**Comments for Public Posting:** I support the motion. I think the gondola projects needs to be re-evaluated to make sure that they are actually meeting the needs of the public instead of creating more issues for the local population. Proper studies need to be done to assess the value of the project. we have a need for proper public transit access, not fancy joy rides. In every other major city I've been to that has a gondola, it never encroaches on public land, flies over people's homes, and it's never that short of a ride. This project doesn't seem like anything but a fancy joy ride
