Comments for Public Posting: Please expedite signal preemption across the entire metro system. I use the train multiple times a week and the disruption, bunching, and slow down caused by trains waiting for cars at lights is unacceptable. This is such a cheap way to increase the speed and reliability of the trains, it is honestly embarrassing for the city that it is taking so long.

Comments for Public Posting: A train with 300 people should NEVER have to wait at a red light. We're prioritizing a few dozen cars over hundreds of people in a single train at interactions downtown. Without signal priority people won't see the benefit of taking Metro over driving. Metro can be better than driving, we just need to make the right choice and prioritize trains over cars.

Comments for Public Posting: Hello Transportation Committee, I am a transit rider asking you and LADOT to prioritize the completion of signal preemption for light rail and BRT lines: Especially given Los Angeles' goal for a car-free/transit first 2028 Olympics. If Los Angeles is to solve its traffic problems, it must create a transportation network that moves the most amount of people in the least amount of time given a limited amount of space. As documented by the National Association of City Transportation Officials, trains and buses are the best ways for doing so. LADOT put together an informative 8 page writeup on this topic. However, it took them 16 months to do so, giving the impression that it is not a high priority item. Please put together a motion asking LADOT to prioritize transit signal preemption work. Thank you

Comments for Public Posting: Commuter trains shouldn't have to stop at red lights. I would like to see changes in LA's traffic problems and this requires making public transportation a more viable option. Making commuters sit in the same traffic as cars is a wasted opportunity to improve traffic conditions.

Comments for Public Posting: Hello Transportation Committee, Please prioritize completing signal preemption for light rail and BRT. Transit users are doing the city and region a huge service by not using a car to get around. The least that we could do is make sure that their ride is as smooth and quick as possible. One easy way to do this is by using signal preemption to prevent dozens or hundreds transit riders from being held up at traffic lights just to wait for a handful of drivers. Please pass a motion and ask LADOT to prioritize work on signal preemption, especially in advance of the LA Olympics. Thank you, Elliott Lee Zip code 91803

Comments for Public Posting: Hello Transportation Committee, I am a transit rider asking you and LADOT to prioritize completing signal preemption for light rail and BRT lines, especially given Los Angeles' goal of a car-free/transit-first 2028 Olympics. If Los Angeles is to solve its traffic problems, it must create a transportation network that moves the largest number of people in the least time, given limited space. As documented by the National Association of City Transportation Officials, trains and buses are the best ways to do so. Our city is plagued by traffic congestion, and riders are often not incentivized to take public transit as a viable alternative because these services are inefficient. LADOT put together an informative 8-page write-up on this topic. However, it took them 16 months to do so, suggesting it is not a high-priority item. Please draft a motion requesting that LADOT prioritize transit signal preemption work. Thank you, Se Young Au 90405
