Comments for Public Posting: I am a cyclist who uses the bike lanes. They often have debris that punctures tires such as glass and nails, not to mention the trash, the cars that park in the bike lanes and the car doors that fling into the the lanes. Sweeping the bike lanes of debris will be a step toward making them a safe and viable mode of transportation for more Angelenos.

Comments for Public Posting: Protected bike lanes keep people on bikes safe and we as a city have made great improvements on our bike infrastructure. Thanks to those bike lanes I commute to work everyday. I'm a high school teacher in south central. However, there Without regular street sweeping on the bike lanes, they get full of debris, defeating the purpose of keeping us safe. I've gotten so many flat tires that could've been avoided. So please we need to maintain and clean the bike lanes.
