Comments for Public Posting: It would be amazing if this passed. I believe it sets the right balance of the rights to free speech, free assembly, freedom of religion, and the right to safe passage. LA is a true cultural and religious melting pot where all of the major religions including atheists live together and flourish together peacefully. This action will reinforce that public good and keep LA the best place to live and practice one's religion.

Comments for Public Posting: I am Jewish, second generation to the holocaust, and I am very sensitive to any religious persecution on any basis. I have seen people harassing others in East Hollywood for religious motives. This reminds me of the dark days we would like to forget. For the freedom of good hearted people who want to help the population in physical and mental relief. It is my beliefs that the law stating that institutes of all natures of help should be protected from harassment of any kind. So this project is more than wanted as far as I am concerned.

Comments for Public Posting: I have recently been informed of the project to establish a buffer zone around facilities which provide help and service to the community. I am very much in favor of this project as there is a need of such protection extended to facilities that service the community with help. I am an American citizen and have lived in Los Angeles County for the past 16 years. I work full time in the ministerial services and have an intimate understanding of the need of help that all help providers give. I have also experienced hate in our streets and neighborhoods ; I know that persons of good will need to be protected so that they can continue to spread the good will.

Comments for Public Posting: This proposed bill to set up a bubble around places such as hospitals, schools, community centers and so forth so that they are shielded from disturbances which would bother their patients, students or members, or those who just go there for help, is really good. I am totally in favor of this bill. People going or recovering from surgery or trying to study for exams need to be protected against the noise and disturbance of strikers or trouble makers yelling... Thank you in anticipation for passing this bill.

Comments for Public Posting: I am a USMC Veteran, living in LA. I personally in support of this initiative to create a buffer zone around hospitals, schools, religious buildings and anywhere people go seeking help. I have experienced being accosted by protestors just outside my door that had nothing to do with what I was personally doing, but they were antagonistic, spreading hate. I had to complain to police to no avail. I want you to know that this initiative is approved.

Comments for Public Posting: I heard about this project and immediately decided to write a message here to express my approval and support of it. I am very happy about such a possibility that harassment in the name of protest outside places of welfare around where I live. It's been horrible to witness some scenes of hate I have recently seen firsthand, here in LA. So I feel relieved to see such a project at the City Council! Thank you

Comments for Public Posting: I support this initiative to ban violent people or harassers around hospital, schools, community centers or churches. I live in LA and I experience sometimes the alarming disturbance from such people. I am 83 years old and this I consider elder abuse. I appreciate the assistance that this ordinance can give so that I can go near such places which I may need to go, and not to fear being harassed on my way. I support this project!

Comments for Public Posting: I support this proposal which makes hate-mongers or trouble-maker people to be disallowed to collect near entrances of building open to public for health, care, support, education. The petty maliciousness of such people not only cut across business but makes a bad reputation for Los Angeles. I think that taking actions that help to keep these welfare places safe from these people who get away with harassment would not is not only a sensible thing to do but would improve our city's image and prosperity, which I am all for.

Comments for Public Posting: Andy Cook I completely support this project of bubble zone around sensitive sites of welfare for people. I am a USMC Veteran and have been a resident form Los Angele for almost 30 years. Establishment that provide help such as hospitals, the VA, Health Care Clinics, Churches and Schools should have unobstructed access for the freedom and safety of those availing themselves for their services. This project should be approved. Sincerely, Andy Cook

Comments for Public Posting: I heard about this ordinance to allow some safe space at entrances of organizations devoted to help people, like clinics, community centers, churches,... whereby protestors or rallies against that organization would not be permitted, as it would interfere with the egress of public who are seeking for help. I support fully such an ordinance as it would make our city a better place to live in and thrive. Please take this in consideration when this project comes to vote for approval.

Comments for Public Posting: I live in Los Angeles, in East Hollywood. The society people who are working to help others to fight everyday problems in their lives and who are working on getting new generations educated MUST be protected. This new project is excellent idea and will definitely contribute to the piece for the people who are working hard every day to help this society to be better through education, healthcare and religions. I am definitely in support of the "Buffer Zone" project! Hope it gets approved and implemented soon!
Regards, Katya
