Comments for Public Posting: Regarding the budget, LAPD gets \$46 million dollars a year for Air Support alone!! Cutting other programs while continually funding the LAPD is a waste of taxpayer money.

Comments for Public Posting: As an Angeleno who greatly values the importance of our city parks, I am deeply concerned about the proposed budget cuts targeting these essential public spaces. Our parks serve as vital hubs for our communities, promoting mental and physical well-being, fostering social connections, and providing a much-needed respite from the bustle of urban life. These invaluable benefits should not be compromised in the name of fiscal prudence. It is imperative that we prioritize and preserve the quality of our parks for the sake of current and future generations. The proposed budget cuts not only threaten the beauty and maintenance of these cherished spaces, but also the numerous recreational and educational programs they offer. The consequences of such cuts would undoubtedly be felt by countless families, individuals, and community groups who rely on our parks for a myriad of activities and resources. In this critical moment, let us collectively voice our opposition to these short-sighted budget cuts and stand together to protect the sanctity of our parks. The long-term health and well-being of our city depend on the availability and accessibility of these cherished green spaces, and it is our responsibility to ensure they remain a vibrant part of our urban landscape for years to come.
