Comments for Public Posting: As an Angeleno and mother who would like to see better public health outcomes, I strongly urge for the enforcement of the 1998 ordinance that banned gas-powered leaf blowers. The gas is toxic and pollutes the air that we breath within seconds of being turned on. It's detrimental to the person using the leaf blower and others. Please enforce and provide incentives for homeowners and people using leaf blowers to switch to electric leaf blowers - and better yet, to create native habitat gardens where leaves are left as is as valuable mulch. Thank you!
