Comments for Public Posting: it's 12/17, a Sunday. Like all other weekdays during the last months, countless propellers flew over our houses again, again, again, again, and again. To the extent that I had a panic attack resulted from constant high speed noise (which is extremely harmful to human hearing and nervous systems) and EXTREME NOISE POLLUTION. Yes, noise is a type of pollution that can be very dangerous to human physical and mental health. We are devastated, we don't know what to do anymore. Those propellers were not at VNY a couple of months ago. WE HAVEN'T INVITED THEM, AND DON'T ACCEPT THEM FLYING OVER OUR HEADS. They are extremely noisy, and disturbing. They ASSAULT our privacy and lower the quality of our lives to a dangerous degree. We really don't know who to complain to anymore. PLEASE DO SOMETHING. Thank you.

Comments for Public Posting: The noise and pollution from the VNY airport is negatively impacting thousands of residents. This airport was not intended for the multitude of private JETS servicing the rich (and politicians I'm sure). It's destroying the health and wellbeing of our communities. Not only are we bombarded north and south by private jets, we're now overrun by low flying commercial aircraft from Burbank Airport East and West down Sherman Way every 10-15 minutes thanks to NextGen and the brilliant FAA removal of steps for aircraft landing to save on fuel. Just like VNY we now see, hear and smell Burbank's arrivals - hundreds a day. There are consequences for not thinking past lunch and only taking in decision makers' personal agendas for keeping their jobs and keeping themselves in office. We have the right to review and refute any plans or proposed changes that happen at VNY airport.
