**Comments for Public Posting:** To whom it may concern, I write to support a variety of items on the Transportation Committee meetings agenda. I particularly support item #5, item #14, and item #15. Item #5 would ensure that bike lanes throughout the city stay open and safe for cyclists, while also raising needed funds for the city to further improve infrastructure to meet vision zero. I also support item #14, as many bike paths and lanes in Los Angeles are poorly maintained with paint fading and this motion would improve the condition of bike paths within the city while also streamlining the process of responsibility for bike path maintenance. Finally, I support item #15 to finally implement measure HLA, which, one year after codification, has still not been acted upon. I also find it important to mention the highly concerning decision that Los Angeles has been taking to avoid updated existing projects to comply with HLA due to fears over grant loss. This is concerning given that measure HLA is codified city law which was voted in democratically. Furthermore, measure HLA's street improvements are especially important given the upcoming World Cup and Olympics in Los Angeles, and every day in which measure HLA is left neglected as it has been, our streets remain dangerous and put Angelenos in danger. The city must make a good effortful push towards vision zero. Thank you for your time, Jonathan Ahituv

**Comments for Public Posting:** I support Item #15 to ensure swift implementation of Measure HLA. The city needs to make a good faith effort to implement HLA with already funded projects, not speculate about "maybes" when this measure will save lives. HLA will provide much needed improvements to our streets when we will welcome the world next year and in 2028 for the World Cup and the Olympics.

**Comments for Public Posting:** I support Item #14 to put responsibility of maintaining bike lanes and bike paths in the hands of the Public Works Department to prevent this much needed infrastructure from crumbling. One city department should be in charge to ensure swift and efficient maintenance.

**Comments for Public Posting:** I believe that the implementation of HLA is one of the most critical infrastructure ordinances in the nation. There is little precedent for an ordinance this beneficial for the community. It makes me proud to live in Los Angeles. I hope that it will be implemented swiftly and that the community can reap the benefits of a once-in-a-generation ordinance that has the ability to radically improve the lives of millions of Angelenos. We have the opportunity to lead the nation in building, securing, and creating better ways for people to move around the city. Please implement HLA and work towards creating a safe, equitable, and beautiful city for everyone to enjoy.
