Comments for Public Posting: Dear Members of the Los Angeles City Council, The Valley Industry and Commerce Association (VICA) supports the Los Angeles Aerial Rapid Transit (LA ART) project. This innovative transit solution promises to enhance connectivity, reduce traffic congestion, and provide a sustainable transportation option for residents and visitors of our vibrant city. The LA ART project is poised to transform the way we think about urban mobility in Los Angeles. By connecting Dodger Stadium and Union Station through high-capacity aerial gondola cabins, this initiative will not only alleviate the strain on our existing road and public transit systems but also offer a unique and efficient travel option that complements the city's commitment to innovative urban planning and sustainability. Moreover, the project's design and implementation results in permanent environmental benefits: improved air quality, reduced greenhouse gas emissions, and enhanced neighborhood safety. The LA ART will provide scenic, reliable, and direct transportation, significantly reducing travel times during game days and events, and enhancing the overall experience of city-goers and sports fans alike. We believe that the LA ART project is a critical step forward in our ongoing efforts to develop a more interconnected and accessible Los Angeles. By supporting initiatives like this, we can ensure a robust economic future and improved quality of life for all who live in, work in, and visit our city. VICA is eager to see the positive impacts the LA ART will have on our community and is committed to supporting its development, and for these reasons, we urge your support.

SUBJECT: Support for the Los Angeles Aerial Rapid Transit (LA ART) Project

Dear Members of the Los Angeles City Council,

The Valley Industry and Commerce Association (VICA) supports the Los Angeles Aerial Rapid Transit (LA ART) project. This innovative transit solution promises to enhance connectivity, reduce traffic congestion, and provide a sustainable transportation option for residents and visitors of our vibrant city.

The LA ART project is poised to transform the way we think about urban mobility in Los Angeles. By connecting Dodger Stadium and Union Station through high-capacity aerial gondola cabins, this initiative will not only alleviate the strain on our existing road and public transit systems but also offer a unique and efficient travel option that complements the city's commitment to innovative urban planning and sustainability.

Moreover, the project's design and implementation results in permanent environmental benefits: improved air quality, reduced greenhouse gas emissions, and enhanced neighborhood safety. The LA ART will provide scenic, reliable, and direct transportation, significantly reducing travel times during game days and events, and enhancing the overall experience of city-goers and sports fans alike.

We believe that the LA ART project is a critical step forward in our ongoing efforts to develop a more interconnected and accessible Los Angeles. By supporting initiatives like this, we can ensure a robust economic future and improved quality of life for all who live in, work in, and visit our city.

VICA is eager to see the positive impacts the LA ART will have on our community and is committed to supporting its development, and for these reasons, we urge your support.
