Comments for Public Posting: As an executive board member of HousingMV, I would like to express support of Mayor Bass' budget proposals concerning homeless issues. Various provisions of Inside Safe, including interim and permanent housing , service provision and support services are critical items in HousingMV's program planning and are critical in implementing programs to improve housing and the conditions of homelessness as are street medicine programs , mobile hygiene programs and subsidized job support.

Comments for Public Posting: Approving the Mayor's budget is crucial for establishing a better system and paving the way for a brighter future for Los Angeles. This budget is not only essential for initiating a comprehensive overhaul of our homeless sector but also for creating lasting improvements that will benefit future generations. By supporting this budget, we can ensure sustained progress and positive change for our city.

Comments for Public Posting: The budget proposed by Mayor Bass is good. I urge Council to support it as is. My number one priority for our city is homelessness, and I know this priority is shared by almost everyone that I know. We need to increase the funding for Inside Safe because that is the only program I've ever known that's worked. This budget continues the City's work on homelessness. It makes sure we have funding for our officers and firefighters. It keeps our city services going. Support the budget.

Comments for Public Posting: I live in Chatsworth by Topanga and Devonshire. The speeding is out of control and we could really use the help of more officers and maybe a new stop light. I like Mayor Bass and the work she's doing. I feel hope for the future. Keep it up. I'm happy that the budget has more money for additional officers. I support the budget.

Comments for Public Posting: I support the Mayor's proposed budget and in particular the investments in Inside Safe and in LAPD and public safety. My community has directly benefited from Inside Safe interventions so I would like to see those continue. We are also suffering from slow 911 and LAPD response times so I would like to see increased spending and staffing in these areas. I also support increased spending in the Rec and Parks Department and Bureau of Street Services and maintaining appropriate staffing to provide critically needed services to neighborhoods. In the area of climate and sustainability I support the proposed spending in vehicle electrification, increased staffing at DWP to meet clean energy targets and water treatment and recycling goals. I also support the spending towards meeting organics recycling goals.
