RAP Response to CF 24-0708 relative to a full audit of all existing free, publicly accessible bathrooms, water fountains, and hydration stations under the jurisdiction of the Department of Recreation and Parks (RAP)

Background:

On August 28, 2024, LA City Council adopted a motion directing RAP, to report to Council with a full audit of all existing free, publicly accessible bathrooms, water fountains, and hydration stations under their jurisdiction

- A. Location of each bathroom/water fountain/hydration station, including facility name, address, and Council District
- B. Operational status of each bathroom/water fountain/hydration station
- C. Cost and timeline estimate for restoration of each bathroom/water fountain/hydration station that is not currently operational/in service, as well as barriers to maintenance of the facilities
- D. Hours during which each bathroom/water fountain/hydration station is open and/or accessible
- E. Cleaning and maintenance protocol for bathrooms/water fountains/hydration stations
- F. Recommendations to improve quantity and quality of bathroom and water service
- G. For each bathroom location, audit the number of toilets, urinals, sinks, spigots, and showers present at each location

Analysis / Findings:

The City of Los Angeles Department of Recreation and Parks (RAP) oversees one of the largest and most diverse municipal park systems in the nation, encompassing over 450 parks, more than 16,000 acres of parkland, and hundreds of recreational facilities that serve millions of residents and visitors each year.

Given the scale of our system, the scope of services we offer is equally dynamic. Requests for maintenance, capital improvements, and infrastructure assessments—especially those related to water access and public amenities—are varied and continuous. RAP responds to these through a combination of regularly scheduled maintenance, emergency responses, and job orders that vary in complexity, timeline, and available resources. We work diligently to ensure that our assets remain safe, operational, and accessible to the public, with an emphasis on equity, health, and environmental resilience.

It's important to note that field restrooms, typically located in outdoor spaces such as parks and athletic fields, differ from restrooms inside buildings. Field restrooms generally require more frequent maintenance due to weather conditions and heavy usage, while restrooms inside park buildings often have more infrastructure and are serviced through routine building maintenance.

In response to the Council's directive for a full audit of all existing free, publicly accessible bathrooms, water fountains, and hydration stations under our jurisdiction, we offer the following outline for the requested report that combines a few items from the motion

Facility Inventory and Amenities

Attached to this report is a list of all our restrooms with facility name, address and council district. It also includes the number of hydration stations, toilets, urinals, sinks.

[Attachment 1: Water Fountain and Restroom Inventory List](#)

Access and Operational status

Generally, during a park's operating hours, the associated restrooms and hydration stations are also available and open to the public. Park operating hours within the City of Los Angeles Department of Recreation and Parks may vary by location and facility. Typically, parks operate from 5:00 a.m. to 10:30 p.m., unless otherwise specified in Los Angeles Municipal Code 63.44. For a complete list of please see 14 of [LAMC 63.44](#)

Please note that the list attached does not indicate whether a restroom or fountain are operational as those requests typically get addressed through our job order system. This job order system is updated in real time.

Restoration Needs and Barriers

The maintenance and construction teams at the City of Los Angeles Recreation and Parks typically address job orders by prioritizing them based on urgency and available resources. Routine requests are handled within scheduled timelines, while emergency or high-priority issues are expedited. The time it takes to complete a job order depends on the complexity and scale of the work, with some tasks being addressed within a few days, while larger or more

complex projects may take weeks or months. Prioritization and resource allocation are key factors in meeting deadlines.

Type	Estimated timeline to complete	Examples	Estimated costs
Small	1-2 business days	Emergency requests, restroom leaks,	\$750.00-\$3500
Medium	1 week	Broken restroom fixtures mainline stoppage	11,500.00
Large	indefinite, depends on funding availability	Replacement of outdoor restrooms. Replacement of hydration station	500k+ for restrooms 15-20K for hydration station

Some common barriers to restroom maintenance include limited staffing, budget constraints, and the high volume of usage, especially during peak seasons. Environmental factors such as weather conditions and vandalism can also impact the availability of restrooms. These factors can extend the time it takes to maintain and repair restroom facilities. Lastly, there are field restrooms that face constant vandalism and may be closed indefinitely.

Cleaning and Maintenance Protocols

Typically, restrooms are cleaned, sanitized, and stocked thoroughly once per day. Typically, they will be serviced before 9AM.

Please note that maintenance staff that clean the restrooms are also typically responsible for cleaning other parts of the park facilities, amenities, and grounds.

Recommendation

Note and file this report.

Sincerely,

JIMMY KIM
General Manager
