Comments for Public Posting: In our melting-pot society passing a motion as this is necessary. This is not about restricting the right to others, but about maintaining everyone's rights.

Comments for Public Posting: The idea of creating safe zone whereby anyone can enter a clinic, educational facility, church, ... without close interference with hostile people if any, is a great idea. I would like to back it up any way possible. There have been several instances when I tried to go to the hospital or church only to find that is was blocked off by individuals whom were at odds with that organization. I deserve to have a freedom of choice, so I am greatly in favor of this project.

Comments for Public Posting: I am resident of LA where we have lots of hospitals and churches, as well as community centers,... I have noticed in the last year or so frequently some crazy individuals coming to harass people going in or out such organizations, though these organizations being helping others. So I am really pleased to see there is an initiative to handle such nut heads from disturbing the peace nearby such places. I am all for freedom of speech, but this should be done in a polite fashion and without disrupting the neighborhood and without any violence or threat of violence. This initiative has my total back up. Thank you, Tamara Broonimann
LA Resident

Comments for Public Posting: I support this proposal of a safe area around the entrance of any building offering assistance -hospital, community centers, churches and the like, so that citizens can approach and use their services without obstruction or heckling.
