Council File No: 25-0002-S19

Comments for Public Posting: I support Council File 25-0002-S19 that opposes SB79. Density belongs on the transit corridors as identified in our Housing Element, NOT a half mile radius from these stops and into single family, affordable multi-family, vulnerable historic districts or light industrial zones. This bill mandates no affordable units and makes housing on the corridor more expensive. This will make housing unattainable for people who need to live near transit and it undermines the city's affordable housing incentives as identified in the Housing Element. Thank you, Susan Collins

Council File No: 25-0002-S19

Comments for Public Posting: I support Council File 25-0002-S19 that opposes SB79. Density belongs on the TRANSIT corridors as identified in our Housing Element and not a half mile radius from these stops and into single family, affordable multi-family, vulnerable historic districts or light industrial zones. This bill mandates NO affordable unites and makes housing on the corridor more expensive and less affordable for people that need to live near transit. The end result is to unnecessarily remove exiting single family neighborhoods and also undermines the City's affordable housing goals in the Housing Element. The bill should be rewritten to address the needs of all parties (residents/neighborhoods).
