Comments for Public Posting: It is so unfortunate that the general public keeps repeatedly being told that the Van Nuys airport has not increased in traffic or noise. Any resident can attest to the increase in both, including myself. The flight patterns have changed within the last five (5) years and there are planes that will literally rattle our windows. Numerous studies have shown the negative effects of noise pollution on health and quality of life. I urge you to look into these studies and consider the well being of native and non-native Angelinos. Something needs to be done urgently and my hope is that, collectively, our council members can help us come up with a reasonable solution.
