**Comments for Public Posting:** My public interest comment is this why after contact the board of supervisors about how LaFamilyHousing's unethical and illegal drug and gang involvement problems as well as there staff retaliating and harassing there clients nothing still has been done even though the sylmar board of supervisors admitted to knowing what is going on and said they were to do something about this—you see these Covid 19 housing shelters and motels are nothing more than running drugs through the homeless community while the staff are covering there tails on paper and driving teslas and bmws many with a criminal record if not on parole still And using drugs with clients this is a way to ouch drugs and if you haven't noticed all of the sites are control by local gangbangers with staff help
