Comments for Public Posting: Item #15 (24-0173) HLA will provide much needed street improvements, However the Measure HLA is not being implemented. There have been grants and funded projects that could be used towards street improvements that are currently being neglected. I am making this public comment to urge our local government to please consider making more progress towards these issues. Thank You!

Comments for Public Posting: I support all biking protections even at the cost of car convenience and an increase in traffic. Increase protections for cyclist and biking infrastructure. Put infinite money into helping LA mobility. Please use tax dollars for civilian mobility.

Comments for Public Posting: Many bike paths are poorly maintained and dissuade people from actually using them. Bikes put less wear and tear on paths than cars do on roads, yet we prioritize spending tons of money redoing roads every year. Consider how sparsely we'd need to redo a bike path and the impact it would have on making people want to ride bikes more.
