**Council File No:** 25-0141

**Comments for Public Posting:** The Los Angeles Area Chamber of Commerce, the largest business organization in the Los Angeles region, opposes this motion instructing LADOT to explore implementation of a local air quality program. The Chamber shares the interest of clear air for Angelenos but is concerned with adding complexity to the regulatory framework that currently exists at the state and federal levels within the AQMD and CARB. The Chamber further expresses concern about the City taking on more responsibility at a time when its own fiscal circumstances make it unable to maintain City services and facilities.
