Council File No: 23-1339

Comments for Public Posting: Dear Council Members, YOUR vote in committee and the City Council floor for CF 23-1339 and the Bonseph Helinet proposal will either directly HARM the health and well-being of my family, OR collectively protect the citizens of this Valley. I ask you to vote to PROTECT the citizens! Over the past eight years, the growth of VNY has been exponential, without transparency, and without ANY thought to mitigation measures in billionaire-funded development deals. This City has FAILED its citizens (and our environment) by allowing millions of investors' funds to be WASTED by LAWA through their failure to ensure that development projects include critically needed and environmentally preserving modernization upgrades such as electrified hangars/ramps, jet blast and sound barrier walls, significant tree canopy borders meeting FAA height requirements, grey water infrastructure, and more. THIS MOTION WILL PREVENT SUCH NEGLIGENCE FROM EVER HAPPENING AGAIN. This motion should not be amended or watered down in any way, and NO aviation development should be approved by City Council until 23-1339 is realized! The Bonseph Helinet proposal is yet another development failure that does NOT include critically needed modernization upgrades to protect residents and the environment from immediate, direct and cumulative harm. We call on you to REJECT the Bonseph Helinet proposal and NOT to be naive and attempt to "negotiate" modifications that can NOT be realized in this deal. CEQA historically has FAILED residents without providing VNY development protections. Reject it. It is OUR health and quality of life that is impacted by your vote. City Council should be following Council District 6's lead! If your district is not impacted, you have no moral standing to approve or even suggest modifications to approve developments at VNY, nor to vote against or amend a responsible Plan mandate. If your district IS impacted, then please honor your constituents' health, quality of life and environment in your district and support CD6's efforts! Say YES to the right actions. My life and the lives of my child depend on it. Thank you for your consideration, Deborah Llewelyn

Comments for Public Posting: Dear Council Members! YOUR vote in committee and the City Council floor for CF 23-1339 and the Bonseph Helinet proposal will either directly HARM the health and well-being of my family, OR collectively protect the citizens of this Valley. I ask you to vote to PROTECT the citizens! We are woken up nightly by airplane noise and suffer 24/7 from the increased pollution increasing breathing problems for our asthmatic older child and putting a film of dusty pollution over our cars daily. This private airport is making living conditions awful for average citizens living under its flight paths. Over the past eight years, the growth of VNY has been exponential, without transparency, and without ANY thought to mitigation measures in billionaire-funded development deals. This City has FAILED its citizens (and our environment) by allowing millions of investors' funds to be WASTED by LAWA through their failure to ensure that development projects include critically needed and environmentally preserving modernization upgrades such as electrified hangars/ramps, jet blast and sound barrier walls, significant tree canopy borders meeting FAA height requirements, grey water infrastructure, and more. Council File No: 23-1339

Comments for Public Posting: I support Motion 23-1339 without amendments and seek City Council Members to vote YES. I call for the outright rejection of the Bonseph-Helinet proposal that cannot be modified to correct its critical flaws. The unfettered explosion of flights in and out Van Nuys Airport, and particularly charters (which should not be allowed), and the flagrant disregard of the voluntary “curfew” (which should be mandatory), shows utter disdain for the citizens who live and work in the surrounding neighborhoods. Shame on our City government and representatives for placing FAA and aviation interests over the well-being of their constituents.

Comments for Public Posting: Dear Council Members, My name is Jason and YOUR vote in committee and the City Council floor for CF 23-1339 and the Bonseph Helient proposal will either directly HARM the health and well-being of my family, OR collectively protect the citizens of this Valley. I ask you to vote to PROTECT the citizens! - We , the tax paying, voting residents, support Motion 23-1339 without amendments and seek City Council Members to vote YES - We call for the outright rejection of the Bonseph-Helinet proposal that cannot be modified to correct its critical flaws. The combination of VNY with Burbank airport has massively diminished the quality of life in the San Fernando Valley, and it continues to get worse. It is negatively impacting the health and lives of hundreds of thousands of residents - families, children, businesses, home values, and more. There are many times throughout the day and night that we have incredibly low, loud planes circling and accelerating over our neighborhoods, schools, and businesses every 60-90 seconds. Having 8-10 planes in 25-30 minute periods throughout the day, roaring over our homes is torturous and is literally destroying our health due to unchecked air and noise pollution. It has been well-established scientifically that the noise alone can have horrible impacts on the health of people of all ages, and especially children. The FAA and LAWA uses ridiculous noise metrics to justify this attack on our health and lives - not only are the metrics outdated, but they also fail to acknowledge that different types of noises affect our bodies differently. Even if an overhead plane is no louder than a TV at high volume, the noise from aircraft affects us in a dramatically more negative way. The bottom line is that we cannot allow ANY more growth of ANY kind at VNY. Over the past eight years, the growth of VNY has been exponential, without transparency, and without ANY thought to mitigation measures in billionaire-funded development deals. This City has FAILED its citizens (and our environment) by allowing millions of investors' funds to be WASTED by LAWA through their failure to ensure that development projects include critically needed and environmentally preserving modernization upgrades such as electrified hangars/ramps, jet blast and sound barrier walls, significant tree canopy borders meeting FAA height requirements, grey water infrastructure, and more.
