Comments for Public Posting: Dear City Council and Esteemed Staff, I am writing to you regarding the expansion of the Van Nuys Airport (VNY) and how imperative it is that before any expansion takes place there must be: Citizen's Advisory Committee meetings and input from the public (those who will be directly impacted if expansion is done improperly). Moreover, It is imperative that environmental studies mitigating: noise and jet blast, environmental implications to wildlife and the environment, as well as the erosion of the enjoyment and serenity of open space (such as in the Santa Monica Mountains) be considered. All this will be forever changed, for current and future generations. Van Nuys Airport was always a very small, cloistered, community airport. I remember this as a child (VNY) was used only by a limited few living in the vicinity. LAWA has endeavored to make this airport into something it was never intended to be. Through its own self interest LAWA has turned this small facility into one of the busiest general airports in the nation, with no concern nor thought for those living on the ground, those whose with health considerations, children, wildlife, the elderly hampering our health and well being, eroding our quality of life. It is unconscionable, and LAWA must not be allowed to continue operating with impunity. Incessant jet noise overhead causes: tinnitus, anxiety and high blood pressure among other afflictions for those who must live under these intolerable conditions. I beseech you to do better for those living on the ground under this usurpation of our skies. It is imperative that before LAWA and Van Nuys move forward that Community participation and targeted research is conducted and included in these plans. Thank you.
