

## **Amendment, Item 2 CF: 25-0006-S35**

Instruct the Los Angeles Police Department (LAPD), in coordination with the Los Angeles Department of Transportation (LADOT), to report on current policies, procedures, and operational practices governing coordination with Official Police Garages (OPGs) during Red Flag conditions and other emergency or pre-disaster (PDS) events.

The report should include, but not be limited to:

- Existing protocols for the deployment and coordination of tow services during such events;
- Current capacity of OPG tow yards, including the ability to accommodate regular, medium-duty, and heavy-duty vehicles;
- Any limitations in service coverage, response times, or equipment availability; and
- An assessment of whether existing agreements and procedures are sufficient to meet Citywide towing needs during emergency conditions, or whether additional contractual provisions or policy changes may be necessary.
- The proposed amendment to its contract with the Official Police Garage in regards to the “unusual occurrence” clause. This clause should allow the mobilization of tow units Citywide (in a mutual aid style configuration, regardless of service area sovereignty; to include mobilization of regular, medium, and heavy-duty tows) during Red Flag and PDS events.
