Comments for Public Posting: There is no reason to delay approval of the Dodger Gondola while a traffic study is conducted. Public transit reliably reduces traffic by getting people out of cars and reduces emissions because the cars that remain idle for shorter periods. By all means, perform the traffic study so that we know how areas will need updated as traffic patterns evolve in response to new transportation options, but do not delay approval of the Gondola while you do it.

Comments for Public Posting: I fully support the motion to perform an objective transit study in order to asses the impacts of alternate transportation for Dodger Stadium and hold on the gondola project until these measures are taken
