Comments for Public Posting: Set up more budget for Neighborhood Councils so they can do more for the communities. NCs are the fence-line of city government, and the threshold of communities to city services. What can an NC do with miserly \$32K a year? Pay for office rent alone. Base this amount on inflation, this budget was cut off during COVID and never reinstated. NCs need more to do more. Either shut down the NC program altogether or provide more funding, otherwise it is another useless city endeavor. The city has failed so many times before, so much money was wasted on fruitless programs. NCs are important, perhaps one of the most important programs. You need to increase the budget, and increase it annually, based on inflation.
