**Comments for Public Posting:** I oppose the construction of the gondola, at least as the proposal has been presented. There must be ways to minimize congestion, traffic, air pollution other than enriching an individual who stands to gain significantly should this be implemented. While it appears often now that city officials profess care about the concerns of their constituents, the reality of late is that the powers-that-be ultimately do as they like so that impacted neighborhoods in reality have no meaningful voice. Given all the controversy about this project, our disenchantment and distrust of our local government shall be furthered if the gondola is built.
