

## ADOPTED BUDGET RECOMMENDATION

Instruct the Department of City Planning to report to the Planning and Land Use Management Committee on the status of the Department's long-range planning efforts in the San Fernando Valley, including multiple Community Plan updates and Transit Neighborhood Plans currently underway and proposed to be completed in the next two years, which will modernize zoning, land use, street designations, and development and design standards for more than 20 percent of the City after more than two decades. The report should include major milestones with projected timelines, and an analysis of how this work is critical to spur economic recovery, sustainable development, infrastructure improvement, housing growth, and community stabilization, including in compliance with state-mandated Regional Housing Needs Allocation obligations.

(Pursuant to Council Action of July 30, 2025; Council file No. 25-0600-S32)
