**Comments for Public Posting:** Please support the single stair motion and legalize buildings with single staircases. We need to make it easier to build new housing. Thank you!

**Comments for Public Posting:** My name is Karim Sahli and I'm writing to say I strongly support CF 25-0247 — the motion to move forward with Single Staircase Reform in LA. This is a much-needed change that would help create better, more livable housing across the city. Single staircase designs mean more natural light, more flexible floor plans, and just better buildings overall. It's a smart, common-sense step that helps align housing and mobility goals — the kind of forward-thinking LA really needs right now. Thanks for your time and for moving this conversation forward. Best, Karim Sahli

**Comments for Public Posting:** I support single-stair stairway because it will help address the housing crisis in LA by allowing for more construction of housing that meets the needs of citizens. Data shows that fire safety is not meaningfully different between areas that require more than one stairway and the single stairway construction. While building safety should always be considered, we shouldn't let outdated building codes prevent us from building the housing LA so desperately needs.
