Comments for Public Posting: Every step should be mad to support HPOZ's from destruction taken under ED1 and the Council should move ahead with dispatch to permanently support these special districts .LA has done a poor job in protecting its cultural heritage in the past. Let's not take another giant step in the direction of destruction.

Comments for Public Posting: I fully support this interim motion to protect HPOZs from destruction taken under ED-1 and urge the City Council to enact percent protection for the irreplaceable special districts. Many of our HPOZs are in historically underserved communities with large numbers of multi family housing..
