Comments for Public Posting: I am a resident of Hollywood and I live really close to these bike lanes that are listed in the pilot proposal. I drive by them when I do drive, and I ride the Lime scooters in them when I do go without my car. I support the use of automated parking enforcement to stop cars from being parked in a way that obstructs bike lanes. Every time the sun goes down, folks think they can park in bike lanes, thinking it's no big deal despite the fact that cyclists are also out and about at night as well. It's not just irresponsible and makes other drivers feel like suckers for following the law, but it's also very dangerous for the cyclists and scooterists as these obstructions force them to ride among car traffic or on the sidewalk. I also support the use of license plate readers to enforce the parking laws through the existing city contract, because cyclist safety cannot wait.
