Comments for Public Posting: Please begin enforcing parking violations in bike lanes using camera technology, as now allowed by state law. I previously lived in the West Adams neighborhood, and the new bike lanes on West Adams were regularly unusable due to the presence of cars. I now live in Venice, and the bike lanes along Venice Blvd often act as de facto double parking zones, requiring bicyclists to use the main roadway. This is unsafe and chaotic for all parties.

Comments for Public Posting: I strongly support the implementation of camera enforcement for bike lanes. This policy is critical for the following reasons: Safety: Illegally parked cars in bike lanes force cyclists into traffic, putting lives at risk. Keeping bike lanes clear ensures safe and reliable travel for people on bikes. Enforcement and Accountability: Routine camera enforcement will deter illegal parking behavior and ensure that bike lanes are used as intended—for cyclists, not vehicle storage. Revenue for Infrastructure: This program can generate much-needed revenue that should be reinvested in street safety improvements, particularly in historically underfunded communities. Bike lanes are not suggestions—they are lifelines for many Angelenos. I urge the Council to support this item and ensure its swift implementation.

Comments for Public Posting: Keeping our bike lanes free of illegally parked cars clear keeps cyclists safe. Camera enforcement of bike lanes would ensure these lanes stay open for use, rather than blocked by cars. Routine enforcement will raise much-needed funds for the city that could be used for infrastructure improvements. We need better enforcing of bike lanes and utilizing cameras and related technologies for the enforcement of parking violations in bicycle lanes would help. Thank you.

Comments for Public Posting: I'm in full support of this pilot program to use cameras to enforce parking violations in bike lanes on Hollywood Blvd. Right now, bike lanes are constantly blocked by cars — which defeats the whole point and puts cyclists in danger. This kind of basic enforcement would actually make the lanes usable and keep people safe. It's also a smart way for the city to bring in some extra money, which could go toward fixing the streets or improving bike infrastructure. It's not complicated: if we say we care about safe, accessible transportation, we should actually keep the bike lanes clear. This pilot is a step in the right direction.

Comments for Public Posting: Anything the City can do to keep bike lanes free flowing helps the safety of bicycle riders. Cameras pointed towards bike lanes is a genius idea and should really be implemented everywhere. I depend on the bike lanes to get around Hollywood. Sincerely,
Mimi Holt

Comments for Public Posting: Dear Members of the Transportation and Public Works Committees, I'm writing in strong support of Item #5 (25-0558), the proposal to pilot camera enforcement of bike lane violations along Hollywood Boulevard. This is a much-needed step to make our streets safer and more functional for people on bikes. Here's why this motion makes sense: It keeps bike lanes usable and safe. When drivers block bike lanes, they put cyclists in danger and force them into traffic. Cameras can help keep these lanes clear and doing what they're meant to do—provide a safe place to ride. It helps generate revenue for street improvements. Routine enforcement won't just improve safety—it can also bring in funding that the City can reinvest into better infrastructure across the board. It sends a message that bike lanes matter. Consistent enforcement shows that we take our bike infrastructure seriously. It's about protecting people and making sure our transportation network works for everyone. This pilot is a smart and simple way to improve safety, raise revenue, and make our streets work better for more Angelenos. I hope you'll support this motion and move it forward.
