Comments for Public Posting: Support for Council File 24-0947 Maintenance of our cycle ways is very deficient. In recent weeks I have received several flat tires due to debris in the roadway. At least two of thoes flats were due to broken glass that remained in the pathway for several weeks until I brought my own whisk broom, dust pan and trash bag... it took me 30 minutes to sweep up the vast majority of tiny glass shards. Had the lane been cleaned in a timely manner it would have been just five minutes of work. I have had to personally remove objects and debris from our bike-ways on many occasions. We shouldn't need to be having this discussion. Timely maintenance needs to be integrated into the design and implementation phases of our bike-ways, not an afterthought. I support this motion and expect your subsequent actions to bring us effective maintenance of our cycle-ways. thank you
