noted during the Phase I ESA;
- SV-7 (was installed inside the former Shoe Warehouse building (where prior automotive service operations were noted during the Phase I ESA; and
- SV-8 was installed adjacent to a storm drain in the main Sears building alcove area.

After installation, each temporary probe was allowed to stabilize two hours. Prior to sampling, each probe was purged of approximately three well volumes of air. A vapor sample was then collected from each probe using a summa canister and flow regulator that maintained a flow rate of 150 milliliters per minute. Each sample was analyzed for VOCs using EPA Method 8260B in an on-Site mobile laboratory. A soil vapor sample could not be extracted from probe SV-1 due to very limited vapor flow.

After the soil vapor survey was conducted, the SVPs were removed and the borings backfilled with hydrated bentonite to just below the slab. Soil vapor sampling methodology is further described in Appendix A.

4.0 INVESTIGATION RESULTS

4.1 Subsurface Conditions

All drilling locations were covered with approximately 3 inches of concrete or asphaltic concrete underlain by approximately 6 inches of crushed miscellaneous base fill material.

The subsurface at the Site generally consists of interbedded clayey silt, silt and silty clay with thin sand lenses to approximately 30 feet bgs. This is underlain by a very fine to medium grained wet to saturated sand zone encountered between 29 and 37 feet bgs.

During this investigation, groundwater was encountered at depths of approximately 31 to 33 feet bgs beneath the Site. A boring location map is shown on Figure 4 and a copy of the field notes with the boring logs is attached in Appendix B.

4.2 Analytical Results

4.2.1 Soil Sampling Analytical Results

As shown in Table 1, no VOCs were detected above laboratory method reporting limits (MRLs) in the fourteen samples analyzed. As shown in Table 2, total petroleum hydrocarbons as gasoline (TPH-g) and total petroleum hydrocarbons as motor oil (TPH-mo) were not detected above the laboratory MRLs in any of the samples collected. Total petroleum hydrocarbons as diesel (TPH-d) was measured in one soil sample collected at 10 feet bgs from boring B3 at a concentration of 17 milligrams per kilogram (mg/kg). This reported concentration did not exceed the Regional Water Quality Control Board (RWQCB) TPH maximum soil screening level (SSL) of 1,000 mg/kg. A copy of the laboratory analytical reports is shown in Appendix C.

4.2.2 Groundwater Sampling Analytical Results

As shown in Table 3, trichlorofluoromethane (Freon 11) was reported in all four samples at concentrations ranging between 4.3 and 21 micrograms per liter (µg/L). Chloroform was detected at concentrations between 1.4 and 14 µg/L in three samples. Tetrachloroethene (PCE) was measured in two samples at concentrations of 1.4 and 3.3 µg/L. None of the reported concentrations exceeded their respective California EPA Maximum Contaminant Levels (MCLs).

As shown in Table 4, TPH-g, TPH-d, and TPH-mo were not reported in any of the four groundwater samples collected above their respective laboratory MRLs. One groundwater sample, GW-1, was additionally analyzed for metals. Barium, molybdenum, and mercury were

detected at concentrations of 95, 82, and 1.7 µg/L, respectively, as shown in Table 5. None of these detected concentrations exceeded their respective MCL. A copy of the laboratory analytical report is shown in Appendix C.

4.2.3 Soil Vapor Analytical Results

Soil vapor sample test results are shown in Table 6. Methylene chloride (dichloromethane) was reported in two of the soil vapor samples, SV-3 and SV-8, at concentrations of 0.67 and 0.62 µg/L, respectively. Chloroform was measured in two soil vapor samples, SV-4 and SV-8, at concentrations of 0.11 and 0.12 µg/L, respectively. Residential and commercial/industrial California Human Health Screening Levels (CHHSLs) have not been established for these analytes. The detected values for methylene chloride and chloroform are just slightly above the laboratory method reporting limits (MRLs) of 0.50 and 0.10 µg/L, respectively.

Benzene was detected in four of the soil vapor samples collected at concentrations ranging between 0.11 and 0.14 µg/L. All of the reported benzene concentrations in soil vapor exceeded the residential CHHSL of 0.036 µg/L and two of the benzene soil vapor sample results, 0.14 µg/L at SV-2 and 0.13 µg/L at SV-3, exceeded the commercial/industrial CHHSL of 0.122 µg/L. PCE was additionally measured at 0.16 µg/L in the primary soil vapor sample from SV-4 and at 0.13 µg/L in the duplicate sample from SV-4, which were below the residential and commercial/industrial CHHSLs. Naphthalene was reported in one soil vapor sample collected from SV-5 at a concentration of 0.22 µg/L, which exceeded both the residential CHHSL of 0.032 µg/L and the commercial/industrial CHHSL of 0.106 µg/L. No other VOCs were detected in the soil vapor samples analyzed. A copy of the laboratory analytical reports is shown in Appendix C.

5.0 CONCLUSIONS AND RECOMMENDATIONS

This investigation consisted of the analysis of thirty soil samples, nine groundwater samples, and seven soil vapor samples, plus a duplicate, collected from eight borings and seven soil vapor probes adjacent to areas of the Site where Northgate's Phase I ESA indicated the possible historic use of hazardous materials.

5.1 Soil

TPH-g, TPH-mo, and VOCs were not detected in any of the soil samples analyzed. TPH-d was detected in only one soil sample at a level two orders of magnitude below the RWQCB SSL.

5.2 Groundwater

Freon 11 and chloroform were detected at low concentrations in almost all of the groundwater samples. These compounds are not expected to be associated with historic site operations as they are common laboratory cleaning chemicals and are therefore assumed to be laboratory contaminants.

PCE, a common solvent used in dry cleaning operations as well as general degreasing operations, was detected in the grab groundwater samples collected from GW-1 (located in the assumed location of the USTs associated with the former Sears Auto Center) and GW-3 (located at the former laundromat) at concentration below MCLs. While the concentrations are below any screening criteria that require any remedial action, they are indicative of a historic release or spill to the subsurface and PCE may be present on the Site at concentrations above regulatory screening criteria.

5.3 Soil Vapor

Benzene, a component of gasoline, was detected in soil vapor samples collected from two SVPs located inside former Sears Auto Center (SV-2 and SV-3), one SVP located on the former 99 Cent Store building foundation (historical laundromat) near a drain line connection (SV-5 adjacent to the Sears Auto Center) and one SVP located in the alcove area at the Main Sears building SV-8 where auto maintenance operations were observed during the Phase I ESA site reconnaissance and where gas and oil may have historically been stored for retail purposes. Benzene concentrations exceeded the commercial CHHSL in two locations in the former Sears Auto Center indicating a potential vapor intrusion risk for future development.

Napthalene, a common fumigant, was detected in one sample from SV-5, located on the former 99 Cent Store building foundation at a concentration exceeding the commercial CHHSL and may also be a potential vapor intrusion risk for future development.

PCE was detected in SV-4, located inside the auto service bay area of the Sears Auto Center; however, the concentrations were below commercial and residential CHHSLs.

Since the above listed compounds were either not detected in groundwater, (or in the case of PCE where it was detected but at very low concentrations), the presence of benzene, naphthalene, and PCE in soil vapor is indicative of a of a historic release or spill to the subsurface and these compounds may be present on the site in soil at concentrations above regulatory screening criteria.

Given the long history of former automotive operations and the possible historic dry cleaners at the Site coupled with the compounds found in soil vapor, there is a reasonable probability that there may be localized areas on the property where soil and/or soil vapor concentrations may exceed both residential and commercial regulatory screening levels.

To that end, Northgate recommends the installation of engineering controls, such as a passive sub-slab vapor barrier and venting system, be considered beneath the buildings (depending on depth of basements) as part of the development plan for the Site. In addition, Northgate recommends that a soil management plan be developed to address any potentially impacted soil that could be encountered during development.

6.0 LIMITATIONS

The purpose of a geologic/hydrogeologic study is to reasonably characterize existing site conditions based on the geology/hydrogeology of the area. In performing such a study, it is understood that a balance must be struck between a reasonable inquiry into the site conditions and an exhaustive analysis of each conceivable environmental characteristic. The following paragraphs discuss the assumptions and parameters under which such an opinion is rendered.

No investigation is thorough enough to describe all geologic/hydrogeologic conditions of interest at a given site. If conditions have not been identified during the study, such a finding should not therefore be construed as a guarantee of the absence of such conditions at the site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

We are unable to report on or accurately predict events that may change the site conditions after the described services are performed, whether occurring naturally or caused by external forces. We assume no responsibility for conditions we were not authorized to evaluate, or conditions not generally recognized as predictable when services were performed.

Geologic/hydrogeologic conditions may exist at the site that cannot be identified solely by visual observation. Where subsurface exploratory work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at unsampled locations.

APPENDIX A

FIELD PROCEDURES

APPENDIX A – FIELD PROCEDURES

Soil Sample Collection Procedures – Geoprobe Rig

Drilling of Soil Borings

Soil borings were advanced by BC2 Drilling, Inc. (BC2), using a truck-mounted Geoprobe™ 6600 direct push rig. The borings were advanced using 2.25 inch diameter hollow rods. The lead drilling rod contained a removable 1.5 inch core sampler that was retrieved at the end of each run. Acetate sleeves were used as liners for the core sampler to collect undisturbed soil samples as the rods were advanced.

Sample Identification

All soil samples were identified and labeled at the time of collection. Sample identification followed a specific format that contained the boring identification and sample depth to ensure that all sample numbers were unique.

Sampling Procedure

After retrieval of the soil samples, the acetate sleeve was cut for each desired sampling interval, capped with Teflon tape and plastic caps, then sealed with Parafilm laboratory-grade tape. Soil samples were transferred to glass jars and/or Volatile Organic Analysis (VOA) 60 ml glass vials, depending on analytical requirements.

All samples analyzed for Volatile Organic Constituents (VOCs) were collected using EnCore™ samplers, which were advanced into the undisturbed soils as per EPA Method 5035. The soil cores were placed in VOA containers pre-preserved with methanol and sodium bisulfate, and then sealed. The samples were labeled and stored in a chilled cooler pending delivery to the analytical laboratory. Strict chain-of-custody protocol was followed throughout all phases of the sample handling process.

Equipment Cleaning

To reduce the potential for cross contamination, all equipment and tools were cleaned before introduction borehole. Tools were scrubbed with a laboratory-grade detergent and double-rinsed with distilled water between sampling points.

Groundwater Sample Collection Procedures

Drilling of Soil Borings

Soil borings were advanced to groundwater using a truck-mounted Geoprobe rig or limited access rig. Following soil sample collection, temporary wells were installed in the borings.

To reduce the potential for cross contamination between borings, the Geoprobe rods and sampling equipment were cleaned prior to use at each drilling location.

Sample Identification

All groundwater samples were identified and labeled at the time of collection. Sample identification followed a specific format to ensure that all sample numbers were unique.

Sampling Equipment

A new disposable PVC screenpoint sampler was used for each sampling event. The Screen Point Sampler and associated assemblages were triple-rinsed prior to each installation using an approved non-phosphate detergent solution. Detergent was rinsed from the parts initially with tap water followed by a distilled-water rinse. The disposable microbailer was disposed of after its use.

A groundwater sample was collected by lowering a disposable microbailer through the drive rods to the Screen Point Sampler (or temporary well) using cotton or nylon string.

Groundwater samples were collected in VOA containers pre-preserved with hydrochloric acid (HCl) and sealed. The samples were labeled and stored in a chilled cooler pending delivery to the analytical laboratory. Strict chain-of-custody protocol was followed throughout all phases of the sample handling process.

Soil Vapor Sample Collection Procedures

Installation of Temporary Soil Vapor Monitoring Probes

Temporary soil vapor monitoring probes (VMPs) were constructed by BC2 in the same locations as soil borings. Borings were advanced using a GeoProbe™ 6600 direct push rig equipped with hollow drill rods approximately 2.25 inches in diameter. The drill rods were sealed at the bottom end until the desired depth was reached, then the end cap was unlatched and retrieved to expose the native soils ahead of the drill steel. VMPs were constructed inside the drill rods which were retrieved as the annular fill materials were placed.

The VMPs consisted of a 6-inch long stainless steel implant at the desired probe depths. Nylaflow tubing (0.33 inch diameter) was connected from the implant to the ground surface, and terminated above the existing surface with a valve.

At the completion of vapor sampling, the borings were abandoned by removing the tubing and backfilling the borings with hydrated amorphous bentonite. The upper 6-inches of the borings were abandoned using cold-patch asphalt compacted and stained to match the existing surface.

Sample Identification

All soil vapor samples were identified and labeled at the time of collection. Sample identification followed a specific format to ensure that all sample numbers were unique and was recorded on laboratory supplied forms.

Sampling Equipment

After installation, each probe was allowed to stabilize two hours. Prior to sampling, each probe was purged of approximately three well volumes. A sample was collected from each probe by the mobile laboratory staff using a glass syringe, then immediately transported to the mobile laboratory for analysis.

The samples were analyzed for VOCs using EPA Method TO-15. Strict chain-of-custody protocol was followed throughout all phases of the sample handling process.

07:15	Interphase to setting up on at Sears Auto Center
07:30	Set up on SV-3, hit hard obstruction @ 3', move over 2 ft, hit same obstruction @ 3', move 2' to N - no obstruction, advance to 5'
07:55	SV-3 installed to 5'
0:800	Set up on SV-2 - receive call back from Fred, we he will work access for Sears Bldg
0815	Set probes in SV-2 - 5'
08:20	Set up on SV-1
08:40	SV-1 installed
08:45	Set up on B-1
9:10	SAMPLE @ 5', 180 ppm on PID, advance SAMPLE TO 10' ++ Interphase missing drive-head
09:40	Up and Running
09:45	~~Collect to SAMPLE~~ ADVANCE TO 10' - continuous core
09:55	Collect 10' SAMPLE
10:05	Interphase modifying drill casing to work as drive head
10:25	Mob to B2 -
11:05	TD @ 15', samples collected every 5, continuous core
11:15	Set up on B3 advance to 15', SAMPLES COLLECTED every 5' TD
11:45	
11:55	Set up's B4 SAMPLE every 5 ft to 15 feet, continuous core
12:25	TD
12:30	Mob to SV-4 - @ Auto Center
12:50	SV-4 completed
1:00	Mob to SV-5 @ Farm Laundromat, install
1:30	Mob to SV-6 - N of Shoe Warehouse, install
1:50	SV-6 installed
1:55	Mob to SV-7 inside Shoe Warehouse
2:15	installed
2:20	Mob to SV-8 in Sears Alleye -
2:40	SV-8 installed
	demob
3:30	leave site, travel to lab, drop off samples - back to office @

ACTIVITIES

Time:	Activities (include event, time, observations, observers, etc.)
06:00	Travel to site, pick up ice
06:30	ON SITE. Meet w. Interphase, Tail gate safety mtg
06145	Set up on GW-1, rear of Sears Auto Center near suspected location of UST
07:00	Meet in H&P
07:05	Drill and sample @ GW-1 to 36'
~~07:15~~	collect GW SAMPLE @ 8:15
07:15	H&P HAS. Set up to start soil vapor SAMPLES
0815	collect GW SAMPLE from GW-1
08:30	backfill borng
~~0915~~	Set up on GW-2 @ front of Sears Auto Center
0940	Advnd to 36', leave well in place
11:00	Set up on GW-3 - former dry cleaner, collect soil SAMPLES/ continuous core
12:00	ADVANCE to 36', set temp well
12:30	Setup to SAMPLE GW-2
12:50	SAMPLE GW-2
1:00	BACKFILL GW-2
1:30	Set up to SAMPLE GW-3 WL = 31.6'
1:35	SAMPLE GW
	Abandon and backfill bg GW-3
2:00	Mob track-mounted geoprobe rig to GW-4
2:30	Start drilling GW-4 - continuous COR
4:00	Advance to 38' refusal - ~~no GW~~
	set, let stand gauge, water @ 33.41'
4:10	collect GW Sample
4:20	Grout boring clean up
5:00	Depart site

DAILY SITE SAFETY MEETING RECORD

Recorded By: Derrick Wilks
Date & Time: 10/1/15 06:45
Project No.: 2050.10.02
Project Name: Seabreeze Blvd
Project Location: 5667 Santa Monica
Field Activities: Drill and sample soil, GW, SVPs

Chemicals Present: TPH, VOCs

SAFETY TOPICS DISCUSSED

Protective Clothing/Equipment: Level D

Hazards of Chemicals Present: Potential fuel hydrocarbons

Physical Hazards: trips, slips, falls

Special Hazards:

Other Topics of Concern:

SITE SAFETY CHECKLIST	YES	NO
Attached Signature Page	✓	
Written Health and Safety Plan (HASP) is on-site	✓	
Information in the HASP matches conditions and activities at the site	✓	
Site personnel have appropriate training and certification and medical clearance	✓	
Air monitoring equipment has been calibrated daily	✓	
Site zones are set up and observed where appropriate	✓	
Access to Work Areas is limited to authorized personnel	✓	
Decontamination stations (including hand/face wash) are set up and used	✓	
Personal protective equipment used matches HASP requirements	✓	
Emergency and First Aid equipment is on-site as described in the HASP	✓	
Drinking water is readily available	✓	

Note: All "NO" answers must be addressed & corrected immediately. Note additionally health and safety observations here.

Notes and Definitions

S-GC	Surrogate recovery outside of established control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
S-11	The surrogate recovery was above acceptance criteria in the sample. The sample is ND for the analytes of interest. The surrogate recovery was within acceptance criteria in the method blank and LCS.
D-02	Hydrocarbon pattern present in the requested fuel quantitation range, but does not resemble the pattern of the requested fuel.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Notes and Definitions

S-GC	Surrogate recovery outside of established control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QR-02	The RPD result exceeded the QC control limits; however, both percent recoveries were acceptable. Sample results for the QC batch were accepted based on percent recoveries and completeness of QC data.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

H&P Project: NG100115-SB1
Client Project: 2050.10.02S / 5601 Santa Monica Blvd

Dear Mr. Derrick Willis:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 01-Oct-15 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

Notes and Definitions

QL-1H	The LCS and/or LCSD recoveries fell above the established control specifications for this analyte. Any result for this compound is qualified and should be considered biased high.
LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Site Notes (e.g. weather, visitors, scope deviations, health & safety issues, etc.):
* no flow / no sample
- replaced all values w/ H&P liver & lung
- probes w/ poor flow are getting only 1 PV taken out. If flow is good we will use 3 pv.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 27 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 16 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 20 UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 04/27/2020 has revealed that there are 3 SCH sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 11 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 19 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Disposal Method: H135 - Discharge To Sewer/Potw Or Npdes(With Prior Storage--With Or Without Treatment)
Tons: 0.357

Year: 2009
Gepaid: CAD980892285
TSD EPA ID: CAD097030993
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)

SEARS, ROEBUCK & CO. (Continued) **S113003211**

Tons:	0.25
Year:	2009
Gepaid:	CAD980892285
TSD EPA ID:	CAD097030993
CA Waste Code:	221 - Waste oil and mixed oil
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.304
Year:	2008
Gepaid:	CAD980892285
TSD EPA ID:	CAD059494310
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.633
Year:	2008
Gepaid:	CAD980892285
TSD EPA ID:	CAD059494310
CA Waste Code:	213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Disposal Method:	-
Tons:	0.065
Year:	2008
Gepaid:	CAD980892285
TSD EPA ID:	TXD982290140
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.005
Year:	2008
Gepaid:	CAD980892285
TSD EPA ID:	TXD982290140
CA Waste Code:	-
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.005
Year:	2008
Gepaid:	CAD980892285
TSD EPA ID:	UTD981552177
CA Waste Code:	213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Disposal Method:	H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons:	0.065
Year:	2007
Gepaid:	CAD980892285
TSD EPA ID:	CAT000613935
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.0168

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 08-28-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/18/2018. OBSERVATION: Observed 2 x 55 gallon drums of used oil with no hazardous waste labels. Label was affixed on the wall and not on the drum. Did not observe any accumulation start date on the label. Last pick up entry on label was noted for 2011. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that hazardous waste label(s) are on the container(s) listed above and they have been completely filled out.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CALTRANS PUMPING STATION (Continued) **S121132512**

Potential Media Affect: Not reported
Potential Contaminants of Concern: Gasoline
Site History: Caltrans had maintained a 100-gallon gasoline UST for this stormwater pumping station for about 30 years until its removal in 1989. Gasoline was observed to be leaking from small holes in the bottom of the UST when it was removed. Soil sampling in September 1989 identified petroleum impacts directly beneath the UST, while three deeper soil borings in January 1990 detected petroleum impacts especially at 15 feet below ground surface (bgs), which was just above the groundwater table of 16-17 feet bgs that was encountered when the three borings were drilled. The maximum concentrations of total petroleum hydrocarbons as gasoline (TPHG), benzene, toluene, ethylbenzene, and xylenes in the ten soil samples collected in September 1989 and January 1990 were 3,040 milligrams per kilogram (mg/kg) (TPHG), 55.7 mg/kg (benzene), 434 mg/kg (toluene), 120 mg/kg (ethylbenzene), and 740 mg/kg (xylenes), respectively. Caltrans and their consultant submitted a work plan in May 1990 for installation of three groundwater monitoring wells and associated soil sampling, and the Regional Board approved the work plan on June 1, 1990; however, Caltrans never installed these groundwater monitoring wells. The Regional Board closure form incorrectly stated that the soil contamination was highest at 5-10 feet bgs, but concentrations in soil at 15 feet bgs were higher than at 5 or 10 feet bgs. The Former Gas-To-Go UST case (1353 Western Ave) found free product in monitoring wells MW-23, located just 50 feet away from the former Caltrans pumping station, so this historical case was re-opened.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-04-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Inspection Report Consent to enter, inspect and take photographs was given by: Robert Berman Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. Please provide a contingency plan with your 2018 CERS submittal. A contingency plan has been provided for your review NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the procedures below: 1. Log in to [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection Report Consent to enter, inspect and take photographs was given by: Arman Martirosyan Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. Update your hazardous materials inventory per the new Cal EPA reporting requirements. An attachment has been provided to assist you. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the procedures below: Log [Truncated]

Eval Date:	05-19-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Peter Martirosyan, Manager. info@ricksabp.com Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

AUTOZONE # 5432 (Continued) **S123514998**

Eval Date: 02-09-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection Report Consent to enter, inspect and take photographs was given by: Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. No violations found at time of inspection 2. As a reminder, please update your CERS submittal yearly between January 1- March 1. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the procedures below: 1. Log in to [Truncated]

Violation Date: 12-08-2016
Citation: 23 CCR 16 2643(b)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2643(b)(1)
Violation Description: Failure of the automatic tank gauging (ATG) system to perform valid monthly 0.2 gallon-per-hour leak tests or generate hard-copy test reports.

HAN'S UNION (Continued) **S101585423**

Violation Notes: Returned to compliance on 12/15/2016. This test needs to be conducted every month and pass for every single wall tank. There needs to be records of this at the location. It has not been passing. You have 7 days to prove that the tank is not leaking by providing a precision tank test. If this does not happen the tanks are going to be red bagged.

Site Name:	SUNRISE ENERGY #253739
Violation Date:	12-08-2016
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes:	Please make sure that all required test results are kept and noted in your report. This includes the .2gallons/hour test that needs to pass each month on the single wall tanks
Violation Division:	Los Angeles City Fire Department

Violation Date:	04-09-2020
Citation:	23 CCR 16 2712(b)(3) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(3)
Violation Description:	Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly. Inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturerG s instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the UPA.
Violation Notes:	It appears in CERS these tanks do not have the proper cathodic protection. The only example of when a single wall can have only isolation is if it is cladded in a corrosive resistant armor such as fiberglass. If it is not cladded then it would also require sacrificial anodeG s or impressed current. To clear this violation please send confirmation of proper cathodic protection or errors in CERS information to barry.belknap@lacity.org

Click Here:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type:	Other/Unknown
Eval Date:	03-09-2020
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Second Notice of Violation Inspection Report Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on 1/13/20, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into California Environmental Reporting System (CERS) is required between January 1 and March 1 of every year. Per L.A.M.C. [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D011
Waste Description: SILVER

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE

DELUXE LABORATORIES INC (Continued) **1000428979**

USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
